

NOTICE OF ANNUAL MEETING OF STOCKHOLDERS

MAY 29, 2019

Notice is hereby given that the Annual Meeting of the Stockholders of UNIVERSAL ROBINA CORPORATION will be held on May 29, 2019 at 3:00 p.m. at the Ruby Ballroom, 4th Floor, Crowne Plaza Manila Galleria, Ortigas Avenue corner Asian Development Bank Avenue, Quezon City, Metro Manila.

The Agenda for the meeting is as follows:

1. Proof of notice of the meeting and existence of a quorum.
2. Reading and approval of the Minutes of the Annual Meeting of the Stockholders held on May 30, 2018.
3. Presentation of annual report and approval of the financial statements for the preceding year.
4. Election of Board of Directors.
5. Appointment of External Auditor.
6. Ratification of the acts of the Board of Directors and its committees, officers and management.
7. Consideration of such other matters as may properly come during the meeting.
8. Adjournment.

A brief explanation of each agenda item which requires stockholders' approval is provided herein. The Information Statement accompanying this notice contains more detail regarding the rationale and explanation for each of such agenda item.

For convenience in registering your attendance, please have available some form of identification, such as driver's license, SSS ID card, TIN card, passport, or company ID.

We are not soliciting proxies. If, however, you would be unable to attend the meeting but would like to be represented thereat, you may accomplish the herein attached proxy form. Pursuant to Section 9, Article II of the Amended By-Laws of Universal Robina Corporation, proxies must be received by the Corporate Secretary for inspection and recording not later than five (5) working days before the time set for the meeting, or not later than May 22, 2019. Validation of proxies shall be held on May 24, 2019, 5:00 p.m. at the Office of the Corporate Secretary, 40/F Robinsons Equitable Tower, ADB Avenue corner Poveda St., Ortigas Center, Pasig City.

Registration starts at 2:00 p.m. and will close at exactly 3:15 p.m. Only stockholders of record as of April 24, 2019 shall be entitled to vote.

By Authority of the Chairman

ATTY. ROSALINDA F. RIVERA
Corporate Secretary

**ANNUAL MEETING OF STOCKHOLDERS
MAY 29, 2019**

EXPLANATION OF AGENDA ITEMS FOR STOCKHOLDERS' APPROVAL

Reading and approval of the Minutes of the Annual Meeting of the Stockholders held on May 30, 2018

Copies of the minutes will be distributed to the stockholders before the meeting and will be presented to the stockholders for approval.

Presentation of annual report and approval of the financial statements for the preceding year

The annual report and the financial statements for the preceding fiscal year will be presented to the stockholders for approval.

Election of Board of Directors

After having undergone the nomination process as conducted by the Corporate Governance Committee, the nominees for election as members of the Board of Directors, including independent directors, will be presented to the stockholders. The profiles of the nominees are provided in the Information Statement sent to stockholders. The members of the Board of Directors of the Corporation shall be elected by plurality vote.

Appointment of External Auditor

The Corporation's external auditor is SyCip Gorres Velayo & Co. and will be nominated for reappointment for the current fiscal year.

Ratification of the acts of the Board of Directors and its committees, officers and management

Ratification of the acts of the Board of Directors and its committees, officers and management of the Corporation since the last annual stockholders' meeting up to the current stockholders' meeting, as duly recorded in the corporate books and records of the Corporation, will be requested.

Consideration of such other matters as may properly come during the meeting

The Chairman will open the floor for comments and questions by the stockholders. The Chairman will decide whether matters raised by the stockholders may be properly taken up in the meeting or in another proper forum.

UNIVERSAL ROBINA CORPORATION (“URC”)

PROFILES OF THE NOMINEES FOR ELECTION TO THE BOARD OF DIRECTORS FOR THE YEAR 2019

1. Name : John L. Gokongwei, Jr.

WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE REQUESTED NOT TO SEND US A PROXY.

Item 2. Rights of Shareholders; Dissenters' Right of Appraisal

The Corporation recognizes the right of all shareholders to be treated fairly and equally whether they are controlling, minority, local or foreign. The Corporation respects the rights of shareholders as provided under the Revised Corporation Code and other laws, and as stated in its Articles of Incorporation and By-laws.

Any stockholder of the Corporation may exercise his appraisal right against the proposed actions which qualify as instances giving rise to the exercise of such right pursuant to and subject to the compliance with the requirements and procedure set forth under Title X of the Revised Corporation Code of the Philippines.

There are no matters to be acted upon by the stockholders at the Annual Meeting of the Stockholders to be held on May 29, 2019 which would require the exercise of the appraisal right.

Item 3. Interest of Certain Persons in or Opposition to Matters to be acted upon

None of the following persons have any substantial interest, direct or indirect, in any matter to be acted upon other than election to office:

1. Directors or officers of the Corporation at any time since the beginning of the last fiscal year;
2. Nominees for election as directors of the Corporation;
3. Associate of any of the foregoing persons.

B. CONTROL AND COMPENSATION INFORMATION

Item 4. Voting Securities and Principal Holders Thereof

(a) Voting securities entitled to be voted at the meeting:

The Corporation has 2,204,161,868 outstanding shares as of March 31, 2019. Every stockholder shall be entitled to one vote for each share of stock held as of the established record date.

(b) Record date:

All stockholders of record as of April 24, 2019 are entitled to notice and to vote at the Corporation's Annual Meeting of Stockholders.

Section 10, Article II of the By-Laws of the Corporation states that, for purposes of determining the stockholders entitled to notice of, or to vote or be voted at any meeting of stockholders or any adjournments thereof, or entitled to receive payment of any dividends or other distribution or allotment of any rights, or for the purpose of any other lawful action, or for making any other proper determination of stockholders, the Board of Directors may provide that the stock and transfer books be closed for a stated period, which shall not be more than sixty (60) days nor less than thirty (30) days before the date of such meeting. In lieu of closing the stock and transfer books, the Board of Directors may fix in advance a date as the record date for any such determination of stockholders. A determination of stockholders of record entitled to notice of or to vote or be voted at a meeting of stockholders shall apply to any adjournment of the meeting; *provided, however*, that the Board of Directors may fix a new record date for the adjourned meeting.

(c) Election of Directors:

The directors of the Corporation shall be elected by plurality vote at the annual meeting of the stockholders for that year at which a quorum is present. At each election for directors every stockholder shall have the right to vote, in person or by proxy, the number of shares owned by him for as many persons as there are directors to be elected, or to cumulate his votes by giving one candidate as many votes as the number of such directors multiplied by the number of his shares shall equal, or by distributing such votes as the same principle among any number of candidates.

The report attached to this SEC Form 20-IS is the management report to stockholders required under SRC Rule 20 to accompany the SEC Form 20-IS and is hereinafter referred to as the "Management Report".

(d) Security Ownership of Certain Record and Beneficial Owners and Management

1. Security Ownership of Certain Record and Beneficial Owners of more than 5% of the Corporation's voting securities as of March 31, 2019

Title of Class	Names and addresses of record owners and relationship with the Corporation	Name of beneficial owner and relationship with record owner	Citizenship	Number of Shares Held	% to Total Outstanding
Common	JG Summit Holdings, Inc. 43/F Robinsons Equitable Tower, ADB Avenue corner Poveda Street, Ortigas Center, Pasig City (stockholder)	Same as record owner (See note 1)	Filipino	1,215,223,061	55.13%
Common	PCD Nominee Corporation (Non-Filipino) G/F Makati Stock Exchange Bldg. 6767 Ayala Ave., Makati City (stockholder)	PDTC Participants and their clients (See note 2)	Non-Filipino	707,901,458 (See note 3)	32.12%
Common	PCD Nominee Corporation (Filipino) G/F Makati Stock Exchange Bldg. 6767 Ayala Ave., Makati City (stockholder)	PDTC Participants and their clients (See note 2)	Filipino	246,284,848 (See note 3)	11.17%

Notes:

- The Chairman and the President are both empowered under the By-Laws of JG Summit Holdings, Inc. (“JGSHI”) to vote any and all shares owned by JGSHI, except as otherwise directed by the Board of Directors. The incumbent Chairman and Chief Executive Officer of JGSHI are Mr. James L. Go and Mr. Lance Y. Gokongwei, respectively.
- PCD Nominee Corporation is the registered owner of the shares in the books of the Corporation’s transfer agent. PCD Nominee Corporation is a corporation wholly-owned by Philippine Depository and Trust Corporation, Inc. (formerly the Philippine Central Depository) (“PDTC”), whose sole purpose is to act as nominee and legal title holder of all shares of stock lodged in the PDTC. PDTC is a private corporation organized to establish a central depository in the Philippines and introduce scripless or book-entry trading in the Philippines. Under the current system of the PDTC, only participants (brokers and custodians) are recognized by PDTC as the beneficial owners of the lodged shares. Each beneficial owner of shares through his participant is the beneficial owner to the extent of the number of shares held by such participant in the records of the PCD Nominee.
- Out of the PCD Nominee Corporation account, “The Hongkong and Shanghai Banking Corp. Ltd. -Clients’ Acct.” and “Deutsche Bank Manila-Clients A/C” hold for various trust accounts the following shares of the Corporation as of March 31, 2019:

	<u>No. of shares</u>	<u>% to Outstanding</u>
The Hongkong and Shanghai Banking Corp. Ltd. -Clients’ Acct.	379,785,423	18.16%
Deutsche Bank Manila-Clients A/C	234,538,285	10.64%

Voting instructions may be provided by the beneficial owners of the shares.

	Sub-Total		99,939		*
All directors and executive officers as a group unnamed			3,079,343		0.14%

Notes:

- As defined under Part IV (B) (1) (b) of Annex “C” of SRC Rule 12, the “named executive officers” to be listed refer to the Chief Executive Officer and those that are the four (4) most highly compensated executive officers as of March 31, 2019.
 - Sum of shares in the name of “John Gokongwei, Jr.” for one (1) share and “Elizabeth Y. Gokongwei and/or John Gokongwei, Jr.” for 2,479,400.
- * less than 0.01%

3. Shares owned by foreigners

The total number of shares owned by foreigners as of March 31, 2019 is 730,573,885 common shares.

4. Voting Trust Holders of 5% or more - as of March 31, 2019

There are no persons holding more than 5% of a class under a voting trust or similar agreement.

5. Changes in Control

There has been no change in the control of the Corporation since the beginning of its last fiscal year.

Information as of March 31, 2019 on “Security Ownership of Certain Record and Beneficial Owners and Management” is found on Item 12, pages 34 to 35 of the Management Report.

Item 5: Directors and Executive Officers

(a) Directors and Corporate Officers

Information required hereunder is incorporated by reference to the section entitled “Directors and Executive Officers of the Registrant” on Item 10, pages 26 to 32 of the Management Report.

(b) Board Nomination and Election Policy

The Corporate Governance Committee shall oversee the process for the nomination and election of the Board of Directors.

The Corporate Governance Committee shall pre-screen and shortlist all candidates nominated to become members of the Board of Directors in accordance with the list of qualifications and disqualifications as defined in the Corporation's Revised Corporate Governance Manual with due consideration of the requirements of the Revised Corporation Code, the Securities Regulation Code ("SRC"), the Code of Corporate Governance and relevant SEC Circulars such as the SEC Memorandum Circular No. 16, Series of 2002, the SEC Memorandum Circular No. 19, Series of 2016, as may be amended, relating to the Board of Directors.

The list of the nominees for directors as determined by the Corporate Governance Committee shall be final and no other nomination shall be entertained or allowed after the final list of nominees is prepared.

The members of the Corporate Governance Committee of the Corporation are the following:

1. John L. Gokongwei, Jr.
2. James L. Go (Chairman)
3. Lance Y. Gokongwei
4. Johnson Robert G. Go, Jr.
5. Wilfrido E. Sanchez

The following individuals have been nominated for election as directors, including independent directors, at the Annual Meeting of Stockholders on May 29, 2019:

1. John L. Gokongwei, Jr.
2. James L. Go
3. Lance Y. Gokongwei
4. Patrick Henry C. Go
5. Johnson Robert G. Go, Jr.
6. Robert G. Coyiuto, Jr.
7. Irwin C. Lee
8. Wilfrido E. Sanchez (Independent)
9. Cesar V. Purisima (Independent)

(c) Independent Directors

The Corporation has adopted the provisions of SRC Rule 38 on the nomination and election of independent directors and the Amended By-Laws of the Corporation substantially state the requirements on the nomination and election of independent directors set forth in SRC Rule 38.

Presented below is the Final List of Candidates for Independent Directors:

1. **Wilfrido E. Sanchez** has been an independent director of URC since 1995. He is a Tax Counsel in Quiason Makalintal Barot Torres Ibarra Sison & Damaso Law Firm. He also previously served on the boards of a number of government institutions, including as a member of the Monetary Board of the Bangko Sentral ng Pilipinas, Governor of the World Bank Group for the Philippines, Governor of the Asian Development Bank for the Philippines, Alternate Governor of the International Monetary Fund for the Philippines and Chairman of the Land Bank of the Philippines. He was conferred the Chevalier dans l'Ordre national de la Légion d'Honneur (Knight of the National Order of the Legion of Honour) by the President of the French Republic in 2017, the Order of Lakandula, Rank of Grand Cross (Bayani) by the President of the Philippines in 2016 and the Chevalier de l'Ordre national du Mérite (Knight of the National Order of Merit) by the President of the French Republic in 2001. He is a certified public accountant. He has extensive experience in public accounting both in the Philippines and abroad. He was Chairman and Managing Partner of SyCip Gorres Velayo & Co. (a member firm of Andersen Worldwide until 2002 and became member firm of Ernst & Young Global Limited) from 1999 until 2004. During the period, He was also the Asia-Pacific Area Managing Partner for Assurance and Business Advisory Services of Andersen Worldwide from 2001 to 2002 and Regional Managing Partner for the ASEAN Practice of Andersen Worldwide from 2000 to 2001. He obtained his Bachelor of Science in Commerce (Majors in Accounting & Management of Financial Institutions) degree from De La Salle University (Manila) in 1979, Master of Management degree from J.L. Kellogg Graduate School of Management, Northwestern University in 1983 and Doctor of Humanities honoris causa degree from Angeles University Foundation of the Philippines in 2012.

In accordance with SEC Memorandum Circular No. 5, Series of 2017, the Certifications of Independent Directors executed by the aforementioned candidates for independent directors of the Corporation are attached hereto as Annex "A" (Wilfrido E. Sanchez) and Annex "B" (Cesar V. Purisima).

The nominees for Independent Directors were nominated by JG Summit Holdings, Inc., the controlling shareholder of the Corporation owning 55.13% of the Corporation's total outstanding capital stock as of March 31, 2019. JG Summit Holdings, Inc. has no relationship with Mr. Wilfrido E. Sanchez and Mr. Cesar V. Purisima, the nominees for independent directors of the Corporation.

(d) Significant Employees

There are no persons who are not executive officers of the Corporation who are expected by the Corporation to make a significant contribution to the business.

(e) Family Relationships

1. Mr. James L. Go is the brother of Mr. John L. Gokongwei, Jr.
2. Mr. Lance Y. Gokongwei is the son of Mr. John L. Gokongwei, Jr.
3. Mr. Patrick Henry C. Go is the nephew of Mr. John L. Gokongwei, Jr.
4. Mr. Johnson Robert G. Go, Jr. is the nephew of Mr. John L. Gokongwei, Jr.

5. Mr. Vincent Henry C. Go is the nephew of Mr. John L. Gokongwei, Jr.
6. Ms. Anne Patricia C. Go is the niece of Mr. John L. Gokongwei, Jr.

(f) Involvement in Certain Legal Proceedings of Directors and Executive Officers

To the best of the Corporation’s knowledge and belief and after due inquiry, and except as otherwise disclosed, none of the Corporation’s directors, nominees for election as director or executive officer in the past five (5) years up to the date of this report:

1. have had any petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within a two year period of that time;
2. have been convicted by final judgment in a criminal proceeding, domestic or foreign, or have been subjected to a pending judicial proceeding of a criminal nature, domestic or foreign, excluding traffic violations and other minor offenses;
3. have been subjected to any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, domestic or foreign, permanently or temporarily enjoining, barring, suspending or otherwise limiting their involvement in any type of business, securities, commodities or banking activities; or
4. been found by a domestic or foreign court of competent jurisdiction (in a civil action), the Philippine Securities and Exchange Commission or comparable foreign body, or a domestic or foreign exchange or other organized trading market or self-regulatory organization, to have violated a securities or commodities law or regulation and the judgment has not been reversed, suspended, or vacated.

(g) Certain Relationships and Related Party Transactions

1. Related Party Transactions with its Major Stockholder, Subsidiaries, and Joint Venture Companies

The Corporation, in the regular conduct of its business, had engaged in transactions with its major stockholder, JG Summit Holdings Inc., its subsidiaries, and joint venture companies. See Note 34 (Related Party Transactions) of the Notes to the Consolidated Financial Statements as of December 31, 2018 on pages 153 to 157 of the Management Report.

Information on the parent of the Corporation, the basis of control, and the percentage of voting securities owned as of March 31, 2019:

<u>Parent Company</u>	<u>Number of Shares Held</u>	<u>% Held</u>
JG Summit Holdings, Inc.	1,215,223,061	55.13%

2. Directors’ Disclosures on Self-Dealing and Related Party Transactions

No transaction, without proper disclosure, was undertaken by the Corporation in which any director, executive officer, or any nominee for election as director was involved or had a direct or indirect material interest.

Directors, officers and employees of the Corporation are required to promptly disclose any business or family-related transactions with the Corporation to ensure that potential conflicts of interest are surfaced and brought to the attention of management.

(h) Appraisals and Performance Report for the Board

The attendance of the directors at the meetings of the Board of Directors held in 2018 is as follows:

Directors	No. of Meetings Attended/Held	Attendance Percentage
John L. Gokongwei, Jr.	4/4	100%
James L. Gokongwei	4/4	100%
Lance Y. Gokongwei	4/4	100%
Irwin C. Lee	4/4	100%
Patrick Henry C. Go	4/4	100%
Johnson Robert G. Go, Jr.	4/4	100%
Robert G. Coyiuto, Jr.	4/4	100%
Wilfrido E. Sanchez	4/4	100%
Cesar V. Purisima	4/4	100%

The Board has established committees to assist in exercising its authority in monitoring the performance of the Corporation in accordance with its Revised Corporate Governance Manual, Code of Business Conduct and related SEC Circulars. The Corporate Governance Committee of the Corporation oversees the performance evaluation of the Board and its committees and management.

¹ Includes per diem of directors

(b) Compensation of Directors

1. Standard Arrangements

Other than payment of reasonable per diem, there are no standard arrangements pursuant to which directors of the Corporation are compensated, or are to be compensated, directly or indirectly, for any services provided as a director for the last completed fiscal year and the ensuing year.

2. Other Arrangements

There are no other arrangements pursuant to which any director of the Corporation was compensated, or is to be compensated, directly or indirectly, during the Corporation's last completed fiscal year, and the ensuing year, for any service provided as a director.

(c) Employment Contracts and Termination of Employment and Change-in-Control Arrangement

There are no special employment contracts between the Corporation and the named executive officers.

There are no compensatory plans or arrangement with respect to a named executive officer.

(d) Warrants and Options Outstanding

There are no outstanding warrants or options held by the Corporation's Chief Executive Officer, the named executive officers, and all officers and directors as a group.

Item 7. Independent Public Accountants

The Corporation's independent public accountant is the accounting firm of SyCip, Gorres, Velayo & Co. The same accounting firm will be nominated for reappointment for the current fiscal year at the annual meeting of stockholders. The representatives of the principal accountant have always been present at prior years' meetings and are expected to be present at the current year's annual meeting of stockholders. They may also make a statement and respond to appropriate questions with respect to matters for which their services were engaged.

The current handling partner of SGV & Co. has been engaged by the Corporation as of the fiscal year 2015 and is expected to be rotated every five (5) years in accordance with SRC Rule 68, as amended.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

The incumbent members of the Audit Committee of the Corporation are as follows:

1. James L. Go
2. Lance Y. Gokongwei
3. Johnson Robert G. Go, Jr.
4. Irwin C. Lee
5. Wilfrido E. Sanchez (Chairman)
6. Cesar V. Purisima

The incumbent members of the Board Risk Oversight Committee of the Corporation are as follows:

1. James L. Go
2. Lance Y. Gokongwei (Chairman)
3. Johnson Robert G. Go, Jr.
4. Irwin C. Lee
5. Cesar V. Purisima

Item 8. None.

C. ISSUANCE AND EXCHANGE OF SECURITIES

Items 9 - 14. None.

D. OTHER MATTERS

Item 15. Action with respect to reports

The following are included in the agenda of the Annual Meeting of Stockholders for the approval of the stockholders:

1. Proof of notice of the meeting and existence of a quorum.
2. Reading and approval of the Minutes of the Annual Meeting of the Stockholders held on May 30, 2018.
3. Presentation of annual report and approval of the financial statements for the preceding year.
4. Election of Board of Directors.
5. Appointment of External Auditor.
6. Ratification of the acts of the Board of Directors and its committees, officers and management.
7. Consideration of such other matters as may properly come during the meeting.
8. Adjournment.

The matters approved and recorded in the Minutes of the Annual Meeting of the Stockholders last May 30, 2018 are as follows:

- (a) Reading and approval of the Minutes of the Annual Meeting of Stockholders held on June 28, 2017;
- (b) Presentation of annual report and approval of financial statements for the preceding year;
- (c) Election of Board of Directors;
- (d) Election of External Auditor; and
- (e) Ratification of all acts of the Board of Directors, Executive Committee and other committees of the Board of Directors, officers and management since the last annual meeting.

The Annual Meeting of the Stockholders was held on May 30, 2018 and was attended by shareholders, the Board of Directors, and by various officers of the Corporation. The shareholders were allowed to cast their votes on each agenda item presented to them for approval, with the number of votes approving each agenda item indicated in their respective sections in the Minutes. The shareholders were also given the opportunity to ask questions, express opinion, and make suggestions on various issues related to the Corporation. The Minutes of the Annual Meeting of the Stockholders held on May 30, 2018 may be viewed and/or downloaded at <http://www2.urc.com.ph/uploads/downloads/2018/11/522fc32c85116c8afec245d349c38d1c.pdf>.

Brief description of material matters approved by the Board of Directors and Management and disclosed to the SEC and PSE since the last Annual Meeting of Stockholders on May 30, 2018 for ratification by the stockholders:

<u>Date of Board Approval</u>	<u>Description</u>
May 30, 2018	Results of the Organizational Meeting of the Board of Directors.
February 28, 2019	Declaration of the following cash dividends from the unrestricted retained earnings of the Corporation as of December 31, 2018, with details as follows: (1) Regular cash dividend in the amount of P1.50 per share to all stockholders of record as of March 14, 2019 and

Date of Board Approval

Description

	payable on March 28, 2019 and (2) Special cash dividend in the amount of P1.65 per share to all stockholders of record as of July 1, 2019 and payable on July 25, 2019.
April 5, 2019	Setting April 24, 2019 as the record date for the annual meeting of the stockholders to be held on May 29, 2019.

Items 16 - 18. None.

Item 19. Voting Procedures

(a) The vote required for approval or election:

Pursuant to Article II, Section 6 of the By-Laws of the Corporation, a majority of the subscribed and outstanding capital, present in person or represented by proxy, shall be sufficient in a stockholders' meeting to constitute a quorum for the election of directors and for the transaction of any business whatsoever, except in those cases in which the Revised Corporation Code requires the affirmative vote of a greater proportion.

The vote of the stockholders representing a majority of a quorum shall be required to approve any action submitted to the stockholders for approval, except in those cases where the Revised Corporation Code requires the affirmative vote of a greater proportion.

Unless otherwise prescribed by the Revised Corporation Code or by special law, and for legitimate purposes, any provision or matter stated in the articles of incorporation may be amended by a majority vote of the board of directors and the vote or written assent of the stockholders representing at least two-thirds (2/3) of the outstanding capital stock, without prejudice to the appraisal right of dissenting stockholders in accordance with the provisions of the Revised Corporation Code.

(b) The method by which votes will be counted:

In accordance with Article II, Section 7 of the By-Laws, every stockholder shall be entitled to vote, in person or by proxy, for each share of stock held by him, which has voting power upon the matter in question. The votes for the election of directors, and except upon demand by any stockholder, the votes upon any question before the meeting, except with respect to procedural questions determined by the Chairman of the Meeting, shall be by *viva voce* or show of hands.

Article II, Section 9 of the By-Laws also provides that stockholders may vote at all meetings the number of shares registered in their respective names, either in person or by proxy, duly given in writing and duly presented to and received by the Secretary for inspection and recording not later than five (5) working days before the time set for the meeting, except such period shall be reduced to one (1) working day for meetings that are adjourned due to lack of the necessary quorum. No proxy bearing a signature which is not legally acknowledged by the Secretary shall be honored at the meetings. Proxies shall be valid and effective for five (5) years, unless the proxy provides for a shorter period, and shall be suspended for any meeting wherein the stockholder appears in person.

Article II, Section 8 of the By-Laws also provides that the directors of the Corporation shall be elected by plurality vote at the annual meeting of the stockholders for the year at which a quorum is present. At each election for directors, every stockholder shall have the right to vote, in person or by

proxy, the number of shares owned by him for as many persons as there are directors to be elected, or to cumulate his votes by giving one candidate as many votes as the number of such directors multiplied by the number of his shares shall equal, or by distributing such votes as the same principle among as many number of candidates.

Pursuant to Article IV, Section 9 of the By-Laws, the Secretary shall record all the votes and proceedings of the stockholders and of the directors in a book kept for that purpose.

Market Price for the Corporation’s Common Equity and Related Stockholder Matters

The information on market prices, holders, dividends and other related stockholder matters as of March 31, 2019 are incorporated by reference to pages 11 to 12 of the Management Report.

Discussion on compliance with leading practices on corporate governance

The Corporation adheres to the principles and practices of good corporate governance, as embodied in its Corporate Governance Manual, Code of Business Conduct and related SEC Circulars.

On May 12, 2017, the Board of Directors approved the revisions made to the Corporate Governance Manual of the Corporation in accordance with SEC Memorandum Circular No. 19, Series of 2016. The Revised Corporate Governance Manual was filed with the Securities and Exchange Commission on May 31, 2017. Continuous improvement and monitoring of governance and management policies have been undertaken to ensure that the Corporation observes good governance and management practices. This is to assure the shareholders that the Corporation conducts its business with the highest level of integrity, transparency and accountability.

SEC Memorandum Circular No. 15, Series of 2017 mandates all listed companies to submit an Integrated Annual Corporate Governance Report (“I-ACGR”) on May 30 of the following year for every year that the company remains listed in the PSE.

PSE Memorandum Circular CN No. 2017-0079 provides that the I-ACGR effectively supersedes the SEC’s Annual Corporate Governance Report and the PSE’s Corporate Governance Disclosure Report.

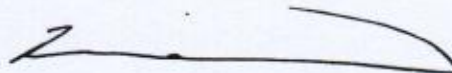

The Corporation likewise consistently strives to raise its financial reporting standards by adopting and implementing prescribed Philippine Financial Reporting Standards.

UNIVERSAL ROBINA CORPORATION, AS REGISTRANT, WILL PROVIDE WITHOUT CHARGE, UPON WRITTEN REQUEST, A COPY OF THE REGISTRANT'S ANNUAL REPORT ON SEC FORM 17-A. SUCH WRITTEN REQUESTS SHOULD BE DIRECTED TO THE OFFICE OF THE CORPORATE SECRETARY, 40/F ROBINSONS EQUITABLE TOWER, ADB AVENUE CORNER POVEDA ST., ORTIGAS CENTER, PASIG CITY, METRO MANILA, PHILIPPINES.

SIGNATURE PAGE

After reasonable inquiry and to the best of my knowledge and belief, I certify that the information set forth in this report is true, complete and correct. This report is signed in the City of Pasig on May 6, 2019.

UNIVERSAL ROBINA CORPORATION

The Motion for Reconsideration filed by the Complainants were denied in an Order dated 12 February 2018.

UPDATED INFORMATION

The case of *Dr. Jaime Cruz vs. Teodoro Arceñas, et al.*, docketed as NPS Docket No. XI-02-INV-17-F-1581, has already been dismissed by the Office of the City Prosecutor, Davao City in a Resolution dated 23 February 2018.

The case of *Lourdes M. Aclan, et al. v. Benigno Simeon C. Aquino, et al.*, docketed as OMB-C-C-16-0414, has also been dismissed by the Office of the Ombudsman in its Resolution dated 26 April 2017. The Motion for Reconsideration filed by the Complainants were denied in an Order dated 12 February 2018.

In the case of *Atty. Reinier Paul R. Yebra, et al. v. Joseph Emilio Aguinaldo Abaya, et al.*, docketed as OMB-C-C-17-0420 and OMB-C-C-17-0447, I was impleaded in the abovementioned case in my capacity as former Secretary of Finance and member of the Government Procurement Policy Board (GPPB). Thus, according to complainants, I, together with the other respondents, should be charged under the Anti-Plunder and Anti-Graft and Corrupt Practices Acts due to the alleged graft in the award of the Metro Rail Transit Line 3 (MRT-3) maintenance contracts to favored contractors.

The complaint against me is without basis since the solitary allegation as to my participation in the conspiracy is my supposed assent to resolution of the GPPB allowing the Department of Transportation and Communications (now Department of Transportation) to resort to negotiated procurement regarding the maintenance contract, which is not true. I did not participate in the discussions regarding the same and I most certainly did not affix my signature in the said resolution. As a matter of fact, in the complaint, the complainants may have deliberately failed to attach a copy of the said resolution since my signature therein is noticeably absent.

Furthermore, under the law, the GPPB can only approve the mode of procurement of a government agency, the Board does not have the authority to approve the contracts of the agency itself. Thus, the Board did not and could not have any participation in the negotiation and awarding of the contracts subject of the complaint.

In addition, records would show that the approval of the negotiated procurement was justified due to the emergency situation existing at the time, and that the same went through the mandated process before the resort to the alternative mode of procurement was approved.

In a Resolution dated 08 May 2018, the Office of the Ombudsman dismissed the cases against me. Complainants filed a Motion for Reconsideration dated 18 July 2018 which is still pending resolution by the Office of the Ombudsman.

6. I shall faithfully and diligently comply with my duties and responsibilities as independent director under the Securities Regulation Code and its implementing Rules and Regulations, Code of Corporate Governance and other SEC Issuances.
7. I shall inform the Corporate Secretary of Universal Robina Corporation of any changes in the abovementioned information within five days from its occurrence.

Done, this _____, at _____.

PART I - BUSINESS AND GENERAL INFORMATION

Item 1. Business

Universal Robina Corporation (URC or the Company) is one of the largest branded food product companies in the Philippines, with the distinction of being called the country's first "Philippine Multinational". URC has established a strong presence in ASEAN and has further expanded its reach to the Oceania region. URC was founded in 1954 when Mr. John Gokongwei, Jr. established Universal Corn Products, Inc., a cornstarch manufacturing plant in Pasig. The Company is involved in a wide range of food-related businesses, including the manufacture and distribution of branded consumer foods, production of hogs and poultry, manufacture of animal feeds and veterinary products, flour milling, and sugar milling and refining. URC has also ventured in the renewables business for sustainability through Distillery and Cogeneration divisions. In the Philippines, URC is a dominant player with leading market shares in Snacks, Candies and Chocolates, and is a significant player in Biscuits. URC is also the largest player in the Ready-to-Drink (RTD) Tea market and Cup Noodles, and is a competitive 3rd player in the Coffee business. With six mills operating as of December 31, 2018, URC Sugar division remains to be the largest producer in the country based on capacity.

No material reclassifications, merger, consolidation, or purchase or sale of significant amount of assets (not ordinary) were made in the past three years (2016-2018) except those mentioned in the succeeding paragraphs. The Company's financial condition has remained solid in the said period.

The Company operates its food business through operating divisions and wholly-owned or majority-owned subsidiaries that are organized into three business segments: branded consumer foods, agro-industrial products and commodity food products.

Branded consumer foods (BCF) segment, including packaging division, is the Company's largest segment contributing about 80.2% of revenues for the year ended December 31, 2018. Established in the 1960s, the Company's branded consumer foods segment manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, packaged cakes, beverages and instant noodles. The manufacture, distribution, sales, and marketing activities of BCF group are carried out mainly through the Company's branded consumer foods division consisting of snack foods, beverage, and noodles, although the Company conducts some of its branded consumer foods operations through its majority-owned subsidiaries and joint venture companies. The Company established URC BOPP Packaging and URC Flexible Packaging divisions to engage in the manufacture of bi-axially oriented polypropylene (BOPP) films for packaging companies and flexible packaging materials to cater various URC branded products. Both manufacturing facilities are located in Simlong, Batangas and are ISO 9001:2008 certified for Quality Management Systems.

Majority of URC's consumer foods business is conducted in the Philippines but has expanded more aggressively into other ASEAN markets, primarily through its wholly-owned subsidiary, URC International. In 2014, URC has expanded its reach to the Oceania region through the acquisition of Griffin's Foods Limited, a leading snacks player in New Zealand, which owns many established brands such as Griffin's, Cookie Bear, Eta, Huntley & Palmer's, and Nice & Natural. In 2016, URC completed the acquisition of Consolidated Snacks Pty Ltd., which trades under Snacks Brand Australia (SBA), the second largest salty snacks player in Australia with a wide range of chips including the iconic brands like Kettle, Thins, CC's and Cheezels. The international operations contributed about 33.8% of the Company's revenues for the year ended December 31, 2018.

The Company's agro-industrial products segment operates four segments: (1) Robina Farm-Hogs, (2) Robina Farm-Poultry, (3) the manufacturing and distribution of animal feeds (URC Feeds), and (4) the production and distribution of animal health products (URC Veterinary Drugs). This segment contributed approximately 9.2% of sale of goods and services in 2018.

The Company's commodity food products segment operates three divisions: (1) sugar milling and refining through Sugar division, (2) flour milling and pasta manufacturing through Flour division, and (3) renewable energy development through Distillery and Cogeneration divisions. This segment contributed approximately 10.6% of aggregate sale of goods and services in 2018.

The Company is a core subsidiary of JG Summit Holdings, Inc. (JGSHI), one of the largest and most diversified conglomerates in the Philippines. JGSHI has substantial business interests in air transportation, property development and hotel management, banking and financial services, and petrochemicals (JG Summit owns the only naphtha cracker complex in the country). It also has non-controlling minority stakes in the country's leading telecommunications, power generation and electricity distribution companies, as well as in a leading Singapore property company.

The percentage contribution to the Company's revenues for each of the three periods ended December 31, 2016 (three months), December 31, 2017 (one year) and December 31, 2018 (one year) by each of the Company's principal business segments is as follows:

	December 31, 2016 (Three Months)	December 31, 2017 (One Year)	December 31, 2018 (One Year)
Branded Consumer Foods Group	83.1%	82.5%	80.2%
Agro-Industrial Group	7.7%	8.1%	9.2%
Commodity Foods Group	9.2%	9.4%	10.6%
	100.00%	100.00%	100.00%

The geographic percentage distribution of the Company's revenues for each of the three periods December 31, 2016 (three months), December 31, 2017 (one year) and December 31, 2018 (one year) is as follows:

	December 31, 2016 (Three Months)	December 31, 2017 (One Year)	December 31, 2018 (One Year)
Philippines	65.8%	65.7%	66.2%
International	34.2%	34.3%	33.8%
	100.00%	100.00%	100.00%

Customers

None of the Company's businesses is dependent upon a single customer or a few customers that a loss of anyone of them would have a material adverse effect on the Company. The Company has no single customer that, based upon existing orders, will account for 20.0% or more of the Company's total sale of goods and services.

Distribution, Sales and Marketing

The Company has developed an effective nationwide distribution chain and sales network that it believes provide its competitive advantage. The Company sells its branded food products primarily to supermarkets, as well as directly to top wholesalers, large convenience stores, large scale trading companies and regional distributors, which in turn sell its products to other small retailers and down line markets. The Company's branded consumer food products are distributed to approximately 120,000 outlets in the Philippines and sold through its direct sales force and regional distributors. URC intends to enlarge its distribution network coverage in the Philippines by increasing the number of retail outlets that its sales force and distributors directly service.

The branded consumer food products are generally sold by the Company from salesmen to wholesalers or supermarkets, and regional distributors to small retail outlets. 15 to 30-day credit terms are extended to wholesalers, supermarkets and regional distributors.

The Company believes that its emphasis on marketing, product innovation and quality, and strong brand equity has played a key role in its success in achieving leading market shares in the different categories where it competes. In particular, URC launched “Jack ‘n Jill” as a master umbrella brand for all its snack food products in order to enhance customer recognition. URC devotes significant expenditures to support advertising and branding to differentiate its products and further expand market share both in the Philippines and in its overseas markets, including funding for advertising campaigns such as television commercials and radio and print advertisements, as well as trade and consumer promotions.

For URC agro-industrial group (AIG), both piggery and poultry farms have been accredited as GAHP (Good Animal Husbandry Practice), 100% compliant to Good Manufacturing Practices (GMP) and its meats and eggs have been certified as No Hormone, and Antibiotic residue free. This has allowed AIG to aggressively capture the quality conscious meat segment of the country as embodied by the Robina Farms brand with its key positioning of Robina raised, Family safe products. Similarly, the Feeds business headed by their brand champions such as Uno+, Supremo Gamefowl, and Top Breed Dog meals increased its distribution network supported by the Kabalikat Farm Program covering Hog and Gamefowl raisers.

Competition

The BCF business is highly competitive and competition varies by country and product category. The Company believes that the principal competitive factors include price, taste, quality, convenience, brand recognition and awareness, advertising and marketing, availability of products and ability to get its product widely distributed. Generally, the Company faces competition from both local and multinational companies in all of its markets. In the Philippines, major competitors in the market segments in which it competes include Liwayway Marketing Corporation, Monde M.Y. San Corporation, Columbia Foods International, Republic Biscuit Corporation, Suncrest Foods Inc., Del Monte Phil. Inc., Monde Nissin Corporation, Nestle Philippines Inc., San Miguel Pure Foods Company Inc. and Kraft Foods Inc. Internationally, major competitors include Procter & Gamble, Effem Foods/Mars Inc., Lotte Group, Perfetti Van Melle Group, Mayora Inda PT, Apollo Food, Frito-Lay, Nestlé S.A., PepsiCo, Inc., Cadbury Schweppes PLC and Kraft Foods International.

URC AIG has four major segments namely: Commercial Feeds, Commercial Drugs, Robina Farm-Hogs, and Robina Farm-Poultry. The market for AIG is highly fragmented, very competitive, cyclical and principally domestic. The Company is focused and known in providing Total Agri-Solution and farm management expertise including state of the art diagnostic capability.

The Company’s commercial feeds segment principal competitive factors are quality, brand equity, credit term and price. It faces competition from local, multinational companies, and even foreign companies in all of its markets. Since the business is highly fragmented, it also faces increasing speed of change in the market particularly customer preferences and lifestyle. The Company’s principal competitors are San Miguel Corporation (B-Meg and Integra), UNAHCO (Sarimanok, Thunderbird, GMP and Pigrolac), and Aboitiz Inc. (Pilmico). The market for commercial drugs is composed of both local and multinational companies. Furthermore, URC AIG is one of the only few Philippine companies in this market. The Company’s principal competitors are UNAHCO (Univet), Novartis, and Excellence Poultry and Livestock Specialist.

The Company believes that the principal competitive factors for hogs are quality, reliability of supply, price, and proximity to market. The Company’s principal competitors are San Miguel Corp. (Monterey), Aboitiz Inc. (Pilmico) and Foremost Farms, Inc. The Company considers quality, price, egg productivity, and disease resistance as the principal competitive factors of its poultry business. The Company’s principal competitors are Bounty Farms, Inc., Foremost Farms, Inc., Brookdale Farms, and Heritage Vet Corp. for layer chicks.

Enhancement and Development of New Products

The Company intends to continuously introduce innovative new products, product variants and line extensions in the snackfoods (snacks, biscuits, candies, chocolates and bakery), beverage, and grocery (instant noodles and tomato-based) products. This year alone, the Company's Branded Consumer Foods Philippines has introduced 22 new products, which contributed 1.61% to its total sales.

The Company supports the rapid growth of the business through line expansion, construction and acquisition of plants.

Raw Materials

A wide variety of raw materials are required in the manufacture of the Company's food products, including corn, wheat, flour, sugar, robusta coffee beans, palm oil and cocoa powder. Some of which are purchased domestically and some of which are imported. The Company also obtains a major portion of its raw materials from its commodity food products segments, such as flour and sugar, and flexible packaging materials from its packaging segment. A portion of flexible packaging material requirements is also purchased both locally and from abroad (Vietnam and Indonesia), while aseptic packaging is purchased entirely from China.

For its feeds segment, the Company requires a variety of raw materials, including corn grains, soya beans and meals, feed-wheat grains, wheat bran, wheat pollard, soya seeds, rice bran, copra meal and fish meal. The Company purchases corn locally from corn traders and imports feed-wheat from suppliers in North America, Europe and China. Likewise, soya seeds are imported by the Company from the USA. For its animal health products, the Company requires a variety of antibiotics and vitamins, which it acquires from suppliers in Europe and Asia. The Company maintains approximately two months physical inventory and one month in-transit inventory for its imported raw materials.

For its hogs business, the Company requires a variety of raw materials, primarily close-herd breeding stocks. For its poultry business, the Company purchases the parent stock for its layer chicks from Dekalb from Europe. Robina Farms obtains all of the feeds it requires from its Commercial Feeds segment and substantially all of the minerals and antibiotics from its Commercial Drugs division as part of its vertical integration. The Company purchases vaccines, medications and nutritional products from a variety of suppliers based on the values of their products.

The Company obtains sugar cane from local farmers. Competition for sugar cane supply is very intense and is a critical success factor for its sugar business. Additional material requirements for the sugar cane milling process are either purchased locally or imported.

The Company generally purchases wheat, the principal raw material for its flour milling and pasta business, from suppliers in the United States, Canada and Australia.

The Company's policy is to maintain a number of suppliers for its raw and packaging materials to ensure a steady supply of quality materials at competitive prices. However, the prices paid for raw materials generally reflect external factors such as weather conditions, commodity market fluctuations, currency fluctuations and the effects of government agricultural programs. The Company believes that alternative sources of supply of the raw materials that it uses are readily available. The Company's policy is to maintain approximately 30 to 90 days of inventory.

Patents, Trademarks, Licenses, Franchises, Concessions or Labor Contract

The Company owns a substantial number of trademarks registered with the Bureau of Trademarks subject to the provisions of RA 8293 also known as the Intellectual Property Code of the Philippines (IP Code) and recorded with the Intellectual Property Office of the Philippines (IPPHL). In addition, certain trademarks have been strategically registered in other countries in which it operates. These trademarks are important in the aggregate because brand name recognition is a key factor in the success of many of the Company's product lines. Trademark registration is a means to protect these brand names from counterfeiting and infringement.

Trademarks registered under RA 166, also known as the Trademark Law, are registered for twenty (20) years. Upon renewal, these trademarks become subject to the IP Code having a registration period of ten (10) years and renewable thereafter. In general, trademarks in other countries have a ten-year registration which are renewable as well, allowing relatively a lifetime of territorial and limited trademark registration.

The Company also uses brand names under licenses from third parties. These licensing arrangements are generally renewable based on mutual agreement. The Company's licensed brands include Nissin Cup Noodles, Nissin Yakisoba Instant Noodles and Nissin Pasta Express, Vitasoy, Calbee and B'lue, among others.

Licensing Agreements are voluntarily registered with the Documentation, Information and Technology Transfer Bureau of the IPPHL.

Regulatory Overview

As manufacturer of consumer food and commodity food products, the Company is required to guarantee that the products are pure and safe for human consumption, and that the Company conforms to standards and quality measures prescribed by the Bureau of Food and Drugs (BFAD).

The Company's sugar mills are licensed to operate by the Sugar Regulatory Administration (SRA) and renew its sugar milling licenses at the start of every crop year. The Company is also registered with the Department of Energy as a manufacturer of bio-ethanol and as a renewable energy developer.

All of the Company's livestock and feed products have been registered with and approved by the Bureau of Animal Industry, an agency of the Department of Agriculture which prescribes standards, conducts quality control test of feed samples, and provides technical assistance to farmers and feed millers.

Some of the Company's projects, such as the sugar mill and refinery, bioethanol production, biomass power cogeneration and hog and poultry farm operations are registered with the Board of Investments (BOI) which allows the Company certain fiscal and non-fiscal incentives.

Effects of Existing or Probable Governmental Regulations on the Business

The Company operates its businesses in a highly regulated environment. These businesses depend upon licenses issued by government authorities or agencies for their operations. The suspension or revocation of such licenses could materially and adversely affect the operation of these businesses.

Research and Development

The Company develops new products and variants of existing product lines, researches new processes and tests new equipment on a regular basis in order to maintain and improve the quality of the Company's food products. In Philippine operations alone, about P,=52 million was spent for research and development activities in 2018 and approximately P,=91 million and P,=32 million in 2017 and in three-month period ended December 31, 2016, respectively.

The Company has research and development staff for its branded consumer foods and packaging divisions located in its research and development facility in Metro Manila and in each of its manufacturing facilities. In addition, the Company hires experts from all over the world to assist its research and development staff. The Company conducts extensive research and development for new products, line extensions for existing products and for improved production, quality control and packaging as well as customizing products to meet the local needs and tastes in the international markets. The Company's commodity foods segment also utilizes this research and development facility to improve their production and quality control. The Company also strives to capitalize on its existing joint ventures to effect technology transfers.

The Company has a dedicated research and development team for its agro-industrial business that continually explores advancements in feeds, breeding and farming technology. The Company regularly conducts market research and farm-test for all of its products. As a policy, no commercial product is released if it was not tested and used in Robina Farms.

Transactions with Related Parties

The largest shareholder, JG Summit Holdings, Inc. (JG Summit or JGSHI), is one of the largest and most diversified conglomerates listed on the Philippine Stock Exchange. JG Summit provides the Company with certain corporate center services including finance, strategy and development, government affairs, governance and management systems, internal audit, procurement, human resources, general counsel, information technology, digital transformation office, and advertising and public relations. JG Summit also provides the Company with valuable market expertise in the Philippines as well as intra-group synergies. See Note 34 to Consolidated Financial Statements for Related Party Transactions.

Costs and Effects of Compliance with Environmental Laws

The operations of the Company are subject to various laws and regulations enacted for the protection of the environment, including Philippine Clean Water Act (R.A. No. 9275), Clean Air Act (R.A. No. 8749), Ecological Solid Waste Management Act (R.A. No. 9003), Toxic Substances and Hazardous and Nuclear Wastes Control Act (R.A. No. 6969), Pollution Control Law (R.A. No. 3931, as amended by P.D. 984), the Environmental Impact Statement System (P.D. 1586), the Laguna Lake Development Authority (LLDA) Act of 1966 (R.A. No. 4850), Renewable Energy Act (R.A. No. 9513), Electric Power Industry Reform Act (R.A. No. 9136) and Environmental Compliance Certificates (ECCs) requirements of P.D. No. 1586, in accordance with DENR Administrative Order No. 2003-30. The Company believes that it has complied with all applicable environmental laws and regulations, an example of which is the installation of wastewater treatment systems in its various facilities. Compliance with such laws does not have, and in the Company's opinion, is not expected to have, a material effect upon the Company's capital expenditures, earnings or competitive position. As of December 31, 2018, the Company has invested about P.=227 million in wastewater treatment in its facilities in the Philippines.

Employees and Labor

As of December 31, 2018, the number of permanent full-time employees engaged in the Company's respective businesses is 14,239 and are deployed as follows:

Business	Company or Division	Number
Branded consumer foods	BCF, Packaging Division, CCPI, URCI, URCCCL, NURC, HURC, CURC and DURBI	10,277
Agro-industrial products	Robina Farms, UCP & Robichem	1,272
Commodity food products:		
Sugar	Sugar	1,021
Flour & pasta	Flour	384
Bio-ethanol & renewable energy	Distillery and Cogeneration	488
Corporate		797
		<u>14,239</u>

For most of the companies and operating divisions, collective bargaining agreements between the relevant representatives of the employees' union and the subsidiary or divisions are in effect. The collective bargaining agreements generally cover a five-year term with a right to renegotiate the economic provisions of the agreement after three years, and contain provisions for annual salary increases, health and insurance benefits, and closed-shop arrangements. The collective bargaining agreements are with 26 different unions. For the year 2018, 7 collective bargaining agreements were signed and concluded with the labor unions which are as follows: URC BCFG Rosario & Bagong Ilog (Consolidated Workers Union (CWU)), URC Indonesia (Federation of Indonesia Metal Workers Union (FSPMI)), URC SURE Balayan R&F (URC SURE Balayan Labor Union Chapter - NACUSIP), URC BCFG ESMO (United Labor Union of URC ESMO Plant), URC BCFG Pampanga (Cebu Industrial Management Corporation Employees Union – Workers' Solidarity Network (CIMCEU-WSN)), URC BCFG Canlubang (URC Canlubang Plant Employees Union – Organized Labor Organization in Line Industries and Agriculture (CPEU-OLALIA)) and URC BCFG MCD (MCD Monthly Independent Union (MIU)). The Company believes that good labor relations generally exist throughout the Company's subsidiaries and operating divisions.

The Company has a funded, noncontributory defined benefit retirement plan covering all of the regular employees of URC. The plan provides retirement, separation, disability and death benefits to its members. The Company, however, reserves the right to change the rate and amounts of its contribution at any time on account of business necessity or adverse economic conditions. The funds of the plan are administered and managed by the trustees. Retirement cost charged to operations, including net interest cost, amounted to P,=185 million, P,=176 million and P,=48 million in 2018, 2017 and three-month period ended December 31, 2016, respectively.

Risks

The major business risks facing the Company and its subsidiaries are as follows:

1) Competition

The Company and its subsidiaries face competition in all segments of its businesses both in the Philippine market and in international markets where it operates. The Philippine food industry in general is highly competitive. Although the degree of competition and principal competitive factors vary among the different food industry segments in which the Company participates, the Company believes that the principal competitive factors include price, product quality, brand awareness and loyalty, distribution network, proximity of distribution outlets to customers, product variations and new product introductions. (See page 3, *Competition*, for more details)

The Company's ability to compete effectively is due to continuous efforts in sales and marketing of its existing products, development of new products and cost rationalization.

2) Financial Market

The Company has foreign exchange exposure primarily associated with fluctuations in the value of the Philippine Peso against the U.S. dollar and other foreign currencies. Majority of the Company's revenues is denominated in Pesos, while certain of its expenses, including debt services and raw material costs, are denominated in U.S. dollars or based on prices determined in U.S. dollars. In addition, the majority of the Company's debt is denominated in foreign currencies. Prudent fund management is employed to minimize effects of fluctuations in interest and currency rates.

3) Raw Materials

The Company's production operations depend upon obtaining adequate supplies of raw materials on a timely basis. In addition, its profitability depends in part on the prices of raw materials since a portion of the Company's raw material requirements is imported including packaging materials. To mitigate these risks, alternative sources of raw materials are used in the Company's operations. (See page 4, *Raw Materials*, for more details)

4) Food Safety Concerns

The Company's business could be adversely affected by the actual or alleged contamination or deterioration of certain of its flagship products, or of similar products produced by third parties. A risk of contamination or deterioration of its food products exists at each stage of the production cycle, including the purchase and delivery of food raw materials, the processing and packaging of food products, the stocking and delivery of the finished products to its customers, and the storage and display of finished products at the points of final sale. The Company conducts extensive research and development for new products, line extensions for existing products and for improved production, quality control and packaging as well as customizing products to meet the local needs and tastes in the international markets for its food business. For its agro-industrial business, its researchers are continually exploring advancements in breeding and farming technology. The Company regularly conducts market research and farm-test for all of its products. Moreover, the Company ensures that the products are safe for human consumption, and that the Company conforms to standards and quality measures prescribed by regulatory bodies such as BFAD, SRA, Bureau of Animal Industry, and Department of Agriculture.

5) Mortalities

The Company's agro-industrial business is subject to risks of outbreaks of various diseases. The Company faces the risk of outbreaks of foot and mouth disease, which is highly contagious and destructive to susceptible livestock such as hogs, and avian influenza or bird flu for its chicken farming business. These diseases and many other types could result to mortality losses. Disease control measures are adopted by the Company to minimize and manage this risk.

6) Intellectual Property Rights

Approximately 80.2% of the Company's sale of goods and services in 2018 were from its branded consumer foods segment. The Company has put considerable efforts to protect the portfolio of intellectual property rights, including trademark registrations. Security measures are continuously taken to protect its patents, licenses and proprietary formulae against infringement and misappropriation.

7) Weather and Catastrophe

Severe weather condition may have an impact on some aspects of the Company's business, such as its sugar cane milling operations due to reduced availability of sugar cane. Weather condition may also affect the Company's ability to obtain raw materials and the cost of those raw materials. Moreover, Philippines have experienced a number of major natural catastrophes over the years including typhoons, droughts, volcanic eruptions, and earthquakes. The Company and its subsidiaries continually maintain sufficient inventory level to neutralize any shortfall of raw materials from major suppliers whether local or imported.

8) Environmental Laws and Other Regulations

The Company is subject to numerous environmental laws and regulations relating to the protection of the environment and human health and safety, among others. The nature of the Company's operations will continue to subject it to increasingly stringent environmental laws and regulations that may increase the costs of operating its facilities above currently projected levels and may require future capital expenditures. The Company is continually complying with environmental laws and regulations, such as the wastewater treatment plants as required by the Department of Environment and Natural Resources, to lessen the effect of these risks.

The Company shall continue to adopt what it considers conservative financial and operational policies and controls to manage the various business risks it faces.

Item 2. Properties

The Company operates the manufacturing/farm facilities located in the following:

Location (Number of facilities)	Type of Facility	Owned/Rented	Condition
Pasig City (5)	Branded consumer food plants, feedmills and flourmill	Rented/Owned	Good
Libis, Quezon City (1)	Branded consumer food plant	Owned	Good
Cabuyao, Laguna (1)	Branded consumer food plant	Owned	Good
Luisita, Tarlac (1)	Branded consumer food plant	Rented/Owned	Good
San Fernando, Pampanga (1)	Branded consumer food plant	Rented/Owned	Good
Dasmariñas, Cavite (2)	Branded consumer food plants	Owned	Good
Cagayan de Oro (1)	Branded consumer food plant	Owned	Good
San Pedro, Laguna (2)	Branded consumer food plants	Owned	Good
Calamba, Laguna (1)	Branded consumer food plant	Rented/Owned	Good
San Pablo, Laguna (1)	Branded consumer food plant	Owned	Good
Binan, Laguna (1)	Branded consumer food plant	Owned	Good
Antipolo, Rizal (4)	Poultry and piggery farms and slaughterhouse	Rented/Owned	Good
Taytay, Rizal (1)	Poultry farm	Rented/Owned	Good
Naic, Cavite (1)	Poultry farm	Owned	Good
San Miguel, Bulacan (2)	Piggery and poultry farms	Owned	Good
Bustos, Bulacan (1)	Piggery farm	Owned	Good
Pandi, Bulacan (1)	Piggery farm	Rented/Owned	Good
Novaliches, Quezon City (1)	Piggery farm	Owned	Good
Rosario, Batangas (1)	Piggery farm	Owned	Good
Magalang, Pampanga (1)	Piggery farm	Rented/Owned	Good
Davao City, Davao (1)	Flourmill	Owned	Good
Tabok City, Cebu (1)	Branded consumer food plant	Owned	Good
San Fernando, Cebu (1)	Branded consumer food plant	Owned	Good
Mandaue City, Cebu (1)	Feedmill	Owned	Good
Bais, Negros Oriental (1)	Distillery plant	Owned	Good
Manjuyod, Negros Oriental (1)	Sugar mill	Owned	Good
Piat, Cagayan (1)	Sugar mill	Owned	Good
Kabankalan, Negros Occidental (2)	Sugar mill and cogeneration plant	Owned	Good
San Enrique, Iloilo City (1)	Sugar mill	Owned	Good
Santa Catalina, Negros Oriental (1)	Sugar mill	Owned	Good
Balayan, Batangas (1)	Sugar mill	Owned	Good
Simlong, Batangas (3)	BOPP plant/Flexible packaging	Owned	Good
Samutsakhorn Industrial Estate, Samutsakhorn, Thailand (6)	Branded consumer food plants	Owned	Good
Pasir Gudang, Johor, Malaysia (1)	Branded consumer food plant	Owned	Good
Jiangsu, China (1)	Branded consumer food plant	Owned	Good
Guangdong, China (1)	Branded consumer food plant	Owned	Good
Industrial Town, Bekasi, Indonesia (2)	Branded consumer food plants	Owned	Good
VSIP, Binh Duong Province, Vietnam (3)	Branded consumer food plants	Owned	Good
Thach That District, Ha Noi, Vietnam (1)	Branded consumer food plant	Owned	Good
Mingaladon, Yangon, Myanmar (1)	Branded consumer food plant	Rented/Owned	Good
Papakura, Auckland, New Zealand (1)	Branded consumer food plant	Owned	Good
Wiri, Auckland, New Zealand (1)	Branded consumer food plant	Owned	Good
Smithfield, Sydney, New South Wales, Australia (1)	Branded consumer food plant	Rented	Good
Blacktown, Sydney, New South Wales, Australia (1)	Branded consumer food plant	Rented	Good

The Company intends to continuously expand the production and distribution of the branded consumer food products internationally through the addition of manufacturing facilities located in geographically desirable areas, especially in the ASEAN countries, the realignment of the production to take advantage of markets

that are more efficient for production and sourcing of raw materials, and increased focus and support for exports to other markets from the manufacturing facilities. It also intends to enter into alliances with local raw material suppliers and distributors. Annual lease payment for rented properties amounted to P,=287 million in 2018.

Item 3. Legal Proceedings

The Company is subject to lawsuits and legal actions in the ordinary course of its business. The Company or any of its subsidiaries is not a party to, and its properties are not the subject of, any material pending legal proceedings that could be expected to have a material adverse effect on the Company's financial position or results of operations.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the fourth quarter of the year covered by this report.

PART II - OPERATIONAL AND FINANCIAL INFORMATION

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters

Market Information

The principal market for URC's common equity is the Philippine Stock Exchange. Sales prices of the common stock follow:

	High	Low
Calendar Year 2018		
January to March 2018	P,=174.00	P,=140.00
April to June 2018	152.00	111.30
July to September 2018	153.40	119.00
October to December 2018	148.00	121.20
Calendar Year 2017		
January to March 2017	P,=176.10	P,=157.10
April to June 2017	185.30	157.50
July to September 2017	165.40	135.20
October to December 2017	155.00	131.00
Three Month Period		
October to December 2016	P,=186.00	P,=150.00

As of May 6, 2019, the latest trading date prior to the completion of this annual report, sales price of the common stock is at P,=163.00.

The number of shareholders of record as of March 31, 2019 was approximately 1,012. Common shares outstanding as of March 31, 2019 were 2,204,161,868.

Calendar Year 2018 Compared to Calendar Year 2017

URC generated a consolidated sale of goods and services of P,=127.770 billion for the year ended December 31, 2018, a 2.2% sales growth over last year. Excluding PFRS 15 impact, net sales grew by 3.6%. Sale of goods and services performance by business segment follows:

- Sale of goods and services in URC’s branded consumer foods segment (BCFG), excluding packaging division, slightly decreased by P,=806 million or 0.8% to P,=101.014 billion in 2018 from P,=101.820 billion registered in 2017. BCFG domestic operations’ net sales declined from P,=58.950 billion in 2017 to P,=57.811 billion in 2018, due to lower volumes and unfavorable mix in the coffee category, that slowed down the sustained growth performance in snacks and noodles, and recovery of RTD beverages.

BCFG international sales increased by P,=333 million to P,=43.203 billion in 2018 against P,=42.870 billion in 2017 driven by continuous recovery in Vietnam and sustained momentum in Australia. Vietnam is still on track on its path to recovery as sales continue to grow from its drive to recover numeric distribution, as well as from additional sales from new products such as milk tea. Australia maintained its growth attributed to very strong sales of both branded and private labels.

Sale of goods and services of BCFG, excluding packaging division, accounted for 79.1% of total URC consolidated sale of goods and services for 2018.

Sale of goods and services in URC’s packaging division increased by 19.4% to P,=1.524 billion in 2018 from P,=1.276 billion recorded in 2017.

- Sale of goods and services in URC’s agro-industrial segment (AIG) amounted to P,=11.693 billion in 2018, a 15.7% increase from P,=10.111 billion recorded in 2017. Feeds business grew by 27.6% due to higher sales volume and improved selling prices across all feed categories. Farms business also grew by 2.2% due to favorable sales mix and better average selling prices of hogs, slightly offset by lower sales of poultry products due to decline in production of day-old pullets.
- Sale of goods and services in URC’s commodity foods segment (CFG) amounted to P,=13.539 billion in 2018 or up by 14.7% from P,=11.801 billion reported in 2017. Sugar and renewables businesses grew by 15.8% and 12.3%, respectively, on the account of higher volume and selling prices of raw sugar and molasses. Flour business also posted higher sales by 14.5% due to higher volume.

URC’s cost of sales consists primarily of raw and packaging materials costs, manufacturing costs and direct labor costs. Cost of sales increased by P,=4.639 billion, or 5.4%, to P,=90.332 billion in 2018 from P,=85.693 billion recorded in 2017 due to higher sales and higher costs of commodities and other raw and packaging materials.

URC’s gross profit for 2018 amounted to P,=37.437 billion, down by P,=1.877 billion or 4.8% from P,=39.314 billion reported in 2017. Gross profit margin decreased by 215 basis points from 31.4% in 2017 to 29.3% in 2018.

URC’s selling and distribution costs, and general and administrative expenses consist primarily of compensation benefits, advertising and promotion costs, freight and other selling expenses, depreciation,

repairs and maintenance expenses and other administrative expenses. Selling and distribution costs, and general and administrative expenses slightly declined by P,=306 million or 1.3% to P,=24.057 billion in 2018 from P,=24.362 billion registered in 2017 primarily due to decline in freight and delivery costs as a result of distribution restructuring in Myanmar and Cambodia.

As a result of the above factors, operating income decreased by P,=1.572 billion, or 10.5% to P,=13.381 billion in 2018 from P,=14.952 billion reported in 2017. URC's operating income by segment was as follows:

- Operating income in URC's branded consumer foods segment, excluding packaging division, decreased by P,=1.191 billion or 9.9% to P,=10.889 billion in 2018 from P,=12.081 billion in 2017. URC's domestic operations went down by 20.0% to P,=7.143 billion in 2018 from P,=8.927 billion in 2017 due to decline in sales volume and lower margins as a result of higher input costs, forex devaluation and unfavorable product mix driven by coffee category. International operations posted a P,=3.746 billion operating income, 18.8% higher than P,=3.154 billion posted in 2017. In constant US dollar terms, international operations posted an operating income of US\$71 million, a 14.1% increase from last year due to complete turnaround of Vietnam and consistent contribution of New Zealand, partially offset by lower operating income from other markets.

URC's packaging division reported an operating income of P,=29 million in 2018 from P,=48 million reported in 2017 due to lower margins coming from higher material cost, negating the impact of higher average selling prices, as well as due to higher repairs and maintenance costs.

- Operating income in URC's agro-industrial segment decreased by P,=962 million to P,=818 million in 2018 from P,=1.780 billion in 2017 as a result of the impact of avian flu coupled with higher cost of input materials in feeds and hogs, and higher operating expenses in farms.
- Operating income in URC's commodity foods segment increased by P,=622 million or 21.3% to P,=3.539 billion in 2018 from P,=2.917 billion in 2017. Flour business declined by 13.5% despite higher volumes due to lower margins as a result of higher wheat costs. Sugar business, on the other hand, grew by 31.8% due to higher average selling prices and volume while renewable energy business also grew by 57.0% from last year driven by higher sales.

URC's finance costs consist mainly of interest expense which increased by P,=234 million or 16.4%, to P,=1.662 billion in 2018 from P,=1.427 billion recorded in 2017 due to higher level of trust receipts payable and short-term debt, coupled with higher interest rates.

URC's finance revenue consists of interest income from investments in financial instruments, money market placements, savings and dollar deposits and dividend income from investment in equity securities. Finance revenue increased by P,=134 million to P,=359 million in 2018 from P,=226 million in 2017 due to higher level of financial assets during the year.

Equity in net losses of joint ventures decreased to P,=132 million in 2018 from the P,=281 million in 2017 due to lower net losses of domestic joint ventures coupled with the higher net income of Proper Snacks in New Zealand.

Net foreign exchange loss amounted to P,=175 million in 2018 from the P,=154 million gain reported in 2017 due to the combined effects of appreciation of international subsidiaries' local currencies against US dollar, particularly NZD, and depreciation of Philippine peso against US dollar.

Market valuation loss on financial instruments at fair value through profit or loss of P,=35 million reported in 2018 was lower than the P,=71 million gain reported in 2017 due to decrease in market values of equity investments.

Impairment losses increased to P,=45 million in 2018 from P,=21 million in 2017 due to this year's impairment of goodwill of Advanson.

Other income (expenses) - net consists of gain (loss) on sale of fixed assets, amortization of bond issue costs, rental income, and miscellaneous income and expenses. Other expense - net amounted to P,=146 million in 2018 while other income - net of P,=277 million was reported in 2017 due to last year's higher gain on sale of fixed assets.

URC recognized consolidated provision for income tax of P,=2.082 billion in 2018, a 25.6% decrease from P,=2.797 billion in 2017 due to lower taxable income and recognition of lower deferred tax liabilities.

URC's consolidated net income for 2018 amounted to P,=9.463 billion, lower by P,=1.690 billion or 15.2% from P,=11.153 billion in 2017 due to lower operating income, higher net finance costs and foreign exchange losses.

URC's core earnings before tax (operating profit after equity earnings, net finance costs and other expenses - net) in 2018 amounted to P,=11.799 billion, a decline of 13.6% from P,=13.656 billion recorded in 2017.

Net income attributable to equity holders of the parent decreased by P,=1.684 billion or 15.5% to P,=9.204 billion in 2018 from P,=10.888 billion in 2017 as a result of the factors discussed above.

Non-controlling interest (NCI) represents primarily the share in the net income (loss) attributable to non-controlling interest of Nissin-URC, URC's 51.0%-owned subsidiary. NCI in net income of subsidiaries decreased from P,=265 million in 2017 to P,=258 million in 2018.

URC reported an EBITDA (operating income plus depreciation and amortization) of P,=19.750 billion in 2018, 6.2% lower than P,=21.056 billion posted in 2017.

Calendar Year 2017 Compared to Calendar Year 2016

URC generated a consolidated sale of goods and services of P,=125.008 billion for the year ended December 31, 2017, an 11.0% sales growth over last year. Sale of goods and services performance by business segment follows:

- Sale of goods and services in URC's branded consumer foods segment (BCFG), excluding packaging division, increased by P,=9.684 billion or 10.5% to P,=101.820 billion in 2017 from P,=92.136 billion registered in 2016. BCFG domestic operations' net sales slightly declined from P,=59.188 billion in 2016 to P,=58.950 billion in 2017, which was mainly driven by the lower volume and unfavorable mix in the coffee category, that dragged down the sustained growth performance in snacks and recovery of RTD beverages.

BCFG international sales increased by 30.1% to P,=42.870 billion in 2017 against P,=32.948 billion in 2016. In constant US dollar (US\$) terms, sales improved by 21.2% to US\$851 million in 2017 against last year due to full year consolidation of SBA as well as growth from Thailand and Malaysia, partly offset by Vietnam's slower than expected recovery. Malaysia grew by 7.8% on the back of positive performances from snacks, wafer and chocolates while Thailand increased by 6.1% due to continuous growth with wafer and snack categories reaching their highest market shares to date. Vietnam's steady recovery was driven by renewed campaign of C2 brand plus growing snackfoods business.

Sale of goods and services of BCFG, excluding packaging division, accounted for 81.5% of total URC consolidated sale of goods and services in 2017.

Sale of goods and services in URC's packaging division increased by 16.4% to P,=1.276 billion in 2017 from P,=1.095 billion recorded in 2016.

- Sale of goods and services in URC's agro-industrial segment (AIG) amounted to P,=10.111 billion in 2017, a 9.9% increase from P,=9.201 billion recorded in 2016. Feeds business grew by 4.6% due to increase in volumes while farms business increased by 16.4% due to higher volumes and average selling prices of value added hogs.
- Sale of goods and services in URC's commodity foods segment (CFG) amounted to P,=11.801 billion in 2017 or up by 15.9% from P,=10.180 billion reported in 2016. Sugar and renewables businesses grew by 33.6% and 15.5%, respectively, on the account of higher volumes. On the other hand, flour business declined by 3.8% due to lower volume and average selling price.

URC's cost of sales consists primarily of raw and packaging materials costs, manufacturing costs and direct labor costs. Cost of sales increased by P,=9.289 billion, or 12.2%, to P,=85.693 billion in 2017 from P,=76.404 billion recorded in 2016 mainly coming from the effect of SBA full year consolidation.

URC's gross profit in 2017 amounted to P,=39.314 billion, up by P,=3.106 billion or 8.6% from P,=36.208 billion reported in 2016. Gross profit margin decreased by 70 basis points from 32.2% in 2016 to 31.5% in 2017.

URC's selling and distribution costs, and general and administrative expenses consist primarily of compensation benefits, advertising and promotion costs, freight and other selling expenses, depreciation, repairs and maintenance expenses and other administrative expenses. Selling and distribution costs, and general and administrative expenses rose by P,=3.914 billion or 19.1% to P,=24.362 billion in 2017 from P,=20.448 billion registered in 2016. This increase resulted primarily from the following factors:

- 23.5% or P,=1.004 billion increase in compensation and benefits to P,=5.279 billion in 2017 from P,=4.275 billion in 2016 due to SBA full year consolidation, increase in headcount and annual salary adjustments.
- 24.7% or P,=1.355 billion increase in freight and delivery charges to P,=6.846 billion in 2017 from P,=5.491 billion in 2016 due to SBA full year consolidation and increase in trucking and shipping costs as a result of increased volume.
- 10.3% or P,=713 million increase in advertising and promotion costs to P,=7.603 billion in 2017 from P,=6.890 billion in 2016 due to promotion programs with key accounts and wholesalers, and new product launches.
- 49.3% or P,=253 million increase in contracted services to P,=766 million in 2017 from P,=513 million in 2016 due to additional conso warehouses and increase in shared services charges.

As a result of the above factors, operating income decreased by P,=807 million, or 5.1% to P,=14.952 billion in 2017 from P,=15.760 billion reported in 2016. URC's operating income by segment was as follows:

- Operating income in URC's branded consumer foods segment, excluding packaging division, decreased by P,=1.010 billion or 7.7% to P,=12.081 billion in 2017 from P,=13.091 billion in 2016. URC's domestic operations went down by 14.9% to P,=8.927 billion in 2017 from P,=10.493 billion in 2016 due to decline in sales volume and lower margins as a result of higher input costs, forex devaluation and unfavorable product mix driven by coffee category. International operations posted a P,=3.154 billion operating income, 21.4% higher than P,=2.598 billion posted in 2016. In constant US dollar terms, international operations posted an operating income of US\$63 million, a 11.7% increase from last year due to SBA full year consolidation, offset by Vietnam's slower than expected recovery.

URC's packaging division reported an operating income of P,=48 million in 2017 from P,=65 million reported in 2016 due to lower margins.

- Operating income in URC's agro-industrial segment increased by P,=847 million to P,=1.780 billion in 2017 from P,=934 million in 2016 due to higher volumes coupled with favorable prices of hogs and lower raw materials costs of feeds.
- Operating income in URC's commodity foods segment decreased by P,=440 million or 13.1% to P,=2.917 billion in 2017 from P,=3.357 billion in 2016. Flour business declined by 13.9% due to lower selling prices and volume in addition to higher wheat costs. Sugar business dropped by 22.1% due to lower selling prices notwithstanding higher volumes and higher freight costs. Renewable energy business grew by 12.6% from last year driven by higher sales.

URC's finance costs consist mainly of interest expense which increased by P,=500 million or 54.0%, to P,=1.427 billion in 2017 from P,=927 million recorded in 2016 due to higher level of long-term debt, which was used to finance the acquisition of SBA.

URC's finance revenue consists of interest income from investments in financial instruments, money market placements, savings and dollar deposits and dividend income from investment in equity securities. Finance revenue increased by P,=43 million to P,=225 million in 2017 from P,=182 million in 2016 due to higher level of financial assets during the year.

Equity in net losses of joint ventures amounted to P,=281 million in 2017 as against P,=167 million in 2016 due to equity share in the net losses of newly created joint venture, Vitasoy-URC.

Net foreign exchange gain decreased to P,=154 million in 2017 from P,=1.309 billion reported in 2016 due to the combined effects of appreciation of international subsidiaries' local currencies against US dollar, particularly NZD, and depreciation of Philippine peso against US dollar.

Market valuation gain on financial instruments at fair value through profit or loss of P,=71 million reported in 2017 was lower than the P,=107 million in 2016 due to increase in market values of equity investments, offset by unfavorable fair value changes of derivative instruments.

Impairment losses decreased to P,=21 million in 2017 from P,=186 million in 2016 due to last year's higher inventory write-offs resulting from issues encountered in Vietnam.

Other income (expenses) - net consists of gain (loss) on sale of fixed assets, amortization of bond issue costs, rental income, and miscellaneous income and expenses. Other income-net increased to P,=277 million in 2017 from P,=221 million in 2016 due to higher gain on sale of fixed assets.

URC recognized consolidated provision for income tax of P,=2.797 billion in 2017, a 13.0% decrease from P,=3.216 billion in 2016 due to lower taxable income and utilization of deferred tax assets on realized foreign exchanges losses and tax credits.

URC's consolidated net income in 2017 amounted to P,=11.153 billion, lower by P,=1.930 billion or 14.8% from P,=13.083 billion in 2016, due to lower operating income, lower net foreign exchange gains and higher net finance costs.

URC's core earnings before tax (operating profit after equity earnings, net finance costs and other expenses - net) in 2017 amounted to P,=13.656 billion, a decline of 9.6% from P,=14.944 billion recorded in 2016.

Net income attributable to equity holders of the parent decreased by P,=1.984 billion or 15.4% to P,=10.888 billion in 2017 from P,=12.872 billion in 2016 as a result of the factors discussed above.

Non-controlling interest (NCI) represents primarily the share in the net income (loss) attributable to non-controlling interest of Nissin-URC, URC's 51.0%-owned subsidiary. NCI in net income of subsidiaries increased from P,=211 million in 2016 to P,=265 million in 2017.

URC reported an EBITDA (operating income plus depreciation and amortization) of P,=21.056 billion for in 2017, 1.6% lower than the P,=21.405 billion posted in 2016.

Fiscal Year 2016 Compared to Fiscal Year 2015

URC generated a consolidated sale of goods and services of P,=111.632 billion for the fiscal year ended September 30, 2016, a 2.4% sales growth over last year. Sale of goods and services performance by business segment follows:

- Sale of goods and services in URC's branded consumer foods segment (BCFG), excluding packaging division, increased by P,=643 million to P,=91.376 billion in 2016, slightly up from P,=90.733 billion registered in 2015. BCFG domestic operations posted an increase of 4.0% in net sales from P,=57.600 billion in 2015 to P,=59.923 billion in 2016, which was mainly driven by RTD beverages, chocolates and noodles with double-digit growths. Sales was muted due to decline in coffee category as a result of intense competition in the saturated coffee market. Snackfoods category was flattish due to the aggressive low-priced players affecting corn chips and pelletized snacks.

BCFG international sales decreased by 5.1% to P,=31.453 billion in 2016 against P,=33.133 billion in 2015. In constant US dollar (US\$) terms, sales declined by 4.8% to US\$670 million in 2016 against last year due to regulatory issues encountered in Vietnam despite the growth from Indonesia, Thailand and Malaysia. Indonesia was up by 25.3% driven by the growth in modern trade and sustained sales momentum from favorable results in all categories. Malaysia grew by 7.0% on the back of positive performances from chocolates and wafers while Thailand increased by 3.0% as consumer confidence has started to recover in the country. New Zealand was flat against last year but with improvements as Griffin's business have started stabilizing through improved pricing strategies and new product developments.

Sale of goods and services of BCFG, excluding packaging division, accounted for 81.9% of total URC consolidated sale of goods and services in 2016.

Sale of goods and services in URC's packaging division was flat at P,=1.139 billion in 2016 from P,=1.128 billion recorded in 2015.

- Sale of goods and services in URC's agro-industrial segment (AIG) amounted to P,=9.114 billion in 2016, a 2.0% increase from P,=8.931 billion recorded in 2015. Feeds business grew by 21.3% due to increase in sales volume as a result of aggressive sales and marketing strategies while farms business declined by 14.8% due to lower average selling price of live hogs.
- Sale of goods and services in URC's commodity foods segment (CFG) amounted to P,=10.003 billion in 2016 or up by 21.1% from P,=8.259 billion reported in 2015. Sugar business grew by 20.0% due to incremental sales from the recently acquired Balayan sugar mill and higher prices of raw and refined sugar. On the other hand, flour business declined by 2.3% despite higher volume due to lower average selling price. Sales contribution from renewable energy businesses amounted to P,=2.003 billion in 2016, compared to P,=824 million last year.

URC's cost of sales consists primarily of raw and packaging materials costs, manufacturing costs and direct labor costs. Cost of sales increased by P,=1.290 billion, or 1.7%, to P,=75.091 billion in 2016 from P,=73.801 billion recorded in 2015 due to increase in sales volume.

URC's gross profit in 2016 amounted to P,=36.541 billion, up by P,=1.291 billion or 3.7% from P,=35.250 billion reported in 2015. Gross profit margin increased by 41 basis points from 32.3% in 2015 to 32.7% in 2016.

URC's selling and distribution costs, and general and administrative expenses consist primarily of compensation benefits, advertising and promotion costs, freight and other selling expenses, depreciation, repairs and maintenance expenses and other administrative expenses. Selling and distribution costs, and general and administrative expenses rose by P,=1.854 billion or 10.4% to P,=19.730 billion in 2016 from P,=17.876 billion registered in 2015. This increase resulted primarily from the following factors:

- 17.5% or P,=603 million increase in compensation and benefits to P,=4.047 billion in 2016 from P,=3.444 billion in 2015 due to increase in headcount and annual salary adjustments.
- 9.1% or P,=576 million increase in advertising and promotion costs to P,=6.888 billion in 2016 from P,=6.312 billion in 2015 due to promotion programs with key accounts and wholesalers, and new product launches.
- 7.9% or P,=381 million increase in freight and delivery charges to P,=5.227 billion in 2016 from P,=4.846 billion in 2015 due to increase in trucking and shipping costs as a result of increased volume.
- 62.0% or P,=292 million increase in rent expense to P,=764 million in 2016 from P,=471 million in 2015 as a result of business expansion.

As a result of the above factors, operating income decreased by P,=563 million, or 3.2% to P,=16.811 billion in 2016 from P,=17.373 billion reported in 2015. URC's operating income by segment was as follows:

- Operating income in URC's branded consumer foods segment, excluding packaging division, decreased by P,=540 million or 3.7% to P,=13.975 billion in 2016 from P,=14.515 billion in 2015. URC's domestic operations went up by 3.1% to P,=11.003 billion in 2016 from P,=10.676 billion in 2015 due to growth in sales volume, net of slightly lower margins as a result of change in product mix and higher key input costs. International operations posted a P,=2.973 billion operating income, 22.6% lower than P,=3.839 billion posted in 2015. In constant US dollar terms, international operations posted an operating income of US\$63 million, a 23.1% drop from last year due to Vietnam issues, decline in New Zealand and losses from Indonesia and Myanmar as a result of brand building and distribution.

URC's packaging division reported an operating income of P,=75 million in 2016 from P,=30 million operating loss reported in 2015 due to improved sales mix and margins.

- Operating income in URC's agro-industrial segment decreased by P,=119 million to P,=1.051 billion in 2016 from P,=1.170 billion in 2015 due to lower prices and volumes of hogs, net of strong performance by feeds business.
- Operating income in URC's commodity foods segment increased by P,=201 million or 6.4% to P,=3.340 billion in 2016 from P,=3.139 billion in 2015, mainly coming from the additional contribution of renewable energy businesses. Flour business slightly increased by 1.7% due to better wheat prices while sugar business declined by 18.4% due to higher freight costs notwithstanding higher sales volume and price.

Market valuation gain on financial instruments at fair value through profit or loss of P,=855 million was reported in 2016 against the P,=215 million market valuation loss in 2015 due to fair value changes of derivative instruments and lower decline in market values of equity investments.

URC's finance revenue consists of interest income from investments in financial instruments, money market placements, savings and dollar deposits and dividend income from investment in equity securities. Finance revenue decreased by P,=64 million to P,=213 million in 2016 from P,=277 million in 2015 due to decline in level of financial assets.

URC's finance costs consist mainly of interest expense which decreased by P,=380 million or 29.8%, to P,=897 million in 2016 from P,=1.278 billion recorded in 2015 due to lower level of financial debt resulting from prepayment of a long-term debt.

Net foreign exchange gain amounted to P,=1.878 billion in 2016 from P,=265 million net foreign exchange loss reported in 2015 due to the combined effects of appreciation of international subsidiaries' local currencies against US dollar, particularly IDR and NZD, and depreciation of Philippine peso against US dollar.

Impairment losses increased to P,=181 million in 2016 from P,=110 million in 2015 due to higher inventory write-offs resulting from issues encountered in Vietnam.

Equity in net losses of joint ventures amounted to P,=234 million in 2016 as against P,=206 million in 2015 due to higher net losses of DURBI as a result of continuous brand building.

Other income (expenses) - net consists of gain (loss) on sale of fixed assets, amortization of bond issue costs, rental income, and miscellaneous income and expenses. Other income-net increased to P,=353 million in 2016 from P,=180 million in 2015 mainly coming from gain on sale of a property located in China.

URC recognized consolidated provision for income tax of P,=3.442 billion in 2016, a 5.8% increase from P,=3.252 billion in 2015 due to recognition of higher deferred tax liabilities, net of lower taxable income.

URC's consolidated net income in 2016 amounted to P,=15.356 billion, higher by P,=2.851 billion or 22.8% from P,=12.505 billion in 2015, due to market valuation gain on financial assets and net foreign exchange gains.

URC's core earnings before tax (operating profit after equity earnings, net finance costs and other expenses - net) in 2016 amounted to P,=15.904 billion, a decline of 2.7% from P,=16.346 billion recorded in 2015.

Net income attributable to equity holders of the parent increased by P,=2.757 billion or 22.3% to P,=15.140 billion in 2016 from P,=12.383 billion in 2015 as a result of the factors discussed above.

Non-controlling interest (NCI) represents primarily the share in the net income (loss) attributable to non-controlling interest of Nissin-URC, URC's 51.0%-owned subsidiary. NCI in net income of subsidiaries increased from P,=122 million in 2015 to P,=216 million in 2016.

URC reported an EBITDA (operating income plus depreciation and amortization) of P,=22.280 billion for 2016, slightly higher than P,=22.083 billion posted in 2015.

Financial Condition

URC's financial position remains healthy with strong cash levels. The Company has a current ratio of 1.70:1 as of December 31, 2018, lower than the 1.92:1 as of December 31, 2017. Financial debt to equity ratio of 0.48:1 as of December 31, 2018 is within comfortable level. The Company is in a net debt position of P,=26.445 billion this year against P,=23.391 billion last year.

Total assets amounted to P,=151.936 billion as of December 31, 2018, higher than P,=147.641 billion as of December 31, 2017. Book value per share increased to P,=38.02 as of December 31, 2018 from P,=36.93 as of December 31, 2017.

The Company's cash requirements have been sourced through cash flow from operations. The net cash flow provided by operating activities in 2018 amounted to P,=14.658 billion. Net cash used in investing activities amounted to P,=8.680 billion which were substantially used for fixed asset acquisitions. Net cash used in financing activities amounted to P,=7.452 billion due to dividend payment and net loan repayment.

The capital expenditures amounting to P,=8.642 billion include site development, building constructions and rehabilitation/upgrade of beverage and snacks facilities in the Philippines; improvements in packaging facility in Vietnam; new warehouse and improvements in biscuit, snacks and candy lines in Thailand; potato chips and kettle plant upgrade in New Zealand; various capacity upgrades and building management improvements in New Zealand and Australia; and construction of new factory building and conbar line in Malaysia.

The Company budgeted about P,=9.144 billion for capital expenditures (including maintenance capex) and investments for 2019, which substantially consists of the following:

- P,=7.309 billion for capacity expansions and improvement of information systems, handling, distribution, safety, quality control and operational efficiencies throughout the branded consumers foods group.
- P,=1.254 billion for commodity foods group for flourmill and pasta manufacturing, sugar business expansion, improvement and maintenance capital expenditures.
- P,=581 million for agro-industrial group maintenance capex, packaging business facilities improvement and machine rehabilitation.

No assurance can be given that the Company's capital expenditures plan will not change or that the amount of capital expenditures for any project or as a whole will not change in future years from current expectations.

As of December 31, 2018, the Company is not aware of any events that will trigger direct or contingent financial obligation that is material to the Company, including any default or acceleration of an obligation.

Financial Ratios

The following are the major financial ratios that the Group uses. Analyses are employed by comparisons and measurements based on the financial information of the current year against last year.

	December 31, 2018	December 31, 2017
Liquidity:		
Current ratio	1.70:1	1.92:1
Solvency:		
Gearing ratio	0.48:1	0.47:1
Debt to equity ratio	0.81	0.81:1
Asset to equity ratio	1.81	1.81:1
	Year 2018	Year 2017
Profitability:		
Operating margin	10.5%	12.0%
Earnings per share	4.18	4.94
Leverage:		
Interest rate coverage ratio	11.89	14.75

The Group calculates the ratios as follows:

Financial Ratios	Formula
Current ratio	$\frac{\text{Current assets}}{\text{Current liabilities}}$
Gearing ratio	$\frac{\text{Total financial debt (short-term debt, trust receipts payable and long-term debt including current portion)}}{\text{Total equity (equity holders + non-controlling interests)}}$
Debt to equity ratio	$\frac{\text{Total liabilities (current + noncurrent)}}{\text{Total equity (equity holders + non-controlling interests)}}$
Asset to equity ratio	$\frac{\text{Total assets (current + noncurrent)}}{\text{Total equity (equity holders + non-controlling interests)}}$
Operating margin	$\frac{\text{Operating Income}}{\text{Sale of goods and services}}$
Earnings per share	$\frac{\text{Net income attributable to equity holders of the parent}}{\text{Weighted average number of common shares}}$
Interest rate coverage ratio	$\frac{\text{Operating income plus depreciation and amortization}}{\text{Finance costs}}$

**Material Changes in the 2018 Financial Statements
(Increase/Decrease of 5% or more versus 2017)**

Income statements – Year ended December 31, 2018 versus Year ended December 31, 2017

5.4% increase in cost of sales

Due to higher input costs, including forex impact on imported raw materials

16.4% increase in finance costs

Due to higher level of trust receipts payable and short-term debt, coupled with higher interest rates

59.3% increase in finance revenue

Due to higher level of financial assets during the year

213.3% decrease in net foreign exchange gains (losses)

Due to the combined effects of appreciation of international subsidiaries' local currencies against US dollar, particularly NZ dollar, and depreciation of Philippine peso against US dollar

52.8% decrease in equity in net losses of joint ventures

Due to lower net losses of domestic joint ventures coupled with the higher net income of Proper Snacks in New Zealand

110.1% increase in impairment losses

Due to this year's impairment of goodwill of Advanson

149.9% decrease in market valuation gain (loss) on financial instruments at FVPL

Due to decrease in market values of equity investments

152.7% decrease in other income (loss) - net
Due to last year's higher gain on sale of fixed assets

25.6% decrease in provision for income tax
Due to lower taxable income and recognition of lower deferred tax liabilities

Statements of Financial Position – December 31, 2018 versus December 31, 2017

10.2% decrease in cash and cash equivalents
Due to capital expenditure and dividend payment, net of operating cash

7.8% decrease in financial assets at fair value through profit or loss
Due to decline in fair values of equity securities

10.6% decrease in receivables - net
Due to increase in trade receivables

19.6% increase in inventories
Due to increases in raw material and finished goods inventories

34.0% decrease in biological assets
Due to decline in headcount and market prices of hogs

25.0% increase in other current assets
Due to increases in input value-added tax and advances to suppliers

7.7%% increase in property, plant and equipment
Due to various plant expansion and improvement projects, net of depreciation

5.7% decrease in investment in joint ventures
Due to share in net losses of joint ventures and change in ownership of HURC and CURC from joint ventures to wholly-owned subsidiaries, partially offset by the additional investments during the year

12.5% increase in noncurrent assets
Due to increase in security deposits, net of lower deferred input taxes

5.5% increase in accounts payable and other accrued liabilities
Due to increase in trade payables

22.5% increase in short-term debt
Due to loan availments during the year to partially finance the dividend payment

90.8% increase in trust receipts payable
Due to increased utilization of trust receipt facilities

43.0% decrease in income tax payable
Due to lower income tax provision during the year

5.3% decrease in long-term debt
Due to partial repayment of the NZ loan and forex translation impact

38.5% decrease in other noncurrent liabilities
Due to decline in net pension liability

374.4% increase in other comprehensive income

Due to significant increase in cumulative translation adjustments

99.2% increase in treasury shares

Due to issuance of shares in relation to CCPI merger with and into the Parent Company, which were consequently classified as treasury shares

28.5% decrease in equity attributable to non-controlling interests

Due significantly to the dividends declared by Nissin-URC, net of equity share in net income

The Company's key performance indicators are employed across all businesses. Comparisons are then made against internal target and previous period's performance. The Company and its significant subsidiaries' top five (5) key performance indicators are as follows: (in million PhPs)

Universal Robina Corporation (Consolidated)			
	CY 2018	CY 2017	Index
Revenues	127,770	125,008	102
EBIT	13,381	14,952	89
EBITDA	19,750	21,056	94
Net Income	9,463	11,153	85
Total Assets	151,753	147,641	103

URC International Co., Ltd. (Consolidated)			
	CY 2018	CY 2017	Index
Revenues	42,203	42,871	98
EBIT	3,944	3,154	125
EBITDA	6,756	5,833	116
Net Income	1,046	1,855	56
Total Assets	89,899	87,739	102

Nissin-URC			
	CY 2018	CY 2017	Index
Revenues	5,815	5,103	114
EBIT	845	769	110
EBITDA	975	890	110
Net Income	603	559	108
Total Assets	2,583	2,686	96

Majority of the above key performance indicators were within targeted levels.

Item 7. Financial Statements

The consolidated financial statements and schedules listed in the accompanying Index to Financial Statements and Supplementary Schedules are filed as part of this Management Report.

The consolidated interim unaudited financial statements of the Corporation for the quarter ended March 31, 2019 as required by SRC Rule 20 and SRC Rule 68.1 are likewise filed as part of this Management Report.

Item 8. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9. Independent Public Accountants and Audit Related Fees*Independent Public Accountants*

The Company's independent public accountant is the accounting firm of SyCip Gorres Velayo & Co. The same accounting firm is tabled for reappointment for the current year at the annual meeting of stockholders. The representatives of the principal accountant have always been present at prior year's meetings and are expected to be present at the current year's annual meeting of stockholders. They may also make a statement and respond to appropriate questions with respect to matters for which their services were engaged.

The current handling partner of SGV & Co. has been engaged by the Company in 2018 and is expected to be rotated every five (5) years.

Audit-Related Fees

The following table sets out the aggregate fees billed for each of the last three years for professional services rendered by SyCip, Gorres, Velayo & Co.

	FY 2016	CY 2017	CY 2018
Audit and Audit-Related Fees	P,=9,740,000	P,=9,954,000	P,=11,206,000
Fees for services that are normally provided by the external auditor in connection with statutory and regulatory filings or engagements	none	none	1,100,000
Professional fees for due diligence review for bond/shares offering	none	none	none
Tax Fees	none	none	none
Other Fees	none	none	none
Total	P,=9,740,000	P,=9,954,000	P,=12,306,000

Audit Committee's Approval Policies and Procedures for the Services Rendered by the External Auditors

The Corporate Governance Manual of the Company provides that the Audit Committee shall, among others:

1. Evaluate all significant issues reported by the external auditors relating to the adequacy, efficiency, and effectiveness of policies, controls, processes and activities of the Company.
2. Ensure that other non-audit work provided by the external auditors is not in conflict with their functions as external auditors.
3. Ensure the compliance of the Company with acceptable auditing and accounting standards and regulations.

PART III - CONTROL AND COMPENSATION INFORMATION

Item 10. Directors and Executive Officers of the Registrant

Name	Age	Position	Citizenship
1. John L. Gokongwei, Jr	92	Director, Chairman Emeritus and Founder	Filipino
2. James L. Go	79	Director, Chairman Emeritus	Filipino
3. Lance Y. Gokongwei	52	Director, Chairman	Filipino
4. Irwin C. Lee	54	President and Chief Executive Officer	Filipino
5. Patrick Henry C. Go	48	Director, Vice President	Filipino
6. Johnson Robert G. Go, Jr	53	Director	Filipino
7. Robert G. Coyiuto, Jr	67	Director	Filipino
8. Wilfrido E. Sanchez	81	Director (Independent)	Filipino
9. Cesar V. Purisima	59	Director (Independent)	Filipino
10. Pascual S. Guerzon	81	Member of the Advisory Board	Filipino
11. Cornelio S. Mapa, Jr.	52	Executive Vice President	Filipino
12. Bach Johann M. Sebastian	57	Senior Vice President	Filipino
13. David J. Lim, Jr.	55	Senior Vice President	Filipino
14. Francisco M. Del Mundo	48	Senior Vice President and Chief Financial Officer	Filipino
15. Michael P. Liwanag	44	Senior Vice President	Filipino

23. Alan D. Surposa	55	Vice President	Filipino
24. Rosalinda F. Rivera	48	Corporate Secretary	Filipino
25. Socorro ML. Banting	64	Assistant Vice President	Filipino
26. Arlene S. Denzon	50	Compliance Officer	Filipino

All of the above directors and officers have served their respective offices since May 30, 2018. There are no directors who resigned or declined to stand for re-election to the board of directors since the date of the last annual meeting of stockholders for any reason whatsoever.

Messrs. Wilfrido E. Sanchez and Cesar V. Purisima are the independent directors of the Company.

A brief description of the directors and executive officers' business experience and other directorships held in other reporting companies are provided as follows:

John L. Gokongwei, Jr. founded URC in 1954 and has been the Chairman Emeritus and Founder of URC effective January 1, 2002. He continues to be a member of URC's Board and is the Chairman Emeritus and Founder of JGSHI and Robinsons Land Corporation. He is currently the Chairman of the Gokongwei Brothers Foundation, Inc., and a director of Cebu Air, Inc., Robinsons Retail Holdings, Inc. and Oriental Petroleum and Minerals Corporation. He was elected a director of Manila Electric Company on March 31, 2014. He is also a non-executive director of A. Soriano Corporation. Mr. Gokongwei received a Masters degree in Business Administration from the De La Salle University and attended the Advanced Management Program at Harvard Business School.

James L. Go is the Chairman Emeritus and a member of the Board of Directors of URC. He is the Chairman of JGSHI and Oriental Petroleum and Minerals Corporation. He is the Chairman Emeritus of Robinsons

Land Corporation, JG Summit Petrochemical Corporation, and JG Summit Olefins Corporation. He is the Vice Chairman of Robinsons Retail Holdings, Inc. and a director of Cebu Air, Inc., Marina Center Holdings Private Limited, United Industrial Corporation Limited and Hotel Marina City Private Limited. He is also the President and Trustee of the Gokongwei Brothers Foundation, Inc. He has been a director of the Philippine Long Distance Telephone Company (PLDT) since November 3, 2011. He is a member of the Technology Strategy Committee and Advisor of the Audit Committee of the Board of Directors of PLDT. He was elected a director of Manila Electric Company on December 16, 2013. Mr. Go received his Bachelor of Science Degree and Master of Science Degree in Chemical Engineering from Massachusetts Institute of Technology, USA. Mr. James L. Go is a brother of Mr. John L. Gokongwei, Jr. and joined URC in 1964.

Lance Y. Gokongwei is the Chairman of URC. He is the President and Chief Executive Officer of JGSHI. He is the Chairman of Robinsons Retail Holdings, Inc., Robinsons Land Corporation, JG Summit Petrochemical Corporation, JG Summit Olefins Corporation and Robinsons Bank Corporation. He is the President and Chief Executive Officer of Cebu Air, Inc. He is a director and Vice Chairman of Manila Electric Company and a director of Oriental Petroleum and Minerals Corporation and United Industrial Corporation Limited. He is also a trustee and secretary of the Gokongwei Brothers Foundation, Inc. He received a Bachelor of Science degree in Finance and a Bachelor of Science degree in Applied Science from the University of Pennsylvania. Mr. Lance Y. Gokongwei is the son of Mr. John L. Gokongwei, Jr. and joined URC in 1988.

Irwin C. Lee is the President and Chief Executive Officer of URC effective May 14, 2018. He concurrently handles the Branded Consumer Foods Group of URC. Prior to joining URC, he was the Chief Executive Officer of Rustan Supercenters, Inc. and a director of Rose Pharmacy under Jardine Matheson's Dairy Farm Group. He brings with him more than 32 years of work experience in fast-moving consumer foods and retail across Asia, Europe and the US. He started his career at Procter & Gamble (P&G) as a Finance Analyst and rose to key executive finance roles in various countries, including Chief Financial Officer roles in Indonesia, Japan/Korea and Greater China. In 2004, he was appointed Vice President for P&G Greater China with dual roles as Chief Marketing Officer and as General Manager for the laundry detergent business, which he drove to market leadership. In 2007, he was appointed Vice President/Managing Director for P&G UK and Ireland, where he delivered profitable growth through two recessions and led P&G's London 2012 Olympics program. In 2014, he rose to become P&G's Regional Head for Northern Europe, leading commercial operations across UK, Ireland, Sweden, Denmark, Norway and Finland, and integrating P&G's second largest international regional cluster. While in the UK, he spearheaded industry initiatives for connecting businesses to communities and enhancing employee engagement and well-being. After P&G, he served as Global Strategic Advisor for McKinsey and Co. to consumer and retail sector partners and engagement managers. He also sat as Board Director and Remuneration Committee Chairman for Wm Morrison Supermarkets Plc (one of UK's top 4 grocery retailers). Mr. Irwin Lee graduated with a Bachelor of Science Degree in Commerce Major in Accounting from the De La Salle University Manila, Summa Cum Laude. He finished third in the CPA Licensure Exams in 1985.

Patrick Henry C. Go is a director and a Vice President of URC. He also heads the URC Packaging (BOPP) Division and Flexible Packaging Division. He is the President and Chief Executive Officer of JG Summit Petrochemical Corporation and JG Summit Olefins Corporation. He is also a director of JGSHI, Robinsons Land Corporation, and Robinsons Bank Corporation. He is a trustee and treasurer of the Gokongwei Brothers Foundation, Inc. He received a Bachelor of Science degree in Management from the Ateneo de Manila University and attended the General Manager Program at Harvard Business School. Mr. Patrick Henry C. Go is a nephew of Mr. John L. Gokongwei, Jr.

Johnson Robert G. Go, Jr. has been a director of URC since May 5, 2005. He is also a director of JGSHI, Robinsons Land Corporation, and Robinsons Bank Corporation. He is also a trustee of the Gokongwei Brothers Foundation, Inc. He received his Bachelor of Arts degree in Interdisciplinary Studies (Liberal Arts) from the Ateneo de Manila University. He is a nephew of Mr. John L. Gokongwei, Jr.

Robert G. Coyiuto, Jr. has been a director of URC since 2002. He was appointed Presidential Adviser on Capital Market Development. He is the Chairman of the Board and Chief Executive Officer of Prudential Guarantee & Assurance, Inc. and of PGA Sampo Insurance Corporation. He is also Chairman of PGA Cars, Inc., Pioneer Tours Corporation and Coyiuto Foundation. He is the Chairman and President of Calaca High Power Corporation and Pacifica 21 Holdings, Inc. He is Vice Chairman and Director of National Grid Corporation of the Philippines and First Life Financial Co., Inc. He is also the President, Chief Operating Officer and Director of Oriental Petroleum and Minerals Corporation. He is a director of Petrogen Insurance Corporation, and Canon (Philippines) Inc. He is a member of the Philippine Stock Exchange.

Wilfrido E. Sanchez has been an independent director of URC since 1995. He is a Tax Counsel in Quiason Makalintal Barot Torres Ibarra Sison & Damaso Law Firm. He is also a trustee of the Gokongwei Brothers Foundation, Inc. Standard Arrangements

There are no standard arrangements pursuant to which directors of the Company are compensated, or are to be compensated, directly or indirectly, for any services provided as a director for the last completed year and the ensuing year.

Other Arrangements

There are no other arrangements pursuant to which directors of the Company are compensated, or are to be compensated, directly or indirectly, for any services provided as a director for the last completed year and the ensuing year.

Employment Contracts and Termination of Employment and Change-in-Control Arrangement

There are no special employment contracts between the Corporation and the named executive officers.

There are no compensatory plans or arrangements with respect to a named executive officer.

Warrants and Options Outstanding

There are no outstanding warrants or options held by the Corporation's Chief Executive Officer, the named executive officers and all officers and directors as a group.

Item 12. Security Ownership of Certain Beneficial Owners and Management

(1) Security Ownership of Certain Record and Beneficial Owners

As of March 31, 2019, URC knows no one who beneficially owns in excess of 5% of URC's common stock except as set forth in the table below.

Title of Class	Names and addresses of record owners and relationship with the Corporation	Name of beneficial owner and relationship with record owner	Citizenship	No. of Shares Held	% to Total Outstanding
Common	JGSHI 43/F Robinsons Equitable Tower, ADB Avenue corner Poveda Street, Ortigas Center, Pasig City (stockholder)	Same as record owner (See Note 1)	Filipino	1,215,223,061	55.13%
Common	PCD Nominee Corporation (Non-Filipino) G/F Makati Stock Exchange Bldg. 6767 Ayala Ave., Makati City (stockholder)	PCD Participants and their clients (See Note 2)	Non-Filipino	707,901,458 (See Note 3)	32.12%
Common	PCD Nominee Corporation (Filipino) G/F Makati Stock Exchange Bldg. 6767 Ayala Ave., Makati City (stockholder)	PCD Participants and their clients (See Note 2)	Filipino	246,284,848 (See Note 3)	11.17%

- The Chairman and the President are both empowered under the By-Laws of JGSHI to vote any and all shares owned by JGSHI, except as otherwise directed by the Board of Directors. The incumbent Chairman and Chief Executive Officer of JGSHI are Mr. James L. Go and Mr. Lance Y. Gokongwei, respectively.
- PCD Nominee Corporation is the registered owner of the shares in the books of the Corporation's transfer agent. PCD Nominee Corporation is a corporation wholly-owned by Philippine Depository and Trust Corporation, Inc. (formerly the Philippine Central Depository) ("PDTC"), whose sole purpose is to act as nominee and legal title holder of all shares of stock lodged in the PDTC. PDTC is a private corporation organized to establish a central depository in the Philippines and introduce scripless or book-entry trading in the Philippines. Under the current system of the PDTC, only participants (brokers and custodians) are recognized by PDTC as the beneficial owners of the lodged shares. Each beneficial owner of shares through his participant is the beneficial owner to the extent of the number of shares held by such participant in the records of the PCD Nominee.
- Out of the PCD Nominee Corporation account, "The Hongkong and Shanghai Banking Corp. Ltd. - Clients' Acct." and "Deutsche Bank Manila - Clients A/C" hold for various trust accounts the following shares of the Corporation as of March 31, 2019:

	No. of shares	% to Outstanding
The Hongkong and Shanghai Banking Corp. Ltd. - Clients' Acct	379,785,423	18.16%
Deutsche Bank Manila - Clients A/C	234,538,285	10.64%

Voting instructions may be provided by the beneficial owners of the shares.

(2) Security Ownership of Management

Title of Class	Name of beneficial Owner	Position	Amount & nature of beneficial ownership	Citizenship	% to Total Outstanding
Named Executive Officers ¹

(3) Voting Trust Holders of 5% or more

There are no persons holding more than 5% of a class under a voting trust or similar agreement.

**STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR CONSOLIDATED FINANCIAL STATEMENTS**

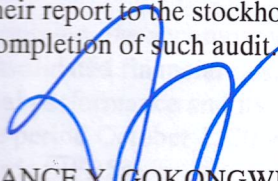

The management of Universal Robina Corporation and Subsidiaries (the Group) is responsible for the preparation and fair presentation of the consolidated financial statements, including the schedules attached therein, for the years ended December 31, 2018 and 2017 and three-month period ended December 31, 2016, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

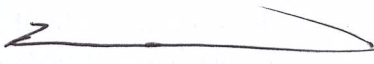

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative to do so.

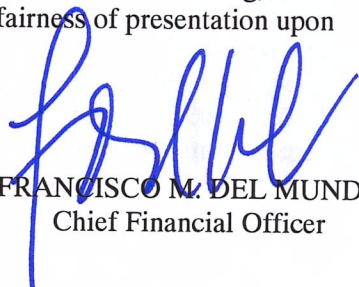

The Board of Directors is responsible for overseeing the Group's financial reporting process.

The Board of Directors reviews and approves the consolidated financial statements, including the schedules attached therein, and submits the same to the stockholders.

Sycip, Gorres, Velayo and Co., the independent auditors appointed by the stockholders, have audited the consolidated financial statements in accordance with Philippine Standards on Auditing, and in their report to the stockholders, have expressed their opinion on the fairness of presentation upon completion of such audit.

INDEPENDENT AUDITOR'S REPORT

The Stockholders and the Board of Directors
Universal Robina Corporation
8th Floor, Tera Tower, Bridgetowne
E. Rodriguez, Jr. Avenue (C5 Road)
Ugong Norte, Quezon City, Metro Manila

Opinion

We have audited the consolidated financial statements of Universal Robina Corporation and its subsidiaries (the Group), which comprise the consolidated statements of financial position as at December 31, 2018 and 2017, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years ended December 31, 2018 and 2017 and the period October 1, 2016 to December 31, 2016, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for the years ended December 31, 2018 and 2017 and the period October 1, 2016 to December 31, 2016 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

A key audit matter is one that, in our professional judgment, was of most significance in our audit of the consolidated financial statements of the current period. The matter below was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter. The description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Recoverability of Goodwill and Intangible Assets

As of December 31, 2018, the Group's goodwill attributable to the acquisition of Consolidated Snacks, Pty. Ltd., Griffin's Food Limited and other acquired entities amounted to ₱31.2 billion. The Group's intangible assets with indefinite useful lives pertaining to trademarks and product formulation amounted to ₱9.4 billion and ₱0.4 billion, respectively. These items are significant to the consolidated financial statements. Under PFRS, the Group is required to test annually the amount of goodwill and intangible assets with indefinite useful lives for impairment. Accordingly, management has performed an impairment test on its goodwill and other intangible assets with indefinite useful lives. In addition, management's assessment process requires significant judgment and is based on assumptions, specifically revenue growth rate, discount rate and the long-term growth rate.

The Group's disclosures about goodwill and intangible assets are included in Notes 3 and 15 to the consolidated financial statements.

Audit response

We reviewed the value in use calculation prepared by management. We involved our internal specialist in evaluating the methodologies and the assumptions used. These assumptions include revenue growth rate, discount rate and the long-term growth rate. We compared the key assumptions used, such as revenue growth rate against the historical performance of the cash generating unit (CGU), industry/market outlook and other relevant external data. We tested the parameters used in the determination of the discount rate against market data. We also reviewed the Group's disclosures about those assumptions to which the outcome of the impairment test is most sensitive, specifically those that have the most significant effect on the determination of the recoverable amount of goodwill and intangible assets with indefinite useful lives.

Adoption of PFRS 15, Revenue from Contracts with Customers

Effective January 1, 2018, the Group adopted the new revenue recognition standard, PFRS 15, *Revenue from Contracts with Customers*, under the modified retrospective approach. The adoption of PFRS 15 resulted in significant changes in the Group's revenue recognition policies, process, and procedures. The adoption of PFRS 15 is significant to our audit because this involves application of significant management judgment and estimation in the: (1) identification of the contract for sale of goods that would meet the requirements of PFRS 15; (2) assessment of performance obligation and the probability that the entity will collect the consideration from the buyer; (3) determining method to estimate variable consideration and assessing the constraint; and (4) recognition of revenue as the Group satisfies the performance obligation.

Refer to Notes 2 and 3 of the consolidated financial statements for the disclosure in relation to the adoption of PFRS 15.

Audit response

We obtained an understanding of the Group's process in implementing the new revenue recognition standard. We reviewed the PFRS 15 adoption papers and accounting policies prepared by management, including revenue streams identification and scoping, and contract analysis.

For significant revenue streams, we obtained sample contracts and reviewed whether the accounting policies appropriately considered the five-step model and cost requirements of PFRS 15.

In addition, we reviewed sample contracts and checked whether management has identified and estimated all components of the transaction price (variable consideration and consideration payable to a customer) and applied the constraint on variable consideration. We evaluated management's assumptions (historical trend of volume discounts and rights of return) by comparing the historical experience of the Group with the assumptions used in its estimates as it relates to variable consideration.

We also reviewed the application of the accounting policy in relation to the adoption of the new standard. We also reviewed the disclosures related to the transition adjustments based on the requirements of PFRS 15.

Estimation of fair value of biological assets

The Group's biological assets consist of hog and poultry livestock which are carried at fair value less cost to sell. The Group determines fair value based on the current market prices of livestock of similar age, breed and genetic merit. As of December 31, 2018, the Group has biological assets amounting to ₱1.11 billion, with fair value changes amounting to ₱0.47 billion in the same year. This matter is significant to our audit because the determination of fair value of biological assets involves significant estimation.

Refer to Notes 2 and 3 of the consolidated financial statements for the relevant accounting policy and a discussion of significant estimates, and Note 14 for the disclosure about the fair value of biological assets.

Audit response

We obtained an understanding of management's fair value measurement methodology and their process in valuing the biological assets. We tested the key assumptions used in the valuation, which include future growing costs, estimated volume of production and gross margin, by comparing them to both external data such as selling prices in the principal market and to historical information. We assessed the composition of costs to sell and tested the reasonableness of allocations. We also assessed the methodology used in estimating the fair value.

We also assessed the adequacy of the related disclosures on the assumptions underlying the measurement of these biological assets.

Other Information

Management is responsible for the other information. The other information comprises the SEC Form 17-A for the year ended December 31, 2018 (but does not include the consolidated financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report, and the SEC Form 20-IS (Definitive Information Statement) and Annual Report for the year ended December 31, 2018, which are expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

UNIVERSAL ROBINA CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information

Universal Robina Corporation (hereinafter referred to as “the Parent Company” or “URC”) was incorporated on September 28, 1954 and domiciled in the Republic of the Philippines, and is listed in the Philippine Stock Exchange. On October 28, 2002, the Parent Company’s corporate life was extended for another 50 years or until September 28, 2054. The registered office address of the Parent Company is at 8th Floor Tera Tower, Bridgetowne, E. Rodriguez, Jr. Avenue (C5 Road), Ugong Norte, Quezon City, Metro Manila.

The Parent Company is a majority owned subsidiary of JGSHI (“the Ultimate Parent Company” or “JGSHI”).

The Parent Company and its subsidiaries (hereinafter referred to as “the Group”) is one of the largest branded food products companies in the Philippines and has a strong presence in ASEAN markets. The Group is involved in a wide range of food-related businesses which are organized into three (3) business segments: (a) the branded consumer food segment which manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, packed cakes, beverages, instant noodles and pasta; (b) the agro-industrial segment which engages in hog and poultry farming, production and distribution of animal health products and manufacture and distribution of animal feeds, glucose and soya bean products; and (c) the commodity food segment which engages in sugar milling and refining, flour milling and pasta manufacturing and renewable energy development. The Parent Company also engages in the manufacture of bi-axially oriented polypropylene (BOPP) films for packaging companies and flexible packaging materials to cater various URC branded products. The Parent Company’s packaging business is included in the branded consumer food segment.

On April 29, 2016, the Board of Directors (BOD) approved the Parent Company’s change in accounting period from “Fiscal Year which begins on the first day of October and ends on the last day of September of the following year” to “Calendar Year which shall begin on the first day of January and end on the last day of December of the same year” to be implemented effective January 1, 2017. The Parent Company filed its amended by-laws with the Philippine Securities and Exchange Commission (SEC) in connection with the change in accounting period, which was approved by the Philippine SEC on June 20, 2016 (see Note 2). The Parent Company, likewise, filed the request for change in accounting period with the Bureau of Internal Revenue (BIR), which was approved by the BIR on December 5, 2016.

On January 15, 2016 and March 9, 2016, the BOD and the Stockholders of the Parent Company, respectively, approved the amendment to the Articles of Incorporation (AOI) of the Parent Company to change the principal office address of the Parent Company from 110 E. Rodriguez Avenue, Bagumbayan, Quezon City, Metro Manila to 8th Floor, Tera Tower, Bridgetowne, E. Rodriguez, Jr. Avenue (C5 Road), Ugong Norte, Quezon City, Metro Manila. On May 16, 2016, the Philippine SEC approved the amendment to the principal office address.

The operations of certain subsidiaries are registered with the Board of Investments (BOI) as preferred pioneer and nonpioneer activities. Under the terms of the registrations and subject to certain requirements, the Parent Company and certain subsidiaries are entitled to certain fiscal and non-fiscal incentives, including among others, an income tax holiday (ITH) for a period of three (3) years to seven (7) years from respective start dates of commercial operations (see Note 35).

The Group is also subject to certain regulations with respect to, among others, product composition, packaging, labeling, advertising and safety.

The principal activities of the Group are further described in Note 6.

2. Summary of Significant Accounting Policies

Basis of Preparation

The accompanying consolidated financial statements of the Group have been prepared on a historical cost basis, except for financial assets at fair value through profit or loss (FVTPL), available-for-sale (AFS) financial assets/financial assets at fair value through other comprehensive income (FVOCI) and derivative financial instruments that have been measured at fair value, inventories that have been measured at lower of cost and net realizable value (NRV) and biological assets and agricultural produce that have been measured at fair value less estimated costs to sell.

The consolidated financial statements of the Group are presented in Philippine Peso. The functional and presentation currency of the Parent Company and its Philippine subsidiaries is the Philippine Peso. All values are rounded to the nearest peso except when otherwise stated.

The functional currencies of the Group's consolidated foreign subsidiaries follow:

The consolidated financial statements as at December 31, 2016 and for the period October 1 to December 31, 2016 were prepared because of the change in the Group's accounting period (see Note 1).

The amounts presented for the period October 1 to December 31, 2016 in the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows and the related notes are for the three months, and accordingly, are not comparable to the calendar years ended December 31, 2018 and 2017.

Statement of Compliance

The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

Basis of Consolidation

The consolidated financial statements include the financial statements of the Parent Company and the following wholly and majority owned subsidiaries as of December 31, 2018 and 2017.

Subsidiaries	Place of Incorporation	Effective Percentages of Ownership	
		2018	2017
CFC Corporation	Philippines	100.00	100.00
Bio-Resource Power Generation Corporation and a Subsidiary (BRPGC)	- do -	100.00	100.00

URC Philippines, Ltd. (URCPL)	British Virgin Islands	100.00	100.00
URCICL and Subsidiaries**	- do -	100.00	100.00
Universal Robina (Cayman), Ltd. (URCL)	Cayman Islands	100.00	100.00
URCCCL	China	100.00	100.00

* Accounted for as joint ventures under equity method until September 30, 2018

** Subsidiaries are located in Thailand, Singapore, Malaysia, Vietnam, Indonesia, China, Hong Kong, Myanmar, New Zealand and Australia.

Acquisition of CURCI

In September 2018, the Parent Company entered into a share purchase agreement with its joint venture partner, Calbee, Inc., to purchase the latter's 50% equity interest in CURCI. As a result of the sale, CURCI became a wholly-owned subsidiary of URC (see Note 16).

Acquisition of HURC

In September 2018, the Parent Company entered into a share purchase agreement with its joint venture partner, ConAgra Grocery Products Company, LLC., to purchase the latter's 50% equity interest in HURC. As a result of the sale, HURC became a wholly-owned subsidiary of URC (see Note 16).

Merger of CCPI

On March 10, 2015 and May 27, 2015, the BOD and stockholders of the Parent Company, respectively, approved the plan to merge CCPI with the Parent Company. On April 25, 2017 and June 28, 2017, the BOD and stockholders of the Parent Company approved the revised Plan of Merger and Articles of Merger between the Company and the Parent Company. On April 24, 2018, the SEC approved the merger (see Notes 16 and 22).

Control

Control is achieved when the Group is exposed, or has rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date the Parent Company gains control until the date it ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent of the Group and to the non-controlling interests, even if this results in the non-controlling interest having deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Group.

All intragroup transactions, balances, income and expenses are eliminated in the consolidation. Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Group's equity therein. The interest of non-controlling shareholders may be initially measured at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis. Subsequent to acquisition, non-controlling interests consist of the amount attributed to such interests at initial recognition and the non-controlling interest's share of changes in equity since the date of the

combination.

Changes in the Group's ownership interest in subsidiary that do not result in a loss of control are accounted for as equity transactions. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the equity holders of the Parent Company.

If the Group loses control over a subsidiary, it:

- derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- derecognizes the carrying amount of any non-controlling interest;
- derecognizes the related other comprehensive income recorded in equity and recycles the same to profit or loss or retained earnings;
- recognizes the fair value of the consideration received;
- recognizes the fair value of any investment retained;
- recognizes any surplus or deficit in the consolidated statement of income; and
- reclassifies the Parent Company's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Company, using consistent accounting policies. Some of the Group's subsidiaries have a local statutory accounting reference date of September 30. These are consolidated using management prepared information on a basis coterminous with the Group's accounting reference date.

Below are the subsidiaries with a different accounting reference date from that of the Parent Company:

<u>Subsidiaries*</u>	<u>Year-end</u>
Bio-resource Power Generation Corporation	September 30
Southern Negros Development Corporation	-do-

**Dormant/non-operating subsidiaries*

Business Combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. This policy also covers purchase of assets that constitutes acquisition of a business. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are recognized in profit or loss in the consolidated statement of income as incurred.

Where appropriate, the cost of acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition-date fair value. Subsequent changes in such fair values are adjusted against the cost of acquisition where they qualify as measurement period adjustments. All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with relevant PFRSs. Changes in the fair value of contingent consideration classified as equity are not recognized.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that if known, would have affected the amounts recognized as of that date. The measurement period is the period from the date of acquisition to the date the Group receives complete information about facts and circumstances that existed as of the acquisition date and is subject to a maximum period of one year.

If the business combination is achieved in stages, the Group's previously-held interests in the acquired entity are remeasured to fair value at the acquisition date (the date the Group attains control) and the resulting gain or loss, if any, is recognized in the consolidated statement of income. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

Combinations of Entities Under Common Control

Where there are business combinations involving entities that are ultimately controlled by the same ultimate parent (i.e., Controlling Shareholders) before and after the business combination and that the control is not transitory ("business combinations under common control"), the Group accounts for such business combinations in accordance with the guidance provided by the Philippine Interpretations Committee Q&A No. 2011-02, PFRS 3.2 - *Common Control Business Combinations*. The purchase method of accounting is used, if the transaction was deemed to have substance from the perspective of the reporting entity. In determining whether the business combination has substance, factors such as the underlying purpose of the business combination and the involvement of parties other than the combining entities such as the non-controlling interest, shall be considered. In cases where the transaction has no commercial substance, the business combination is accounted for using the pooling of interest method.

In applying the pooling-of-interests method, the Group follows the Philippine Interpretations Committee Q&A No. 2012-01, PFRS 3.2 - *Application of the Pooling of Interest Method for Business Combinations of Entities under Common Control in Consolidated Financial Statements*, which provides the following guidance:

- The assets and liabilities of the combining entities are reflected in the consolidated financial statements at their carrying amounts. No adjustments are made to reflect fair values, or recognize any new assets or liabilities, at the date of the combination. The only adjustments that are made are those adjustments to harmonize accounting policies.
- No new goodwill is recognized as a result of the combination. The only goodwill that is recognized is any existing goodwill relating to either of the combining entities. Any difference between the consideration paid or transferred and the equity acquired is reflected within equity as other equity reserve, i.e., either contribution or distribution of equity.
- The consolidated statement of income reflects the results of the combining entities for the full year, irrespective of when the combination took place.

Goodwill

Goodwill arising on the acquisition of a subsidiary is recognized as an asset at the date the control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously-held interest, if any, in the entity over the net fair value of the identifiable net assets recognized.

If after reassessment, the Group's interest in the net fair value of the acquiree's identifiable net assets exceeds the sum of consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously-held equity interest, if any, the excess is recognized immediately in the consolidated statement of income as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is not amortized, but is reviewed for impairment at least annually. Any impairment loss is recognized immediately in profit or loss and is not subsequently reversed.

On disposal of a subsidiary, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial years, except that the Group has adopted the following PFRSs and Philippine Accounting Standards (PAS) and Philippine Interpretations beginning January 1, 2018. The adoption of the new and amended standards and interpretations did not have any impact on the consolidated financial statements of the Group unless otherwise indicated.

- *Amendments to PFRS 2, Share-based Payment, Classification and Measurement of Share-based Payment Transactions*

The amendments to PFRS 2 address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and the accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash-settled to equity-settled. Entities are required to apply the amendments to: (1) share-based payment transactions that are unvested or vested but unexercised as of January 1, 2018, (2) share-based payment transactions granted on or after January 1, 2018 and to (3) modifications of share-based payments that occurred on or after January 1, 2018. Retrospective application is permitted if elected for all three amendments and if it is possible to do so without hindsight.

- *PFRS 9, Financial Instruments*

PFRS 9 replaces PAS 39, *Financial Instruments: Recognition and Measurement*, for annual periods beginning on or after January 1, 2018, bringing together all three aspects of the accounting for financial instruments: classification and measurement; impairment; and hedge accounting.

The Group applied PFRS 9 using the modified retrospective approach, with an initial application dated January 1, 2018. The Group has not restated the comparative information, which continues to be reported under PAS 39. Restatements and differences in the carrying amounts of financial instruments arising from the adoption of PFRS 9 have been recognized in the 2018 opening balances of retained earnings as if the Group had always applied PFRS 9.

The Group adopted the classification and measurement, impairment and hedge accounting requirements of the standard as follows:

Classification and measurement

Financial assets are measured at FVTPL unless these are measured at FVOCI or at amortized cost. The classification and measurement provisions of PFRS 9 require that all debt financial assets that do not meet the “solely payment of principal and interest” (SPPI) test, including those that contain embedded derivatives, be classified at initial recognition as financial assets at FVTPL. The intent of the SPPI test is to ensure that debt instruments that contain non-basic lending features, such as conversion options and equity linked pay-outs, are measured as financial assets at FVTPL. Subsequent measurement of instruments classified as financial assets at FVTPL under PFRS 9 operates in a similar manner to financial instruments held for trading under PAS 39.

All equity financial assets are required to be classified at initial recognition as at FVTPL unless an irrevocable designation is made to classify the instrument as financial asset at FVOCI for equities. Unlike AFS for equity securities under PAS 39, the FVOCI for equities category results in all realized and unrealized gains and losses being recognized in the consolidated statement of comprehensive income with no recycling to profit or loss. Only dividends will continue to be recognized in the consolidated statement of income.

As at January 1, 2018, the Group has reviewed and assessed all of its existing financial instruments. The following table shows the Group’s financial instruments from their previous classification and measurement category in accordance with PAS 39 to their new classification and measurement categories upon transition to PFRS 9 on January 1, 2018:

Financial Assets	Classification and Measurement	
	Under PAS 39	Under PFRS 9
Cash and cash equivalents	Loans and receivables	Amortized cost
Receivables	Loans and receivables	Amortized cost
Equity instruments at FVTPL	Financial assets at FVPL	Financial assets at FVTPL
Equity instruments at OCI	AFS investments	Financial assets at FVOCI
Derivatives under hedge accounting	FVOCI	FVOCI

Impairment

PFRS 9 requires recording of expected credit losses (ECL) for all debt securities not classified as at FVPL, together with receivables. ECL represents credit losses that reflect an unbiased and probability-weighted amount which is determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. In comparison, the incurred loss model under PAS 39 recognizes lifetime credit losses only when there is objective evidence of impairment. The ECL model eliminates the loss event required under the incurred loss model, and lifetime ECL is recognized earlier under PFRS 9.

PFRS 9 provides some operational simplifications for receivables, by introducing an alternative simplified approach. Under the simplified approach, there is no more requirement to determine at reporting date whether a credit exposure has significantly increased in credit risk or not. Credit exposures under the simplified approach will be subject only to lifetime ECL. In addition, PFRS 9 allows the use of a provision matrix approach or a loss rate approach as a practical expedient when measuring ECL for certain short-term financial assets, so long as these methodologies reflects a probability-weighted outcome, the time value of money and reasonable

and supportable information that is available without undue cost or effort at the reporting date, about past events, current conditions and forecasts of future economic conditions.

Under PFRS 9, the level of provision for credit and impairment losses has generally increased due to the incorporation of a more forward-looking approach in determining provisions. Further, since the implementation of PFRS 9, all financial assets except those measured at FVTPL and equity instruments at FVOCI, are assessed for at least 12-month ECL and the population of financial assets to which the lifetime ECL applies is larger than the population for which there is objective evidence of impairment in accordance with PAS 39.

The adoption of PFRS 9 changed the Group's accounting for impairment losses for receivables to ECL approach. The adoption of PFRS 9 as at January 1, 2018 resulted in a reduction of retained earnings and receivables by ₱1.7 billion.

Hedge accounting

The new hedge accounting model under PFRS 9 aims to simplify hedge accounting, align the accounting for hedge relationships more closely with an entity's risk management activities and permit hedge accounting to be applied more broadly to a greater variety of hedging instruments and risks eligible for hedge accounting.

- Amendments to PFRS 4, *Applying PFRS 9 Financial Instruments with PFRS 4 Insurance Contracts*

The amendments address concerns arising from implementing PFRS 9, the new financial instruments standard before implementing the new insurance contracts standard. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying PFRS 9 and an overlay approach. The temporary exemption is first applied for reporting periods beginning on or after January 1, 2018. An entity may elect the overlay approach when it first applies PFRS 9 and apply that approach retrospectively to financial assets designated on transition to PFRS 9. The entity restates comparative information reflecting the overlay approach if, and only if, the entity restates comparative information when applying PFRS 9.

- PFRS 15, *Revenue from Contracts with Customers*

PFRS 15 supersedes PAS 11, *Construction Contracts*, PAS 18, *Revenue*, and related interpretations and it applies to all revenue arising from contracts with customers, unless those contracts are in the scope of other standards. PFRS 15 establishes a five-step model that will apply to revenue arising from contracts with customers. The five-step model is as follows:

- Identify the contract(s) with a customer;
- Identify the performance obligations in the contract;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations in the contract; and
- Recognize revenue when (or as) the entity satisfies a performance obligation.

Under PFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The standard requires entities to exercise judgment, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract.

With the effectivity of PFRS 15 on January 1, 2018, as approved by the Financial Reporting Standards Council (FRSC), the Philippine Interpretations Committee (PIC) issued PIC Q&A 2019-3, *Revenue Recognition Guidance for Sugar Millers*, to assist the companies operating in the sugar industry in the adoption of PFRS 15. The interpretation states that a miller should recognize revenue arising from its sugar milling operation under either an output sharing agreement or cane purchase agreement, and that providing free storage constitutes a separate performance obligation in the case of an output sharing agreement.

In response to concerns raised by the sugar industry on the implementation and adoption of the PIC Q&A, the SEC issued MC No. 06 on April 4, 2019, deferring the application of the provisions of the above-mentioned PIC Q&A for a period of one (1) year.

Effective January 1, 2019, the Philippine sugar millers will adopt PIC Q&A No. 2019-3 and any subsequent amendments thereto retrospectively or as the SEC will later prescribe.

The Group availed of the deferral of adoption of the above specific provisions. Had these provisions been adopted, it would have affected retained earnings as at January 1, 2018 and revenue from milling, cost of sales, cost of milling and raw sugar inventories for 2018. Currently, revenue is recognized upon sale of raw sugar arising from the output sharing agreements.

With the deferral of the implementation of certain provisions of PIC Q&A 2019-3, the adoption of PFRS 15 for sugar milling did not have any significant impact to the consolidated financial statements.

The Group adopted PFRS 15 using the modified retrospective method of adoption with the date of initial application of January 1, 2018. Under this method, the standard can be applied either to all contracts at the date of initial application or only to contracts that are not completed at this date. The Group elected to apply the standard to all contracts that are not completed as at the date of initial application.

Set out below are the amounts by which each financial statement line item is affected as at and for the year ended December 31, 2018 as a result of the adoption of PFRS 15. The adoption of PFRS 15 did not have an impact on the Group's other comprehensive income or on its operating, investing and financing cash flows. There were no adjustments recognized to the opening balances of retained earnings as at January 1, 2018 upon the adoption of PFRS 15.

(in thousands)	Under PAS 18	Adjustment	Under PFRS 15
Revenue from contracts with customers			
Sale of goods and services	₱129,515,091	(₱1,745,142)	₱127,769,949
Selling and distribution expense	20,464,701	(1,745,142)	18,719,559

The nature of the adjustment as at January 1, 2018 and the reasons for the significant changes in the consolidated statement of income for the year ended December 31, 2018 as presented in the above table are described below:

- a) The Group has determined that, except in the case of milling revenue, all contracts under PAS 18 still qualify as contracts under PFRS 15. Under PAS 18, milling contracts entered into by the Group with the planters for the conversion of the planters' sugar cane into raw sugar through an output-sharing arrangement is not considered as a revenue contract, but is

now within the scope of PFRS 15. Planters are considered customers under this arrangement and the Group provides service to the planters in the form of conversion processes of sugar cane to raw sugar.

- b) Other than the sale of goods and services, no other performance obligations were identified except in the case of milling revenue discussed in the preceding paragraph.
- c) The Group pays various consideration payable to customers and accounts for each type of consideration separately either treated as contra-revenue (discount) or an expense under the old revenue standard. Under PFRS 15, the Group shall account for a consideration payable to customer as a reduction in revenue unless the payment to the customer is in exchange for a distinct good or service that the customer transfer to the entity wherein the consideration payable to the customer shall be treated as an expense. As a result, certain expenses were reclassified as contra-revenue amounting to ₱1.7 billion for the year ended December 31, 2018.

- Amendments to PAS 28, *Investments in Associates and Joint Ventures, Measuring an Associate or Joint Venture at Fair Value (Part of Annual Improvements to PFRSs 2014 - 2016 Cycle)*
The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at fair value through profit or loss. They also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent. Retrospective application is required.
- Amendments to PAS 40, *Investment Property, Transfers of Investment Property*
The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. Retrospective application of the amendments is not required and is only permitted if this is possible without the use of hindsight.
- Philippine Interpretation IFRIC-22, *Foreign Currency Transactions and Advance Consideration*
The interpretation clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the nonmonetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the date of the transaction for each payment or receipt of advance consideration. Retrospective application of this interpretation is not required.

Since the Group's current practice is in line with the clarifications issued, these do not have any impact on the Group's consolidated financial statements.

Significant Accounting Policies

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated statement of financial position based on current or noncurrent classification.

An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalents, unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as noncurrent.

Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

Fair Value Measurement

The Group measures certain financial instruments and nonfinancial assets at fair value at each reporting date. Fair values of financial instruments measured at amortized cost and investment properties carried at cost are disclosed in Note 5.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting date.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of placement, and that are subject to insignificant risk of changes in value.

Financial Instruments (Upon Adoption of PFRS 9 beginning January 1, 2018)

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) Financial assets

Initial recognition and measurement

Financial assets are classified at fair value at initial recognition and subsequently measured at amortized cost, FVOCI, and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under PFRS 15.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at FVTPL

The financial assets of the Group as of December 31, 2018 consist of financial assets at amortized cost, financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments), derivative assets at FVOCI and financial assets at FVTPL (equity instruments).

Financial assets at amortized cost (debt instruments)

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents and receivables.

Financial assets designated at FVOCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at FVOCI when they meet the definition of equity under PAS 32, *Financial Instruments: Presentation*, and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the consolidated statements of income when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at FVOCI are not subject to impairment assessment.

The Group elected to classify irrevocably its investments in club shares under this category.

Financial assets at FVTPL (equity instruments)

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and

measured at FVTPL, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVOCI, as described above, debt instruments may be designated at FVTPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at FVTPL are carried in the consolidated statements of financial position at fair value with net changes in fair value recognized in the consolidated statements of income.

This category includes equity instruments held for trading and currency options.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group recognizes an allowance for ECLs for all debt instruments not held at FVTPL. ECL represents credit losses that reflect an unbiased and probability-weighted amount which is determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime ECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12-month ECL. The 12-month ECL is the portion of lifetime ECL that results from default events on a financial instrument that are possible within the 12 months after the

reporting date. Lifetime ECL are credit losses that results from all possible default events over the expected life of a financial instrument.

For trade receivables, installment contracts receivable and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For other financial assets such nontrade receivable, loans receivable, due from related parties and other receivables, ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk (SICR) since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For cash and cash equivalents and short-term investments, the Group applies the low credit risk simplification. The probability of default and loss given defaults are publicly available and are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from reputable credit rating agencies to determine whether the debt instrument has SICR and to estimate ECLs.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

The key inputs in the model include the Group's definition of default and historical data of three years for the origination, maturity date and default date. The Group considers trade receivables and contract assets in default when contractual payment are 90 days past due, except for certain circumstances when the reason for being past due is due to reconciliation with customers of payment records which are administrative in nature which may extend the definition of default. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

Determining the stage for impairment

At each reporting date, the Group assesses whether there has been a SICR for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Group considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed SICR since origination, then the loss allowance measurement reverts from lifetime ECL to 12-months ECL.

b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by PFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the consolidated statements of income.

Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria in PFRS 9 are satisfied.

The Group does not have financial liabilities at FVTPL as of December 31, 2018.

Other financial liabilities

This category pertains to financial liabilities that are not held for trading or not designated as at FVTPL upon the inception of the liability. These include liabilities arising from operations and borrowings.

After initial measurement, other financial liabilities are measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on the acquisition and fees or costs that are an integral part of the EIR. Gains and losses are recognized in profit or loss when other financial liabilities are derecognized, as well as through the EIR amortization process.

This category applies to the Group's accounts payable and accrued expenses (excluding advances from customers, advances from third parties, statutory and taxes payables), short-term debt and trust receipts payable and long-term debt.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in profit or loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

Financial Instruments (Prior to Adoption of PFRS 9)

Date of recognition

The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the settlement date. Derivatives are recognized on a trade date basis.

Initial recognition of financial instruments

All financial instruments are recognized initially at fair value. Except for financial instruments valued at FVPL, the initial measurement of financial assets includes transaction costs. The Group classifies its financial assets into the following categories: financial assets at FVPL, held-to-maturity (HTM) investments, AFS financial assets, loans and receivables or as derivatives designated as hedging instruments in effective hedge, as appropriate. The Group classifies its financial liabilities into financial liabilities at FVPL and other financial liabilities at amortized cost.

The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market. Management determines the classification of its investments at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

As of December 31, 2017, the Group has no HTM investments and financial liabilities at FVPL.

'Day 1' difference

Where the transaction price in a non-active market is different from the fair value based on other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from an observable market, the Group recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in profit or loss in the consolidated statement of income. In cases where variables used are made of data which is not observable, the difference between the transaction price and model value is only recognized in the consolidated statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the 'Day 1' difference amount.

Financial assets and financial liabilities at FVPL

Financial assets and financial liabilities at FVPL include financial assets and financial liabilities held for trading purposes, derivative financial instruments, or those designated upon initial recognition at FVPL when any of the following criteria are met:

- a. Financial assets and liabilities are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term.
- b. Derivatives, including separate embedded derivatives, are also classified under financial assets or liabilities at FVPL, unless they are designated as hedging instruments in an effective hedge
- c. Financial assets or liabilities may be designated by management on initial recognition as at FVPL when any of the following criteria are met:

- the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognizing gains or losses on them on a different basis;
- the assets and liabilities are part of a group of financial assets, financial liabilities or both which are managed and their performance are evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or
- the financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

Financial assets and financial liabilities at FVPL are recorded in the consolidated statement of financial position at fair value. Changes in fair value are reflected in profit or loss in the consolidated statement of income. Interest earned or incurred is recorded in interest income or expense, respectively, while dividend income is recorded in other operating income according to the terms of the contract, or when the right of the payment has been established.

The Group's financial assets at FVPL consist of equity securities and currency options (see Note 8 and 9).

Derivatives classified as FVPL

The Group uses derivative financial instruments such as currency forwards and currency options to hedge the risks associated with foreign currency and interest rate fluctuations. Such derivative financial instruments are initially recorded at fair value on the date at which the derivative contract is entered into and are subsequently remeasured at fair value. Any gains or losses arising from changes in fair values of derivatives (except those accounted for as accounting hedges) are taken directly in the consolidated statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The fair values of the Group's derivative instruments are calculated using certain standard valuation methodologies.

Derivatives designated as accounting hedges

For the purpose of hedge accounting, hedges are classified primarily as either: (a) a hedge of the fair value of an asset, liability or a firm commitment (fair value hedge); (b) a hedge of the exposure to variability in cash flows attributable to an asset or liability or a forecasted transaction (cash flow hedge); or (c) a hedge of a net investment in a foreign operation (net investment hedge). Hedge accounting is applied to derivatives designated as hedging instruments in a fair value, cash flow or net investment hedge provided certain criteria are met.

Hedge accounting

At the inception of a hedging relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and risk management objective and its strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Cash flow hedge

Cash flow hedges are hedges of the exposure to variability in cash flows that are attributable to a particular risk associated with a recognized asset, liability or a highly probable forecast transaction and could affect the profit or loss. The effective portion of changes in the fair value of derivatives that are designated and qualified as cash flow hedges is recognized as 'Unrealized gains (losses) on cash flow hedge' in other comprehensive income. Any gain or loss in fair value relating to an ineffective portion is recognized immediately in profit or loss.

Amounts accumulated in other comprehensive income are recycled to profit or loss in the periods in which the hedged item will affect profit or loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss recognized in other comprehensive income is eventually recycled in profit or loss.

Hedge effectiveness testing

To qualify for hedge accounting, the Group is required that at the inception of the hedge and throughout its life, each hedge must be expected to be highly effective (prospective effectiveness), and demonstrate actual effectiveness (retrospective effectiveness) on an ongoing basis.

The documentation of each hedging relationship sets out how the effectiveness of the hedge is assessed. The method that the Group adopts for assessing hedge effectiveness will depend on its risk management strategy.

For prospective effectiveness, the hedging instrument must be expected to be highly effective in offsetting changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated. The Group applies the dollar-offset method using hypothetical derivatives in performing hedge effectiveness testing. For actual effectiveness to be achieved, the changes in fair value or cash flows must offset each other in the range of 80 to 125 percent. Any hedge ineffectiveness is recognized in profit or loss.

Embedded derivatives

An embedded derivative is separated from the host contract and accounted for as a derivative if all of the following conditions are met: a) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract; b) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and c) the hybrid or combined instrument is not recognized at FVPL.

Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the cash flows that otherwise would be required under the contract, in which case reassessment is required. The Group determines whether a modification to cash flows is significant by considering the extent to which the expected future cash flows associated with the embedded derivative, the host contract or both have changed and whether the change is significant relative to the previously expected cash flow on the contract.

Current versus noncurrent classification

Derivative instruments that are not designated as effective hedging instruments are classified as current or noncurrent or separated into a current and noncurrent portion based on an assessment of the facts and circumstances (i.e., the underlying contracted cash flows).

- Where the Group will hold a derivative as an economic hedge (and does not apply hedge accounting) for a period beyond 12 months after the reporting date, the derivative is classified as

noncurrent (or separated into current and noncurrent portions) consistent with the classification of the underlying item.

- Embedded derivatives that are not closely related to the host contract are classified consistent with the cash flows of the host contract. Derivative instruments that are designated as, and are effective hedging instruments, are classified consistently with the classification of the underlying hedged item. The derivative instrument is separated into a current portion and a noncurrent portion only if a reliable allocation can be made.

Loans and receivables

Loans and receivables are nonderivative financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. After initial measurement, loans and receivables are subsequently carried at amortized cost using the effective interest rate (EIR) method less any allowance for impairment. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the EIR and transaction costs. The amortization is included under 'Finance revenue' in the consolidated statement of income. Gains and losses are recognized in profit or loss in the consolidated statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process. Loans and receivables are included in current assets if maturity is within 12 months from the reporting date. Otherwise, these are classified as noncurrent assets.

This accounting policy applies primarily to the Group's cash and cash equivalents and receivables (see Notes 7 and 10).

AFS financial assets

AFS financial assets are those nonderivative investments which are designated as such or do not qualify to be classified or designated as financial assets at FVPL, held-to-maturity investments or loans and receivables. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions.

After initial measurement, AFS financial assets are subsequently measured at fair value. The unrealized gains and losses arising from the fair valuation of AFS financial assets are excluded from reported earnings and are reported under the 'Unrealized gain on AFS financial assets' section of the consolidated statement of comprehensive income.

When the security is disposed of, the cumulative gain or loss previously recognized in equity is recognized in profit or loss in the consolidated statement of income. Interest earned on holding AFS financial assets are reported as interest income using the EIR method. Where the Group holds more than one investment in the same security, these are deemed to be disposed of on a first-in, first-out basis.

Dividends earned on holding AFS financial assets are recognized in the consolidated statement of income, when the right to receive payment has been established. The losses arising from impairment of such investments are recognized under 'Provision for Credit and impairment losses' in the consolidated statement of income.

Other financial liabilities

Issued financial instruments or their components, which are not designated at FVPL are classified as other financial liabilities where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

All loans and borrowings are initially recognized at the fair value of the consideration received less directly attributable debt issuance costs. Debt issuance costs are amortized using the EIR method and unamortized debt issuance costs are offset against the related carrying value of the loan in the consolidated statement of financial position.

After initial measurement, other financial liabilities are subsequently measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the EIR.

When a loan is paid, the related unamortized debt issuance costs at the date of repayment are charged against current operations. Gains and losses are recognized in the consolidated statement of income when the liabilities are derecognized or impaired, as well as through the amortization process.

This accounting policy applies primarily to the Group's short-term (see Note 18) and long-term debts (see Note 20), accounts payable and other accrued liabilities (see Note 19) and other obligations that meet the above definition (other than liabilities covered by other accounting standards, such as pension liabilities or income tax payable).

Debt Issuance Costs

Debt issuance costs are amortized using EIR method and unamortized debt issuance costs are included in the measurement of the related carrying value of the loan in the consolidated statement of financial position. When the loan is repaid, the related unamortized debt issuance costs at the date of repayment are charged to the consolidated statement of income.

Classification of Financial Instruments Between Debt and Equity

A financial instrument is classified as debt if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Reclassification of Financial Assets

A financial asset is reclassified out of the FVPL category when the following conditions are met:

- the financial asset is no longer held for the purpose of selling or repurchasing it in the near term; and
- there is a rare circumstance.

A financial asset that is reclassified out of the FVPL category is reclassified at its fair value on the date of reclassification. Any gain or loss already recognized in the consolidated statement of income is not reversed. The fair value of the financial asset on the date of reclassification becomes its new cost or amortized cost, as applicable.

The Group evaluates its AFS investments whether the ability and intention to sell them in the near term is still appropriate. When the Group is unable to trade these financial assets due to inactive markets and management's intention to do so significantly changes in the foreseeable future, the Group may elect to reclassify these financial assets in rare circumstances. Reclassification to loans and receivables is permitted when the financial assets meet the definition of loans and receivables and the Group has the ability and intention to hold these assets for the foreseeable future or until maturity. Reclassification to the HTM category is permitted only when the entity has the ability and intention to hold the financial asset to maturity.

For a financial asset reclassified out of the AFS category, any previous gain or loss on that asset that has been recognized in equity is amortized to profit or loss over the remaining life of the investment using the effective interest method. Any difference between the new amortized cost and the expected cash flows is also amortized over the remaining life of the asset using the effective interest method. If the asset is subsequently determined to be impaired, then the amount recorded in equity is reclassified to profit or loss.

Impairment of Financial Assets

The Group assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial assets carried at amortized cost

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If there is objective evidence that an impairment loss on financial assets carried at amortized cost (i.e., receivables) has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original EIR. The carrying amount of the asset is reduced through the use of an allowance account. The loss is recognized in the consolidated statement of income as 'Provision for credit and impairment losses'. The asset, together with the associated allowance accounts, is written off when there is no realistic prospect of future recovery.

If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtor's ability to pay all amounts due according to the contractual terms of the assets being evaluated. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the consolidated statement of income to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

The Group performs a regular review of the age and status of its trade and other receivables, designed to identify receivables with objective evidence of impairment and provide the appropriate allowance for impairment loss. The review is accomplished using a combination of specific and collective assessment approaches, with the impairment loss being determined for each risk grouping identified by the Group (see Note 10).

AFS financial assets

The Group assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired.

In the case of equity investments classified as AFS financial assets, objective evidence would include a significant or prolonged decline in the fair value of the investments below its cost. The determination of what is significant and prolonged is subject to judgment. 'Significant' is to be evaluated against the original cost of the investment and 'Prolonged' against the period in which the fair value has been below its original cost. The Group treats 'significant' generally as 20% and 'prolonged' as greater than 12 months for quoted equity instruments. Where there is evidence of impairment, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income - is removed from equity and recognized in the consolidated statement of income. Impairment losses on equity investments are not reversed through the consolidated statement of income. Increases in fair value after impairment are recognized directly as part of other comprehensive income.

In the case of debt instruments classified as AFS financial assets, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued based on the rate of interest used to discount future cash flows for the purpose of measuring impairment loss. Such accrual is recorded under interest income in the consolidated statement of income. If, in subsequent year, the fair value of a debt instrument increases, and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of income, the impairment loss is reversed in the consolidated statement of income.

Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the best estimate of the expenditure required to settle the present obligation at the reporting date and the amount recognized less cumulative amortization.

Derecognition of Financial Instruments

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of ownership and retained control of the asset, or (b) has neither transferred nor retained the risk and rewards of the asset but has transferred the control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group’s continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. The Group assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Group and all of the counterparties.

Inventories

Inventories, including goods-in-process, are valued at the lower of cost and NRV. NRV is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. NRV for materials, spare parts and other supplies represents the related replacement costs.

When the inventories are sold, the carrying amounts of those inventories are recognized under ‘Cost of sales’ in the consolidated statement of income in the period when the related revenue is recognized.

Costs incurred in bringing each product to its present location and conditions are accounted for as follows:

Finished goods, goods-in-process, raw materials, containers and packaging materials, and spare parts and supplies

Cost is determined using the weighted average method. Finished goods and goods-in-process include direct materials and labor, and a proportion of manufacturing overhead costs based on actual goods processed and produced, but excluding borrowing costs.

Materials in-transit

Cost is determined using the specific identification basis.

Biological Assets

The biological assets of the Group are divided into two major categories with sub-categories as follows:

- Swine livestock
 - Breeders (livestock bearer)
 - Sucklings (breeders' offspring)
 - Weanlings (comes from sucklings intended to be breeders or to be sold as fatteners)
 - Fatteners/finishers (comes from weanlings unfit to become breeders; intended for the production of meat)

- Poultry livestock
 - Breeders (livestock bearer)
 - Chicks (breeders' offspring intended to be sold as breeders)

Biological assets are measured on initial recognition and at each reporting date at its fair value less estimated costs to sell. The fair values are determined based on current market prices of livestock of similar age, breed and genetic merit. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market.

Agricultural produce is the harvested product of the Group's biological assets. A harvest occurs when agricultural produce is either detached from the bearer biological asset or when a biological asset's life processes cease. A gain or loss arising on initial recognition of agricultural produce at fair value less estimated costs to sell is recognized in the consolidated statement of income in the period in which it arises. The agricultural produce in swine livestock is the suckling that transforms into weanling then into fatteners/finishers and meats, while the agricultural produce in poultry livestock is the hatched chick and table eggs.

A gain or loss on initial recognition of a biological asset at fair value less estimated costs to sell and from a change in fair value less estimated costs to sell of a biological asset are included in the consolidated statement of income in the period in which it arises.

Property, Plant and Equipment

Property, plant and equipment, except land, are carried at cost less accumulated depreciation and amortization and impairment losses, if any.

The initial cost of an item of property, plant and equipment comprises its purchase price and any cost attributable in bringing the asset to its intended location and working condition. Cost also includes:

- (a) interest and other financing charges on borrowed funds used to finance the acquisition of property, plant and equipment to the extent incurred during the period of installation and construction; and

- (b) asset retirement obligation relating to property, plant and equipment installed/constructed on leased properties, if any, for the corresponding liability.

Land is stated at cost less any impairment in value.

Subsequent costs are capitalized as part of the 'Property, plant and equipment' in the consolidated statement of financial position, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Cost of repairs and maintenance are expensed when incurred.

Foreign exchange differentials arising from foreign currency borrowings used for the acquisition of property, plant and equipment are capitalized to the extent that these are regarded as adjustments to interest costs.

Depreciation and amortization of property, plant and equipment commence once the property, plant and equipment are available for use and are computed using the straight-line method over the estimated useful life (EUL) of the assets regardless of utilization.

The EUL of property, plant and equipment of the Group follow:

	Years
Land improvements	5 to 10
Buildings and improvements	10 to 30
Machinery and equipment	10
Transportation equipment	5
Furniture, fixtures and equipment	5

Leasehold improvements are amortized over the shorter of their EUL or the corresponding lease terms. The residual values, useful lives and methods of depreciation and amortization of property, plant and equipment are reviewed periodically and adjusted, if appropriate, at each reporting date to ensure that the method and period of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment. Any change in the expected residual values, useful lives and methods of depreciation are adjusted prospectively from the time the change was determined necessary.

Construction-in-progress and equipment in transit are stated at cost. This includes the cost of construction and other direct costs. Borrowing costs that are directly attributable to the construction of property, plant and equipment are capitalized during the construction period. Construction in-progress and equipment in transit are not depreciated until such time as the relevant assets are completed and put into operational use.

Construction in-progress and equipment in transit are transferred to the related 'Property, plant and equipment' in the consolidated statement of financial position when the construction or installation and related activities necessary to prepare the property, plant and equipment for their intended use are completed, and the property, plant and equipment are ready for service.

Major spare parts and stand-by equipment items that the Group expects to use over more than one period and can be used only in connection with an item of property, plant and equipment are accounted for as property, plant and equipment. Depreciation and amortization on these major spare parts and stand-by equipment commence once these have become available for use (i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by the Group).

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of income, in the period the item is derecognized.

Fully depreciated property, plant and equipment are retained in the accounts until these are no longer in use.

Investment Properties

Investment properties consist of properties that are held to earn rentals or for capital appreciation or both, and those which are not occupied by entities in the Group. Investment properties, except for land, are carried at cost less accumulated depreciation and any impairment loss, if any. Land is carried at cost less any impairment loss, if any. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met, and excludes the cost of day-to-day servicing of an investment property.

Investment properties are measured initially at cost, including transaction costs. Transaction costs represent nonrefundable taxes such as capital gains tax and documentary stamp tax that are for the account of the Group. An investment property acquired through an exchange transaction is measured at fair value of the asset acquired unless the fair value of such an asset cannot be measured, in which case, the investment property acquired is measured at the carrying amount of asset given up.

The Group's investment properties consists solely of buildings and building improvements and are depreciated using the straight-line method over their EUL ranging from 10 to 30 years (see Note 17).

The depreciation and amortization method and useful life are reviewed periodically to ensure that the method and period of depreciation and amortization are consistent with the expected pattern of economic useful benefits from items of investment properties.

Investment properties are derecognized when either they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in the consolidated statement of income in the year of retirement or disposal.

Transfers are made to investment property when, and only when, there is a change in use, evidenced by the end of owner occupation, commencement of an operating lease to another party or by the end of construction or development. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner occupation or commencement of development with a view to sale.

For a transfer from investment property to owner-occupied property or inventories, the cost of property for subsequent accounting is its carrying amount at the date of change in use. If the property occupied by the Group as an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under Property, plant and equipment account up to the date of change in use.

Goodwill

Goodwill represents the excess of the cost of the acquisition over the fair value of identifiable net assets of the investee at the date of acquisition which is not identifiable to specific assets.

Goodwill acquired in a business combination from the acquisition date is allocated to each of the Group's cash-generating units, or groups of cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Each unit or group of units to which the goodwill is allocated:

- represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and
- is not larger than a segment based on the Group's operating segments as determined in accordance with PFRS 8, *Operating Segments*.

Following initial recognition, goodwill is measured at cost, less any accumulated impairment losses, if any. Goodwill is reviewed for impairment annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired (see further discussion under Impairment of nonfinancial assets).

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Intangible Assets

Intangible assets (other than goodwill) acquired separately are measured on initial recognition at cost. The cost of intangible asset acquired in a business combination is its fair value as at the acquisition date. Following initial recognition, intangible assets are measured at cost less any accumulated amortization and impairment losses, if any. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The EUL of intangible assets are assessed to be either finite or indefinite.

The useful lives of intangible assets with a finite life are assessed at the individual asset level. Intangible assets with finite lives are amortized on a straight line basis over the asset's EUL and assessed for impairment, whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each reporting date.

Changes in the EUL or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite useful lives is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually, either individually or at the cash-generating unit level (see further discussion under Impairment of nonfinancial assets). Such intangibles are not amortized. The useful life of an intangible asset with an indefinite useful life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

A gain or loss arising from derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognized in the consolidated statement of income when the asset is derecognized.

A summary of the policies applied to the Group's intangible assets follows:

	EUL	Amortization method used	Internally generated or acquired
Product Formulation	Indefinite	No amortization	Acquired
Trademarks/Brands	Indefinite	No amortization	Acquired
Trademarks	Finite (4 years)	Straight line amortization	Acquired
Software Costs	Finite (10 years)	Straight line amortization	Acquired
Customer Relationship	Finite (35 years)	Straight line amortization	Acquired

Investment in Joint Ventures

The Group has interests in joint ventures. A joint venture is a contractual arrangement whereby two or more parties who have joint control over the arrangement have rights to the net assets of the arrangements.

The Group's investment in joint venture is accounted for using the equity method of accounting. Under the equity method, the investment in a joint venture is carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share in the net assets of the joint venture. The consolidated statement of income reflects the Group's share in the results of operations of the joint venture. Where there has been a change recognized directly in the investees' equity, the Group recognizes its share of any changes and discloses this, when applicable, in the other comprehensive income in the consolidated statement of changes in equity. Profits and losses arising from transactions between the Group and the joint ventures are eliminated to the extent of the interest in the joint ventures.

The Group discontinues applying the equity method when its investments in investee companies are reduced to zero. Accordingly, additional losses are not recognized unless the Group has guaranteed certain obligations of the associates or joint venture. When the investees subsequently report net income, the Group will resume applying the equity method but only after its equity in the net income equals the equity in net losses of associates and joint venture not recognized during the period the equity method was suspended.

The investee company's accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

Impairment of Nonfinancial Assets

This accounting policy applies primarily to the Group's property, plant and equipment (see Note 13), investment properties (see Note 17), investment in joint ventures (see Note 16), goodwill and intangible assets (see Note 15).

Except for goodwill and intangible assets with indefinite useful lives which are tested for impairment annually, the Group assesses at each reporting date whether there is an indication that its nonfinancial assets may be impaired. When an indicator of impairment exists or when an annual impairment testing for an asset is required, the Group makes a formal estimate of recoverable amount.

Recoverable amount is the higher of an asset's (or cash-generating unit's) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed as part of the cash-generating unit to which it belongs. Where the

carrying amount of an asset (or cash generating unit) exceeds its recoverable amount, the asset (or cash-generating unit) is considered impaired and is written-down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash-generating unit).

Impairment losses are recognized under 'Provision for credit and impairment losses' in the consolidated statement of income.

The following criteria are also applied in assessing impairment of specific assets:

Property, plant and equipment, investment properties, intangible assets with definite useful lives

For property, plant and equipment, investment properties, intangible assets with definite useful lives, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income. After such a reversal, the depreciation and amortization expense is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Goodwill

Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount to which goodwill has been allocated, an impairment loss is recognized. Where goodwill forms part of a cash-generating unit (or group of cash-generating units) and part of the operations within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured on the basis of the relative fair values of the operation disposed of and the portion of the cash-generating unit retained.

Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives

Intangible assets with indefinite useful lives are tested for impairment annually as of reporting date either individually or at the cash-generating unit level, as appropriate.

Investments in joint ventures

After application of the equity method, the Group determines whether it is necessary to recognize additional impairment losses on the Group's investments in joint ventures. If this is the case, the Group calculates the amount of impairment as being the difference between the fair value of the joint ventures and the acquisition cost and recognizes the amount under 'Provision for credit and impairment losses' in the consolidated statement of income.

Revenue Recognition (Upon adoption of PFRS 15 beginning January 1, 2018)

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has concluded that it is the principal in its revenue arrangements because it controls the goods or services before transferring them to the customer.

Sale of goods and services

Revenue from sale of goods and services is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods and services. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods and services, the Group considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer, if any.

Sale of sugar

Sale of raw sugar is recognized upon (a) endorsement and transfer of quedans for quedan-based sales and (b) shipment or delivery and acceptance by the customers for physical sugar sales. Sale of refined sugar and alcohol is recognized upon shipment of delivery and acceptance by the customers. Sale of molasses warehouse receipts, which represents ownership title over the molasses inventories.

Rendering of tolling services

Revenue derived from tolling activities is recognized as revenue at the point in time when the related services have been rendered.

Revenue Recognition (Prior to adoption of PFRS 15)

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and other sales taxes or duties. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Group has concluded that it is acting as principal in all of its revenue arrangements.

Sale of goods

Revenue from sale of goods is recognized upon delivery, when the significant risks and rewards of ownership of the goods have passed to the buyer and the amount of revenue can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable, net of any trade discounts, prompt payment discounts and volume rebates.

Rendering of tolling services

Revenue derived from tolling activities is recognized as revenue when the related services have been rendered.

Revenue outside the scope of PFRS 15:

Dividend income

Dividend income is recognized when the shareholder's right to receive the payment is established.

Rent income

Rent income arising on investment properties is accounted for on a straight-line basis over the lease term on ongoing leases.

Interest income

Interest income is recognized as it accrues using the EIR method under which interest income is recognized at the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a result of a past event; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense under 'Finance cost' in the consolidated statement of income. Where the Group expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is probable.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements but disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are not recognized in the consolidated financial statements but disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Pension Costs

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets, if any, adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Current service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss.

Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset.

Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Termination benefit

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment as a result of either an entity's decision to terminate an employee's employment before the normal retirement date or an employee's decision to accept an offer of benefits in exchange for the termination of employment.

A liability and expense for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of those benefits and when the entity recognizes related restructuring costs. Initial recognition and subsequent changes to termination benefits are measured in accordance with the nature of the employee benefit, as either post-employment benefits, short-term employee benefits, or other long-term employee benefits.

Employee leave entitlement

Employee entitlements to annual leave are recognized as a liability when they are accrued to the employees. The undiscounted liability for leave expected to be settled wholly before twelve months after the end of the annual reporting period is recognized for services rendered by employees up to the end of the reporting period.

Income Taxes

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities.

The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Deferred tax

Deferred tax is provided using the balance sheet liability method on all temporary differences, with certain exceptions, at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from unused minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, and the carryforward benefits of unused tax credits from excess MCIT and unused NOLCO can be utilized, except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor future taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and future taxable profit will be available against which the temporary differences can be utilized.

The carrying amounts of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date, and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recognized.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss in the consolidated statement of comprehensive income. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sale of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sale of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement financial position to the extent of the recoverable amount.

The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of “Other current assets” or “Accounts payable and other accrued liabilities” in the consolidated statement of financial position.

Borrowing Costs

Interest and other finance costs incurred during the construction period on borrowings used to finance property development are capitalized to the appropriate asset accounts. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress, and expenditures and borrowing costs are being incurred. The capitalization of these borrowing costs ceases when substantially all the activities necessary to prepare the asset for sale or its intended use are complete. If the carrying amount of the asset exceeds its recoverable amount, an impairment loss is recorded. Capitalized borrowing cost is based on the applicable weighted average borrowing rate. Borrowing costs which do not qualify for capitalization are expensed as incurred.

Interest expense on loans is recognized using the EIR method over the term of the loans.

Leases

The determination of whether an arrangement is, or contains a lease, is based on the substance of the arrangement at inception date, and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

A reassessment is made after inception of the lease only if one of the following applies:

- a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- b) a renewal option is exercised or an extension granted, unless that term of the renewal or extension was initially included in the lease term;
- c) there is a change in the determination of whether fulfillment is dependent on a specified asset; or
- d) there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios a, c or d above, and at the date of renewal or extension period for scenario b.

Group as a lessee

A lease is classified at the inception date as finance lease or an operating lease.

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in ‘Finance costs’ in the consolidated statement of income.

A leased asset is depreciated over the EUL of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the EUL of the asset and the lease term.

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated statement of income on a straight-line basis over the lease term.

Group as a lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the assets are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as the rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Cost and Expenses

Cost and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Cost and expenses are recognized when incurred.

Foreign Currency Translation/Transactions

The functional and presentation currency of the Parent Company and its Philippine subsidiaries is the Philippine Peso. Each entity in the Group determines its own functional currency and items included in the consolidated financial statements of each entity are measured using that functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded in the functional currency rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange prevailing at the reporting date. All differences are taken to the consolidated statement of income. Tax charges and credits attributable to exchange differences on those borrowings are also dealt with in statement of income. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of initial transaction. Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Group companies

As of reporting date, the assets and liabilities of the subsidiaries are translated into the presentation currency of the Group at the rate of exchange prevailing at reporting date and their respective statements of income are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation are taken directly to a separate component of equity as 'Cumulative translation adjustments' under 'Other comprehensive income'. On disposal of a foreign entity, the deferred cumulative amount recognized in equity relating to that particular foreign operation shall be recognized in the consolidated statement of income.

Common Stock

Capital stocks are classified as equity and are recorded at par. Proceeds in excess of par value are recorded as 'Additional paid-in capital' in the consolidated statement of changes in equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Retained Earnings

Retained earnings represent the cumulative balance of periodic net income (loss), dividend distributions, prior period adjustments and effect of changes in accounting policy and capital adjustments.

Other Comprehensive Income

Other comprehensive income comprises items of income and expenses (including items previously presented under the consolidated statements of changes in equity) that are not recognized in the consolidated statement of income for the year in accordance with PFRSs.

Treasury Shares

Treasury shares are recorded at cost and are presented as a deduction from equity. Any consideration paid or received in connection with treasury shares are recognized directly in equity.

When the shares are retired, the capital stock account is reduced by its par value. The excess of cost over par value upon retirement is debited to the following accounts in the order given: (a) additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued, and (b) retained earnings. When shares are sold, the treasury share account is credited and reduced by the weighted average cost of the shares sold. The excess of any consideration over the cost is credited to additional paid-in capital.

Transaction costs incurred such as registration and other regulatory fees, amounts paid to legal, accounting and other professional advisers, printing costs and stamp duties (net of any related income tax benefit) in relation to issuing or acquiring the treasury shares are accounted for as reduction from equity, which is disclosed separately.

No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Dividends on Common Stocks

Dividends on common shares are recognized as a liability and deducted from equity when approved by BOD of the Parent Company in the case of cash dividends, and the BOD and shareholders of the Parent Company in the case of stock dividends.

Earnings Per Share (EPS)

Basic EPS is computed by dividing consolidated net income attributable to equity holders of the Parent Company (consolidated net income less dividends on preferred shares) by the weighted average number of common stocks issued and outstanding during the year, adjusted for any subsequent stock dividends declared.

Diluted EPS amounts are calculated by dividing the consolidated net income attributable to equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

Segment Reporting

The Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on business segments is presented in Note 6 to the consolidated financial statements.

Events after Reporting Date

Any post year-end event up to the date of approval of the BOD of the consolidated financial statements that provides additional information about the Group's position at reporting date (adjusting event) is reflected in the consolidated financial statements. Any post year-end event that is not an adjusting event is disclosed in the notes to the consolidated financial statements, when material.

Standards Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2019

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are ‘solely payments of principal and interest on the principal amount outstanding’ (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. The amendments should be applied retrospectively and are effective from January 1, 2019, with earlier application permitted.

- PFRS 16, *Leases*

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees – leases of ‘low-value’ assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today’s accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard’s transition provisions permit certain reliefs.

The Group is currently assessing the impact of adopting PFRS 16.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event.

- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019, with early application permitted. These amendments will apply only to any future plan amendments, curtailments, or settlements of the Group.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*
The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the ECL model in PFRS 9 applies to such long-term interests.

The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

The amendments should be applied retrospectively and are effective from January 1, 2019, with early application permitted. Since the Group does not have such long-term interests in its associate and joint venture, the amendments will not have an impact on its consolidated financial statements.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*
The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

Annual Improvements to PFRSs 2015-2017 Cycle

- Amendments to PFRS 3, *Business Combinations*, and PFRS 11, *Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019 and to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments are currently not applicable to the Group but may apply to future transactions.

- Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application is permitted. These amendments are not relevant to the Group because dividends declared by the Group do not give rise to tax obligations under the current tax laws.

- Amendments to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*
- The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted.

Effective beginning on or after January 1, 2020

- *Amendments to PFRS 3, Definition of a Business*
The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Group.

- *Amendments to PAS 1, Presentation of Financial Statements, and PAS 8, Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*
The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements. An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- *PFRS 17, Insurance Contracts*
PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

3. Significant Accounting Judgments and Estimates

The preparation of the consolidated financial statements in compliance with PFRSs requires the Group to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

a. Revenue recognition on sale of goods and services

Revenue recognition under PFRS 15 involves the application of significant judgment and estimation in the: (a) identification of the contract for sale of goods that would meet the requirements of PFRS 15; (b) assessment of performance obligation and the probability that the entity will collect the consideration from the buyer; (c) determining method to estimate variable consideration and assessing the constraint; and (d) recognition of revenue as the Group satisfies the performance obligation.

i. Existence of a contract

The Group enters into a contract with customer through an approved purchase order which constitutes a valid contract as specific details such as the quantity, price, contract terms and their respective obligations are clearly identified. In the case of sales to key accounts and distributors, the combined approved purchase order and trading terms agreement/exclusive distributorship agreement constitute a valid contract. In addition, part of the assessment process of the Group before revenue recognition is to assess the probability that the Group will collect the consideration to which it will be entitled in exchange for the goods sold that will be transferred to the customer.

ii. *Identifying performance obligation*

The Group identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

Based on management assessment, other than the sale of goods and services, no other performance obligations were identified except in the case of milling revenue.

iii. *Recognition of revenue as the Group satisfies the performance obligation*

The Group recognizes its revenue for all revenue streams at a point in time, when the goods are sold and delivered and when services are already rendered.

b. *Contingencies*

The Group is currently involved in various legal proceedings. The estimate of the probable costs for the resolution of these claims has been developed in consultation with outside counsel handling the defense in these matters and is based upon an analysis of potential results. The Group currently does not believe these proceedings will have a material effect on the Group's financial position. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

Estimates

The key assumptions concerning the future and other sources of estimation uncertainty at the financial position date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

a. *Assessment for ECL on trade receivables*

The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade receivables. The provision matrix specifies provision rates depending on the number of days that a trade receivable is past due. The Group also uses appropriate groupings if its historical credit loss experience show significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data affecting each customer segment to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rate by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience.

The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate. Accordingly, the provision for ECL on trade receivables is sensitive to changes in assumptions about forecasted economic conditions.

The Group has assessed that the ECL on trade receivables is not material because substantial amount of receivables are normally collected within one year. The carrying amount of trade receivables is ₱12.1 billion and ₱13.7 billion as at December 31, 2018 and 2017, respectively (see Note 10).

b. Assessment for ECL on Other Financial Assets at Amortized Cost

The Group determines the allowance for ECL using general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12-months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and,
- Actual or expected significant adverse changes in the operating results of the borrower.

The Group also considers financial assets that are more than 90 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the borrower.

The Group has assessed that the ECL on other financial assets at amortized cost is not material because the transactions with respect to these financial assets were entered into by the Group only with reputable banks and companies with good credit standing and relatively low risk of defaults. Accordingly, no provision for ECL on other financial assets at amortized cost was recognized in 2018.

c. Determination of fair values less estimated costs to sell of biological assets

The fair values of biological assets are determined based on current market prices of livestock of similar age, breed and genetic merit. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market. The fair values are reviewed and updated if expectations differ from previous estimates due to changes brought by both physical change and price changes in the market. It is possible that future results of operations could be materially affected by changes in these estimates brought about by the changes in factors mentioned.

As of December 31, 2018 and 2017, the Group's biological assets carried at fair values less estimated costs to sell amounted to ₱1.1 billion and ₱1.7 billion, respectively (see Note 14). For the years ended December 31, 2018 and 2017, the Group recognized changes in the fair value less costs to sell of biological assets amounting to ₱467.5 million loss and ₱118.8 million gain, respectively. For the three-month period ended December 31, 2016, the Group recognized losses from fair value changes of ₱104.6 million (see Note 14). Changes in fair value of biological assets are recognized in the consolidated statement of income.

d. Impairment of goodwill and intangible assets with indefinite useful lives

The Group performed its annual impairment test on its goodwill and other intangible assets with indefinite useful lives as of reporting date. The recoverable amounts of the intangible assets were determined based on value in use calculations using cash flow projections from financial budgets approved by management covering a five-year period. The pre-tax discount rates applied to cash flow projections range from 7.80% to 10.80% and 3.40% to 12.67% for the years ended

December 31, 2018 and 2017, respectively. The following assumptions were also used in computing value in use:

Growth rate estimates - growth rates include long-term and terminal growth rates that are based on experiences and strategies developed for the various subsidiaries. The prospect for the industry was also considered in estimating the growth rates.

Discount rates - discount rates were estimated based on the industry weighted average cost of capital, which includes the cost of equity and debt after considering the gearing ratio.

Value-in-use is most sensitive to changes in discount rate and growth rate.

As of December 31, 2018 and 2017, the balance of the Group's goodwill and intangible assets with indefinite useful lives, net of accumulated depreciation, amortization and impairment loss follow:

	2018	2017
Goodwill (Note 15)	₱31,194,495,817	₱31,212,075,404
Intangible assets (Note 15)	9,787,936,671	9,787,936,671

e. Assessment of impairment of nonfinancial assets

The Group assesses the impairment of its nonfinancial assets (i.e., property, plant and equipment, investment properties, investment in joint venture and intangible assets with finite useful lives) whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The factors that the Group considers important which could trigger an impairment review include the following:

- Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating the asset's value in use and decrease the asset's recoverable amount materially;
- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- Significant negative industry or economic trends.

The Group determines an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset base of the cash-generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes.

For the year ended December 31, 2018, the Group recognized impairment losses on its goodwill and property, plant and equipment amounting to ₱17.6 million and ₱1.7 million, respectively. No impairment was recognized for its investment property and other intangibles. For the year ended

December 31, 2017 and the three-month period ended December 31, 2016, the Group did not recognize any impairment losses on its property, plant and equipment (see Note 13), investment properties (Note 17), goodwill and its other intangible assets (see Note 15).

As of December 31, 2018 and 2017, the balances of the Group's nonfinancial assets with finite useful lives, excluding biological assets, net of accumulated depreciation, amortization and impairment losses follow:

	2018	2017
Property, plant and equipment (Note 13)	₱51,950,316,266	₱48,254,128,303
Intangible assets (Note 15)	1,942,323,683	2,022,099,361
Investment in joint ventures (Note 16)	520,917,509	552,226,288
Investment properties (Note 17)	36,384,879	45,288,139

f. Determination of the fair value of intangible assets and property, plant and equipment acquired in a business combination

The Group measures the identifiable assets and liabilities acquired in a business combination at fair value at the date of acquisition.

The fair value of the intangible assets acquired in a business combination is determined based on the net sales forecast attributable to the intangible assets, growth rate estimates and royalty rates using comparable license agreements. Royalty rates are based on the estimated arm's length royalty rate that would be paid for the use of the intangible assets. Growth rate estimate includes long-term growth rate and terminal growth rate applied to future cash flows beyond the projection period.

The fair value of property, plant and equipment acquired in a business combination is determined based on comparable properties after adjustments for various factors such as location, size and shape of the property. Cost information and current prices of comparable equipment are also utilized to determine the fair value of equipment.

The Group's acquisitions are discussed in Note 15 to the consolidated financial statements.

g. Estimation of pension and other benefits costs

The determination of the obligation and cost of pension and other employee benefits is dependent on the selection of certain assumptions used in calculating such amounts. Those assumptions include, among others, discount rates and salary increase rates (see Note 31). Actual results that differ from the Group's assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded obligation in such future periods.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of Philippine government bonds with terms consistent with the expected employee benefit payout as of reporting date.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

As of December 31, 2018 and 2017, the balance of the Group's present value of defined benefit obligations and other benefits is shown in Note 31 to the consolidated financial statements.

h. Recognition of deferred income tax assets

The Group reviews the carrying amounts of its deferred income taxes at each reporting date and reduces the deferred tax assets to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. However, there is no assurance that the Group will generate sufficient taxable income to allow all or part of the deferred tax assets to be utilized.

As of December 31, 2018 and 2017, the Group recognized net deferred tax assets amounting to ₱195.5 million and ₱216.9 million, respectively (see Note 32), as the Group believes sufficient taxable income will allow these deferred tax assets to be utilized.

Net deferred tax liabilities amounted to ₱4.2 billion and ₱4.3 billion as of December 31, 2018 and 2017, respectively (see Note 32).

As of December 31, 2018 and 2017, the Group has certain subsidiaries which are under ITH. As such, no deferred tax assets were set up on certain gross deductible temporary differences that are expected to reverse or expire within the ITH period (see Note 35).

The recognized and unrecognized deferred tax assets for the Group are disclosed in Note 32.

4. Financial Risk Management Objectives and Policies

The Group's principal financial instruments, other than derivative financial instruments, comprise cash and cash equivalents, financial assets at FVTPL, financial assets at FVOCI/AFS financial assets, and interest-bearing loans and other borrowings. The main purpose of these financial instruments is to finance the Group's operations and related capital expenditures. The Group has various other financial assets and financial liabilities, such as trade receivables and payables which arise directly from its operations. One of the Group's subsidiaries is a counterparty to derivative contracts. These derivatives are entered into as a means of reducing or managing their respective foreign exchange and interest rate exposures.

The BOD of the Parent Company and its subsidiaries review and approve policies for managing each of these risks and they are summarized below, together with the related risk management structure.

Risk Management Structure

The Group's risk management structure is closely aligned with that of the Ultimate Parent Company. The BOD of the Parent Company and the respective BODs of each subsidiary are ultimately responsible for the oversight of the Group's risk management processes that involve identifying, measuring, analyzing, monitoring and controlling risks.

The risk management framework encompasses environmental scanning, the identification and assessment of business risks, development of risk management strategies, design and implementation of risk management capabilities and appropriate responses, monitoring risks and risk management performance, and identification of areas and opportunities for improvement in the risk management process.

The BOD has created the board-level Audit Committee (AC) to spearhead the managing and monitoring of risks.

AC

The AC shall assist the Group's BOD in its fiduciary responsibility for the over-all effectiveness of

risk management systems, and both the internal and external audit functions of the Group. Furthermore, it is also the AC's purpose to lead in the general evaluation and to provide assistance in the continuous improvements of risk management, control and governance processes.

The AC also aims to ensure that:

- a. financial reports comply with established internal policies and procedures, pertinent accounting and auditing standards and other regulatory requirements;
- b. risks are properly identified, evaluated and managed, specifically in the areas of managing credit, market, liquidity, operational, legal and other risks, and crisis management;
- c. audit activities of internal and external auditors are done based on plan and deviations are explained through the performance of direct interface functions with the internal and external auditors; and
- d. the Group's BOD is properly assisted in the development of policies that would enhance the risk management and control systems.

Enterprise Risk Management Group (ERMG)

The ERMG was created to be primarily responsible for the execution of the enterprise risk management framework. The ERMG's main concerns include:

- a. recommending risk policies, strategies, principles, framework and limits;
- b. managing fundamental risk issues and monitoring of relevant risk decisions;
- c. providing support to management in implementing the risk policies and strategies; and
- d. developing a risk awareness program.

Corporate Governance Compliance Officer

Compliance with the principles of good corporate governance is also one of the primary objectives of the BOD. To assist the BOD in achieving this purpose, the BOD has designated a Compliance Officer who shall be responsible for monitoring the actual compliance with the provisions and requirements of the Corporate Governance Manual and other requirements on good corporate governance, identifying and monitoring control compliance risks, determining violations and recommending penalties on such infringements for further review and approval of the BOD, among others.

Day-to-day risk management functions

At the business unit or company level, the day-to-day risk management functions are handled by four (4) different groups, namely:

- a. Risk-taking personnel. This group includes line personnel who initiate and are directly accountable for all risks taken.
- b. Risk control and compliance. This group includes middle management personnel who perform the day-to-day compliance check to approved risk policies and risk mitigation decisions.
- c. Support. This group includes back office personnel who support the line personnel.
- d. Risk management. This group pertains to the business unit's Management Committee which makes risk mitigating decisions within the enterprise-wide risk management framework.

Enterprise Resource Management (ERM) Framework

The Parent Company's BOD is also responsible for establishing and maintaining a sound risk management framework and is accountable for risks taken by the Parent Company. The Parent Company's BOD also shares the responsibility with the ERMG in promoting the risk awareness program enterprise-wide.

The ERM framework revolves around the following eight interrelated risk management approaches:

- a. **Internal Environmental Scanning.** It involves the review of the overall prevailing risk profile of the business unit to determine how risks are viewed and addressed by management. This is presented during the strategic planning, annual budgeting and mid-year performance reviews of the Group.
- b. **Objective Setting.** The Group's BOD mandates the business unit's management to set the overall annual targets through strategic planning activities, in order to ensure that management has a process in place to set objectives which are aligned with the Group's goals.
- c. **Event Identification.** It identifies both internal and external events affecting the Group's set targets, distinguishing between risks and opportunities.
- d. **Risk Assessment.** The identified risks are analyzed relative to the probability and severity of potential loss which serves as a basis for determining how the risks should be managed. The risks are further assessed as to which risks are controllable and uncontrollable, risks that require management's attention, and risks which may materially weaken the Group's earnings and capital.
- e. **Risk Response.** The Group's BOD, through the oversight role of the ERMG, approves the business unit's responses to mitigate risks, either to avoid, self-insure, reduce, transfer or share risk.
- f. **Control Activities.** Policies and procedures are established and approved by the Group's BOD and implemented to ensure that the risk responses are effectively carried out enterprise-wide.
- g. **Information and Communication.** Relevant risk management information are identified, captured and communicated in form and substance that enable all personnel to perform their risk management roles.
- h. **Monitoring.** The ERMG, Internal Audit Group, Compliance Office and Business Assessment Team constantly monitor the management of risks through risk limits, audit reviews, compliance checks, revalidation of risk strategies and performance reviews.

Risk management support groups

The Group's BOD created the following departments within the Group to support the risk management activities of the Parent Company and the other business units:

- a. **Corporate Security and Safety Board (CSSB).** Under the supervision of ERMG, the CSSB administers enterprise-wide policies affecting physical security of assets exposed to various forms of risks.
- b. **Corporate Supplier Accreditation Team (CORPSAT).** Under the supervision of ERMG, the CORPSAT administers enterprise-wide procurement policies to ensure availability of supplies and services of high quality and standards to all business units.
- c. **Corporate Management Services (CMS).** The CMS is responsible for the formulation of enterprise-wide policies and procedures.
- d. **Corporate Planning (CORPLAN).** The CORPLAN is responsible for the administration of strategic planning, budgeting and performance review processes of business units.
- e. **Corporate Insurance Department (CID).** The CID is responsible for the administration of the insurance program of business units concerning property, public liability, business interruption, money and fidelity, and employer compensation insurances, as well as, in the procurement of performance bonds.

Risk Management Policies

The main risks arising from the use of financial instruments are credit risk, liquidity risk and market risks such as foreign currency risk, equity price risk and interest rate risk. The Group's policies for managing the aforementioned risks are summarized below.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Group trades only with recognized and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. The Credit Management Division (CMD) of the Group continuously provides credit notification and implements various credit actions, depending on assessed risks, to minimize credit exposure. Receivable balances of trade customers are being monitored on a regular basis and appropriate credit treatments are executed for overdue accounts. Likewise, other receivable balances are also being monitored and subjected to appropriate actions to manage credit risk.

With respect to credit risk arising from the other financial assets of the Group, which comprise cash and cash equivalents, financial assets at FVTPL, financial assets at FVOCI/AFS financial assets and certain derivative financial instruments, the Group's exposure to credit risk arises from default of the counterparty with a maximum exposure equal to the carrying amount of these instruments.

a. Credit risk exposure

With respect to credit risk arising from financial assets of the Group, which comprise cash and cash equivalents, receivables, financial assets at FVTPL and financial assets at FVOCI/AFS financial assets, the Group's maximum exposure to credit risk is equal to its carrying amount as of December 31, 2018 and 2017, except for the Group's trade receivables as of as of December 31, 2018 and 2017 with carrying value of ₱12.1 billion and ₱13.7 billion, respectively, and collateral with fair value amounting to ₱2.8 billion as of both dates, resulting to net exposure of ₱9.3 billion and ₱10.9 billion, respectively.

The collateral securities related to the Group's trade receivables consist of standby letters of credit. The Group holds no other collateral or guarantee that would reduce the maximum exposure to credit risk.

b. Risk concentrations of the maximum exposure to credit risk

Concentrations arise when a number of counterparties are engaged in similar business activities or activities in the same geographic region or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location. Such credit risk concentrations, if not properly managed, may cause significant losses that could threaten the Group's financial strength and undermine public confidence.

In order to avoid excessive concentrations of risk, identified concentrations of credit risks are controlled and managed accordingly.

i. Concentration by geographical location

The Group's credit risk exposures as of December 31, 2018 and 2017 before taking into account any collateral held or other credit enhancements are categorized by geographic location follows:

	2018						Total
	Philippines	Asia	New Zealand	Australia	United States	Others	
Amortized cost:							
Cash and cash equivalents* (Note 7)	₱6,778,173,501	₱3,485,633,654	₱1,518,874,359	₱1,164,705,153	₱-	₱-	₱12,947,386,667
Receivables (Note 10):							
Trade receivables	4,092,400,288	4,919,980,265	1,110,640,137	1,900,543,956	20,255,518	40,568,500	12,084,388,664
Due from related parties	716,143,819	129,657,810	-	-	-	-	845,801,629
Advances to officers and employees	130,111,597	15,033,683	-	-	-	-	145,145,280

*Excludes cash on hand

High grade cash and cash equivalents are short-term placements and working cash fund placed, invested, or deposited in foreign and local banks belonging to the top ten (10) banks, including an affiliated bank, in the Philippines in terms of resources and profitability.

Other high grade accounts are accounts considered to be high value. The counterparties have a very remote likelihood of default and have consistently exhibited good paying habits.

Standard grade accounts are active accounts with minimal to regular instances of payment default, due to ordinary/common collection issues. These accounts are typically not impaired as the counterparties generally respond to credit actions and update their payments accordingly.

Substandard grade accounts are accounts which have probability of impairment based on historical trend. These accounts show propensity to default in payment despite regular follow-up actions and extended payment terms.

d. Aging analysis

An aging analysis of the Group's past due or individually impaired receivables as of December 31, 2018 and 2017 are as follows:

	2018					
	Past Due But Not Impaired				Impaired Financial Assets	Total
	Less than 30 Days	30 to 60 Days	60 to 90 Days	Over 90 Days		
Trade receivables	₱1,696,079,869	₱204,326,180	₱116,597,861	₱565,395,549	₱146,174,003	₱2,728,573,462

Liquidity risk

Liquidity risk is the risk of not being able to meet funding obligation such as the repayment of liabilities or payment of asset purchases as they fall due. The Group's liquidity management involves maintaining funding capacity to finance capital expenditures and service maturing debts, and to accommodate any fluctuations in asset and liability levels due to changes in the Group's business operations or unanticipated events created by customer behavior or capital market conditions. The Group maintains a level of cash and cash equivalents deemed sufficient to finance its operations. It also maintains a portfolio of highly marketable and diverse financial assets that assumed to be easily liquidated in the event of an unforeseen interruption of cash flow. The Group also has committed lines of credit that it can access to meet liquidity needs. As part of its liquidity risk management, the Group regularly evaluates its projected and actual cash flows. It also continuously assesses conditions in the financial markets for opportunities to pursue fund raising activities. Fund raising activities may include obtaining bank loans and capital market issues both onshore and offshore.

Maturity Profile of Financial Liabilities

The tables below summarize the maturity profile of the Group's financial liabilities as of December 31, 2018 and 2017 based on the remaining undiscounted contractual cash flows.

	2018				Total
	On Demand	1 to 3 Months	3 to 12 Months	1 to 5 Years	
Financial liabilities at amortized cost:					
Accounts payable and other accrued liabilities:

**Excludes statutory liabilities

Market risk

Market risk is the risk of loss to future earnings, to fair value or future cash flows of a financial instrument as a result of changes in its price, in turn caused by changes in interest rates, foreign currency exchange rates, equity prices and other market factors.

Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency other than the functional currency in which they are measured.

The Group has transactional currency exposures. Such exposures arise from sales and purchases in currencies other than the entities' functional currency. For the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, approximately 34.8%, 34.3% and 34.2% of the Group's total sales, respectively, are denominated in currencies other than the functional

currency. In addition, 3.0% and 4.3% of the Group's debt is denominated in US Dollars as of December 31, 2018 and 2017, respectively.

The Group estimates a reasonably possible change of +5.00 in the US Dollar to Philippine Peso exchange rate would have an impact of approximately ₱81.4 million and ₱161.3 million on income before income tax for the years ended December 31, 2018 and 2017, respectively. An equal change in the opposite direction would have decreased income before income tax by the same amount.

The impact of the range of reasonably possible changes in the exchange rates of the other currencies against the Philippine Peso on the Group's income before income tax as of December 31, 2018 and 2017 are deemed immaterial.

The exchange rates used to restate the US dollar-denominated financial assets and liabilities were ₱52.58 to US\$1.00 and ₱49.93 to US\$1.00 as of December 31, 2018 and 2017, respectively.

Equity price risk

Equity price risk is the risk that the fair values of equities will change as a result of changes in the levels of equity indices and the value of individual stocks.

The table below shows the effect on equity as a result of a change in the fair value of equity instruments held as financial assets at FVPL investments due to reasonably possible changes in equity indices:

	2018		2017	
Changes in PSEi	21.20%	(21.20%)	12.33%	(12.33%)
Change in trading gain (loss) at equity portfolio	₱59,232,482	(₱59,232,482)	₱21,906,081	(₱21,906,081)
As a percentage of the Parent Company's trading gain for the year	(59.81%)	59.81%	(324.18%)	324.18%

The Group's investment in golf shares designated as financial assets at FVOCI/AFS financial assets are susceptible to market price risk arising from uncertainties about future values of the investment security. The Group's estimates an increase of 1.00% would have an impact of approximately ₱0.5 million on equity for the year ended December 31, 2018 and 2017. An equal change in the opposite direction would have decreased equity by the same amount.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to the subsidiaries' long-term debt obligations which are subject to floating rate. The Group's policy is to manage its interest cost using a mix of fixed and variable rate debt.

The following tables show information about the Group's financial instruments that are exposed to interest rate risk and presented by maturity profile:

2018									
	<1 year	>1-<2 years	>2-<3 years	>3-<4 years	>4-<5 years	Total	Total (in Philippine Peso)	Debt Issuance Costs (in Philippine Peso)	Carrying Value (in Philippine Peso)
Liabilities:									
Foreign currencies:									
<i>Floating rate</i>									
Australian Dollar loan	AUS\$13,625,723	AUS\$13,700,180	AUS\$494,387,449	AUS-	AUS-	AUS\$521,713,352	₱17,922,355,336	₱179,697,514	₱17,742,657,822
Interest rate: BBSY Bid+1.25%									
New Zealand Dollar loans	NZ\$12,753,563	NZ\$12,580,750	NZ\$12,649,875	NZ\$12,615,313	NZ\$407,511,625	NZ\$458,111,126	13,924,974,927	210,508,867	13,714,466,060
Interest rate: NZ BKBM+1.10%									
							₱31,847,330,263	₱390,206,381	₱31,457,123,882
2017									
	<1 year	>1-<2 years	>2-<3 years	>3-<4 years	>4-<5 years	Total	Total (in Philippine Peso)	Debt Issuance Costs (in Philippine Peso)	Carrying Value (in Philippine Peso)
Liabilities:									
Foreign currencies:									
<i>Floating rate</i>									
Australian Dollar loan	AUS\$13,251,758	AUS\$13,179,542	AUS\$13,215,650	AUS\$494,081,575	AUS-	AUS\$533,728,525	₱18,772,656,535	₱250,622,686	₱18,522,033,849
Interest rate: BBSY Bid+1.25%									
New Zealand Dollar loans	NZ\$16,205,992	NZ\$435,180,958	NZ\$-	NZ\$-	NZ\$-	NZ\$451,386,950	14,808,699,804	104,771,265	14,703,928,539
Interest rate: NZ BKBM+1.60%									
							₱33,581,356,339	₱355,393,951	₱33,225,962,388

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on the long-term debts. With all other variables held constant, the Group's income before tax is affected through the impact on floating rate borrowings, as follows:

	Change in basis points	Effect on income before tax
2018	+100	(P320,970,394)
	-100	320,970,394
2017	+100	(P323,797,776)
	-100	323,797,776

5. Fair Value Measurement

The following methods and assumptions were used to estimate the fair value of each asset and liability for which it is practicable to estimate such value:

Cash and cash equivalents, receivables (except amounts due from and due to related parties), accounts payable and other accrued liabilities, short-term debts and trust receipts payable.

Carrying amounts approximate their fair values due to the relatively short-term maturities of these instruments.

Amounts due from and due to related parties

Carrying amounts of due from and due to related parties which are payable and due on demand approximate their fair values.

Financial assets at FVTPL, derivatives and financial assets at FVOCI/AFS investments

Fair values of quoted equity securities are based on quoted prices published in markets.

Biological assets

Biological assets are measured at their fair values less costs to sell. The fair values of Level 2 biological assets are determined based on current market prices of livestock of similar age, breed and genetic merit while Level 3 are determined based on adjusted commercial farmgate prices. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market.

The Group has determined that the highest and best use of the sucklings and weanlings is finishers while for other biological assets is their current use.

Investment properties

Fair value of investment properties is based on market data (or direct sales comparison) approach. This approach relies on the comparison of recent sale transactions or offerings of similar properties which have occurred and/or offered with close proximity to the subject property.

The fair values of the Group's investment properties have been determined by appraisers in 2017, including independent external appraisers, on the basis of the recent sales of similar properties in the same areas as the investment properties and taking into account the economic conditions prevailing at the time of the valuations are made.

The Group has determined that the highest and best use of the property used for the land and building is its current use.

Long-term debts

The fair value of long-term debts are based on the discounted value of future cash flows (interests and principal) using market rates plus a certain spread.

Fair Value Measurement Hierarchy for Assets and Liabilities

	December 31, 2018

	₱512,580,851	₱466,600,851	₱45,980,000	₱-	₱512,580,851
Non-financial assets					
Biological assets (Note 14)	₱1,678,576,389	₱-	₱477,232,582	₱1,201,343,807	₱1,678,576,389
Assets for which fair values are disclosed					
Investment properties (Note 17)	₱45,288,139	₱-	₱-	₱337,579,000	₱337,579,000
Liabilities for which fair values are disclosed					
Long-term debts (Note 20)	₱33,225,962,388	₱-	₱-	₱33,402,588,509	₱33,402,588,509

For the years ended December 31, 2018 and 2017, there were no transfers between Level 1 and Level 2 fair value measurements. Non-financial assets determined under Level 3 include investment properties and biological assets. No transfers between any level of the fair value hierarchy took place in the equivalent comparative period.

Descriptions of significant unobservable inputs to valuation of biological assets and investment properties under level 3 of the fair value category follow:

Account	Valuation Technique	Significant Unobservable Inputs
Biological assets	Adjusted commercial farmgate prices	Commercial farmgate prices
Investment properties	Market data approach and Cost approach	Price per square meter, size, shape, location, time element, replacement cost and depreciation for improvements

Significant increases (decreases) in reasonable profit margin applied would result in a significantly higher (lower) fair value of the biological assets.

Significant unobservable inputs

Size	Size of lot in terms of area. Evaluate if the lot size of property or comparable conforms to the average cut of the lots in the area and estimate the impact of the lot size differences on land value.
Shape	Particular form or configuration of the lot. A highly irregular shape limits the usable area whereas an ideal lot configuration maximizes the usable area of the lot which is associated in designing an improvement which conforms with the highest and best use of the property.
Location	Location of comparative properties whether on a main road, or secondary road. Road width could also be a consideration if data is available. As a rule, properties located along a main road are superior to properties located along a secondary road.
Time element	An adjustment for market conditions is made if general property values have appreciated or depreciated since the transaction dates due to inflation or deflation or a change in investor's perceptions of the market over time. In which case, the current data is superior to historic data.
Replacement cost	Estimated amount of money needed to replace in like kind and in new condition an asset or group of assets, taking into consideration current prices of materials, labor, contractor's overhead, profit and fees, and all other attendant costs associated with its acquisition and installation in place without provision for overtime or bonuses for labor, and premiums for materials.
Depreciation	Depreciation as evidenced by the observed condition in comparison with new units of like kind tempered by consideration given to extent, character, and utility of the property which is to be continued in its present use as part of a going concern but without specific relations to earnings.
Adjusted commercial farmgate prices	Fair value based on commercial farmgate prices, adjusted by considering the age, breed and genetic merit

6. Business Segment Information

The Group's operating segments are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The Group has four (4) reportable operating segments as follows:

- The branded consumer food products segment manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, bakery products, beverages, instant noodles and pasta. This segment also includes the packaging division, which manufactures BOPP films primarily used in packaging; and its subsidiary, which manufactures flexible packaging materials for the packaging requirements of various branded food products. Its revenues are in their peak during the opening of classes in June and Christmas season.
- The agro-industrial products segment engages in hog and poultry farming, manufacturing and distribution of animal feeds, glucose and soya products, and production and distribution of animal health products. Its peak season is during summer and before Christmas season.
- The commodity food products segment engages in sugar milling and refining, and flour milling and pasta manufacturing and renewable energy. The peak season for sugar is during its crop season, which normally starts in November and ends in April while flour and pasta's peak season is before and during the Christmas season.
- The corporate business segment engages in bonds and securities investment and fund sourcing activities.

No operating segments have been aggregated to form the above reportable operating business segments.

Management monitors the operating results of business segments separately for the purpose of making decisions about resource allocation and performance assessment. The measure presented to manage segment performance is the segment operating income (loss). Segment operating income (loss) is based on the same accounting policies as consolidated operating income (loss) except that intersegment revenues are eliminated only at the consolidation level. Group financing (including finance costs and revenues), market valuation gain and loss, foreign exchange gains or losses, other revenues and expenses and income taxes are managed on a group basis and are not allocated to operating segments. Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

The following tables present the financial information of each of the operating segments in accordance with PFRSs except for Earnings before interest, income taxes and depreciation/amortization (EBITDA) and Earnings before interest and income taxes (EBIT) as of and for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016.

The Group's business segment information follows (amounts in thousands):

	As of and for the year ended December 31, 2018					Total
	Branded Consumer Food	Agro-Industrial	Commodity Food	Corporate Business	Eliminations	
Sale of Goods and Services

Inter-segment Revenues

Inter-segment revenues are eliminated at the consolidation level.

Segment Results

Segment results pertain to the net income (loss) of each of the operating segments excluding the amounts of market valuation gains and losses on financial assets at FVPL, foreign exchange gains and losses and other revenues and expenses which are not allocated to operating segments.

Segment Assets

Segment assets are resources owned by each of the operating segments excluding significant inter-segment transactions.

Segment Liabilities

Segment liabilities are obligations incurred by each of the operating segments excluding significant inter-segment transactions. The Group also reports to the chief operating decision maker the breakdown of the short-term and long-term debts of each of the operating segments.

Capital Expenditures

The components of capital expenditures reported to the chief operating decision maker are the additions to investment property and property plant and equipment during the period.

Geographic Information

The Group operates in the Philippines, Thailand, Malaysia, Indonesia, China, Hong Kong, Singapore, Vietnam, Myanmar, New Zealand and Australia.

The following table shows the distribution of the Group's consolidated revenues to external customers by geographical market, regardless of where the goods were produced:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
		(In Thousands)	
Domestic	₱84,566,692	₱82,137,541	₱20,372,269
Foreign	43,203,257	42,870,283	10,567,969
	₱127,769,949	₱125,007,824	₱30,940,238

The Group has no customer which contributes 10% or more of the consolidated revenues of the Group.

The table below shows the Group's carrying amounts of noncurrent assets per geographic location excluding noncurrent financial assets, deferred tax assets and pension assets:

	December 31, 2018	December 31, 2017	December 31, 2016
		(In Thousands)	
Domestic	₱33,507,048	₱30,500,080	₱27,795,757
Foreign	63,757,555	63,175,218	62,227,710
	₱97,264,603	₱93,675,298	₱90,023,467

7. Cash and Cash Equivalents

This account consists of:

	2018	2017
Cash on hand	₱75,715,245	₱103,326,491
Cash in banks (Note 34)	3,895,390,938	3,948,475,487
Short-term investments (Note 34)	9,051,995,729	10,445,715,813
	₱13,023,101,912	₱14,497,517,791

Cash in banks earn interest at the prevailing bank deposit rates. Short-term investments represent money market placements that are made for varying periods depending on the immediate cash requirements of the Group and earn interest ranging from 0.05% to 6.80%, from 0.05% to 6.50% and from 0.01% to 6.50% for foreign currency-denominated money market placements for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively. Peso-denominated money market placements, on the other hand, earn interest ranging from 1.50% to 5.50%, from 1.20% to 3.40% and from 1.10% to 2.75% for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016.

Interest earned on cash and cash equivalents amounted to ₱327.0 million, ₱212.7 million and ₱49.9 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively (see Note 29).

8. Financial Assets at Fair Value Through Profit or Loss

This account consists of investments held-for-trading amounting to ₱420.2 million and ₱455.6 million as of December 31, 2018 and 2017, respectively. Investments held-for-trading consist of quoted equity securities issued by certain domestic entities.

Market valuation on financial instruments at fair value through profit and loss amounted to ₱35.4 million loss, ₱71.0 million gain and ₱4.5 million loss for the years ended December 31, 2018 and 2017 and the three-month period ended December 31, 2016, respectively.

The Group received dividends from its quoted equity securities amounting to ₱32.3 million, ₱12.9 million and nil for the years ended December 31, 2018 and 2017 and for the three-month period ended December 31, 2016, respectively (see Note 29).

9. Derivative Financial Instruments

Derivatives designated as accounting hedge

As part of its asset and liability management, the Group uses derivatives, particularly currency option, as cash flow hedges in order to reduce its exposure to market risks.

The Group entered into currency options with a total notional amount of NZ\$28.2 million and initial fair value of ₱7.5 million. The Group recognized unrealized loss (presented under 'Other comprehensive income') amounting to ₱3.3 million and ₱11.4 million for the years ended December 31, 2018 and 2017, and unrealized gain of ₱19.2 million for the three-month period ended December 31, 2016 (see Note 23). The Group made a settlement of ₱4.6 million in 2017 for the related derivatives.

The Group's currency options have a positive fair value of ₱6.4 million and ₱11.0 million as of December 31, 2018 and 2017, respectively (see Note 12).

10. Receivables

This account consists of:

	2018	2017
Trade receivables (Note 34)	₱12,230,562,667	₱13,851,205,174
Non-trade receivables	980,754,057	871,056,230
Due from related parties (Note 34)	845,801,629	1,396,239,630
Advances to officers and employees	164,791,962	133,976,804
Interest receivable (Note 34)	9,690,349	42,299,508
Others	528,867,686	198,238,183
	14,760,468,350	16,493,015,529
Less allowance for credit losses	355,144,379	376,522,190
	₱14,405,323,971	₱16,116,493,339

Allowance for Credit Losses on Receivables

Changes in allowance for impairment losses on receivables follow:

	2018			
	Individual Assessment		Collective Assessment	
	Trade Receivables	Other Receivables	Trade Receivables	Total
Balances at beginning of the period	₱153,990,523	₱208,970,376	₱13,561,291	₱376,522,190
Provision for credit losses	12,194,872	-	5,579,236	17,774,108
Others	(39,151,919)	-	-	(39,151,919)
Balances at end of the period	₱127,033,476	₱208,970,376	₱19,140,527	₱355,144,379

	2017			
	Individual Assessment		Collective Assessment	
	Trade Receivables	Other Receivables	Trade Receivables	Total
Balances at beginning of the period	₱157,563,135	₱188,697,554	₱13,561,291	₱359,821,980
Provision for credit losses	18,553,155	-	-	18,553,155
Others	(22,125,767)	20,272,822	-	(1,852,945)
Balances at end of the period	₱153,990,523	₱208,970,376	₱13,561,291	₱376,522,190

Allowance for credit losses on other receivables includes credit losses on nontrade receivables, advances to officers and employees and other receivables. Allowance for credit losses on advances to officers and employees amounted to ₱19.6 million as of December 31, 2018 and 2017. Allowance for credit losses on other receivables amounted to ₱189.3 million as of December 31, 2018 and 2017.

11. Inventories

This account consists of inventories at cost as follows:

	2018	2017
Raw materials	₱8,573,783,243	₱6,639,193,504
Finished goods	6,153,119,351	5,247,036,948
Spare parts and supplies	4,140,804,017	3,720,707,970
Containers and packaging materials	2,111,369,788	1,969,926,603
Goods in-process	1,106,693,642	888,498,415
	₱22,085,770,041	₱18,465,363,440

Under the terms of the agreements covering liabilities under trust receipts totaling ₱6.0 billion and ₱3.2 billion as of December 31, 2018 and 2017, respectively, certain inventories which approximate the trust receipts payable, have been released to the Group under trust receipt agreement with the banks. The Group is accountable to these banks for the trusted merchandise or their sales proceeds.

Inventory obsolescence included in 'Cost of sales', amounted to ₱749.0 million, ₱638.4 million and ₱185.2 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

The Group recognized impairment losses on its inventories amounting to ₱7.9 million, ₱2.9 million and ₱0.7 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

12. Other Current Assets

This account consists of:

	2018	2017
Input value-added tax (VAT)	₱1,599,204,239	₱1,249,413,458
Advances to suppliers	1,517,145,432	1,266,652,930
Prepaid insurance	262,671,126	204,878,838
Prepaid taxes	147,684,689	85,055,881
Prepaid rent	42,096,258	51,421,481
Derivatives designated as accounting hedge (Note 9)	6,389,048	11,023,146
Other prepaid expenses	158,474,713	118,940,363
	₱3,733,665,505	₱2,987,386,097

Advances to suppliers include advance payments for the acquisition of raw materials, spare parts, packaging materials and other supplies. Also included in the account are advances made to contractors related to construction activities. These are applied against progress billings which occur within one year from the date the advances arose.

Other prepaid expenses include prepayments of advertising and office supplies.

13. Property, Plant and Equipment

In July 2018, CFC Corporation executed a Memorandum of Agreement and Deed of Absolute Sale with a related party, selling its parcel of land costing ₱3.4 million at ₱584.9 million selling price. Gain on disposal attributable to sale was ₱581.5 million, which was recognized under 'Other income (loss) - net' in the consolidated statements of income.

In May 2017, Century Pacific Food Inc. (CNPF) entered into an asset purchase agreement with the Parent Company to purchase the machineries and equipment used in manufacturing the Hunt's branded products for a total consideration of ₱145.1 million, net of tax. As of date of sale, the net book value of these assets amounted to ₱28.1 million. The Group recognized gain on disposal amounting to ₱117.0 million, under 'Other income (loss) - net' in the consolidated statements of income. The sale was completed on August 31, 2017.

CNPF also entered into a Compensation Agreement with the Parent Company to acquire the exclusive right to manufacture and sell Hunt's branded products amounting to ₱214.2 million which the Group recognized in the consolidated statements of income.

In January 2017, the Parent Company executed a Memorandum of Agreement and Deed of Absolute Sale with a related party, selling its three parcels of land costing ₱1.0 million for a total consideration of ₱111.3 million. Gain on disposal attributable to the sale amounted to ₱110.3 million, which was recognized under 'Other income (loss) - net' in the consolidated statements of income.

Borrowing Costs

For the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, no borrowing costs have been incurred related to property, plant and equipment under construction.

Depreciation

The breakdown of consolidated depreciation and amortization of property, plant and equipment follows:

	December 31, 2018	December 31, 2017	December 31, 2016
	(One Year)	(One Year)	(Three Months)
Cost of sales (Note 24)	₱5,444,705,459	₱5,270,962,412	₱1,300,783,837
Selling and distribution costs (Note 25)	219,016,116	162,600,854	37,436,876
General and administrative expenses (Note 26)	502,459,358	483,418,814	116,437,087
	₱6,166,180,933	₱5,916,982,080	₱1,454,657,800

Collateral

As of December 31, 2018 and 2017, the Group has no property and equipment that are pledged as collateral.

14. Biological Assets

Total biological assets shown in the consolidated statements of financial position follow:

	2018	2017
Current portion	P741,719,637	P1,180,266,509
Noncurrent portion	366,184,414	498,309,880
	P1,107,904,051	P1,678,576,389

These biological assets consist of:

	2018	2017
Swine livestock		
Commercial	P709,045,374	P1,137,959,568
Breeder	278,316,362	435,698,306
Poultry livestock		
Commercial	32,674,263	42,306,941
Breeder	87,868,052	62,611,574
	P1,107,904,051	P1,678,576,389

The rollforward analysis of this account follows:

	2018	2017
Balance at beginning of year	P1,678,576,389	P1,383,379,248
Additions	3,200,666,651	3,115,220,274
Disposals	(3,303,867,014)	(2,938,864,205)
Gain (loss) arising from changes in fair value less estimated costs to sell	(467,471,975)	118,841,072
Balance at end of year	P1,107,904,051	P1,678,576,389

The Group has 232,724 and 239,438 heads of swine livestock and 731,177 and 435,946 heads of poultry livestock as of December 31, 2018 and 2017, respectively.

15. Goodwill and Intangible Assets

The movements of goodwill follow:

	2018	2017
Cost		
Balance at beginning and end of year	P31,460,215,108	P31,460,215,108
Accumulated impairment losses		
Balance at beginning of year	248,139,704	248,139,704
Additional impairment during the year	17,579,587	-
Balance at end of year	265,719,291	248,139,704
Net book value at end of year	P31,194,495,817	P31,212,075,404

The Group's goodwill pertains to the following:

	2018	2017
Acquisition of CSPL in September 2016	₱16,492,854,332	₱16,492,854,332
Acquisition of NZSFHL in November 2014	13,913,396,261	13,913,396,261
The excess of the acquisition cost over the fair values of the net assets acquired by UABCL in 2000	775,835,598	775,835,598
Acquisition of Balayan Sugar Mill in February 2016	12,409,626	12,409,626
Acquisition of Advanson in December 2007	-	17,579,587
	₱31,194,495,817	₱31,212,075,404

As of December 31, 2018, the goodwill from the acquisition of Advanson amounting to ₱17.6 million was fully impaired.

The composition and movements of intangible assets follow:

Trademarks and product formulation were acquired from General Milling Corporation in 2008. Total intangible assets acquired from the acquisition of CSPL and NZSFHL in 2016 and 2014 were composed of brands of ₱9.3 billion, customer relationships of ₱2.2 billion and software costs of ₱56.3 million.

The Group performed its annual impairment test on its goodwill and other intangible assets with indefinite useful lives as of December 31, 2018 and 2017. The recoverable amounts of goodwill and other intangible assets were determined based on value in use calculations using cash flow projections from financial budgets approved by management covering a five-year period. The pre-tax discount rates applied to cash flow projections range from 7.80% to 10.80% and from 3.40% to 12.67% for the years ended December 31, 2018 and 2017, respectively. The following assumptions were also used in computing value in use:

Growth rate estimates - growth rates include long-term and terminal growth rates that are based on experiences and strategies developed for the various subsidiaries. The prospect for the industry was also considered in estimating the growth rates. Growth rates used in computing the projected future cash flows ranged from 2.0% to 12.1% as of December 31, 2018 and 2017.

Discount rates - discount rates were estimated based on the industry weighted average cost of capital, which includes the cost of equity and debt after considering the gearing ratio.

Management believes that no reasonably possible changes in any of the above key assumptions would cause the carrying values of goodwill and intangible assets arising from the Group's acquisitions to materially exceed their recoverable amounts.

16. Investments in Joint Ventures

The rollforward analysis of this account follows:

	2018	2017
Acquisition Cost		
Balance at beginning of year	P1,147,543,071	P746,250,000

Net Book Value at End of Year	P520,917,509	P552,226,288

Proper Snack Foods Ltd.

On June 30, 2017, Griffins purchased 50.1% of the shares in Proper Snack Foods Ltd. (PSFL) (a Nelson based business with the 49.9% shareholder being an individual) for a total consideration of approximately NZ\$7.8 million (P275.3 million), which includes deferred consideration amounting to NZ\$1.5 million (P51.5 million) recorded in the consolidated statement of financial position.

Vitasoy-URC, Inc.

On October 4, 2016, the Parent Company entered into a joint venture agreement with Vita International Holdings Limited, a corporation duly organized in Hong Kong to form Vitasoy - URC (VURCI), a corporation duly incorporated and organized in the Philippines to manufacture and distribute food products under the “Vitasoy” brand name, which is under exclusive license to VURCI in the Philippines.

On January 31, 2018, the Parent Company made an additional subscription to the unissued authorized capital stock of VURCI consisting of 29,000,000 common shares for a total cost of ₱290.0 million.

On May 31, 2017, the Parent Company made additional subscriptions to the unissued authorized capital stock of VURCI consisting of 12,600,000 common shares for a total cost of ₱126.0 million.

Danone Universal Robina Beverages, Inc.

On May 23, 2014, the Parent Company entered into a joint venture agreement with Danone Asia Holdings Pte. Ltd., a corporation duly organized in the Republic of Singapore to form Danone Universal Robina Beverages, Inc. (DURBI), a corporation duly incorporated and organized in the Philippines to manufacture and distribute food products under the “B’lue” brand name, which is under exclusive license to DURBI in the Philippines.

In 2018, the Parent Company made additional subscriptions to the unissued authorized capital stock of DURBI consisting of 5,000,000 common shares for a total cost of ₱82.5 million. The capital infusion was not presented as additional investment but was applied to the 2017 excess of the share in net loss over the investment.

Equity in net losses in the 2017 consolidated statement of income amounting to ₱280.5 million includes the excess of the share in net loss over the investment in DURBI amounting to ₱147.6 million presented in ‘Other noncurrent liabilities.’

Calbee-URC, Inc.

On January 17, 2014, the Parent Company entered into a joint venture agreement with Calbee, Inc., a corporation duly organized in Japan to form Calbee-URC, Inc. (CURCI), a corporation duly incorporated and organized in the Philippines to manufacture and distribute food products under the “Calbee Jack ‘n Jill” brand name, which is under exclusive license to CURCI in the Philippines.

In September 2018, the Parent Company entered into a share purchase agreement with its joint venture partner, Calbee, Inc., to sell the latter’s 50% equity interest in CURCI for a total consideration of ₱171.0 million, which approximates the fair values of identifiable net assets acquired. The purchase of the additional 50% shares will allow the Parent Company to have full control of CURCI, consistent with its agenda of driving an aligned and scalable snacking category growth. As a result of the sale, CURCI became a wholly-owned subsidiary of the Parent Company.

Calbee-URC Malaysia

On August 23, 2017, URC Malaysia entered into a joint venture agreement with Calbee, Inc., a corporation duly organized in Japan to form Calbee-URC Malaysia Sdn Bhd (CURM), a corporation registered with the Companies Commission of Malaysia organized to manufacture savoury snack products. Total consideration amounted to MYR2.7 million (₱34.3 million).

Hunt-Universal Robina Corporation

The Parent Company has an equity interest in Hunt-Universal Robina Corporation (HURC), a domestic joint venture which is a jointly controlled entity. HURC manufactures and distributes food products under the “Hunt’s” brand name, which is under exclusive license to HURC in the Philippines.

In 2017, the Parent Company entered into certain agreements with CNPF to sell its rights, title and interest in the assets used in manufacturing the hunt’s business, as well as pre-termination of the right to manufacture, sell and distribute Hunt’s products (see Note 13). Subsequent to the sale, HURC remains to exist as a jointly controlled entity.

On January 11, 2017, HURC’s BOD declared cash dividends amounting to ₱13.20 per share to stockholders of record as of September 30, 2016. Total dividends declared amounted to ₱37.0 million, which was paid on the third quarter of calendar year 2017.

In September 2018, the Parent Company entered into a share purchase agreement with its joint venture partner, ConAgra Grocery Products Company, LLC., to sell the latter’s 50% equity interest in HURC for a total consideration of ₱3.2 million, which approximates the fair values of identifiable net assets acquired. A loss of ₱55.6 million was recognized under “Other income (loss) - net” account in the 2018 consolidated statement of income as a result of the remeasurement of the 50% previously held interest in HURC. The acquisition of the HURC shares of ConAgra will result in the Parent Company having full control of HURC and will allow URC to integrate and simplify its business operations as part of its Philippine business portfolio. As a result of the sale, HURC became a wholly-owned subsidiary of URC.

As of December 31, 2018 and 2017, the Parent Company has the following percentage of ownership of shares in its joint ventures and its related equity in the net assets are summarized below:

	Place of Business	Percentage of Ownership		Equity in Net Assets (in MM)	
		2018	2017	2018	2017
VURCI	Philippines	50.00	50.00	₱199.0	₱31.6
DURBI	-do-	50.00	50.00	—	—
PSFL	New Zealand	50.10	50.10	293.3	279.6
CURM	Malaysia	50.00	50.00	34.7	—
HURC*	Philippines	100.00	50.00	—	56.8
CURCI*	-do-	100.00	50.00	—	184.2

* No 2018 equity in net assets presented as both HURC and CURCI are subsidiaries of the Parent Company as of December 31, 2018

Summarized financial information in respect of the Group’s joint ventures as of December 31, 2018 and 2017 are presented below (in thousands).

	CURM		DURBI		VURCI		PSFL		HURC*		CURCI*

* No 2018 financial information presented as both HURC and CURCI are subsidiaries of the Parent Company as of December 31, 2018

The summarized financial information presented above represents amounts shown in the joint ventures’ financial statements prepared in accordance with PFRSs.

The joint venture companies are private companies and there are no quoted prices available for their shares.

The Group received dividends from its joint ventures amounting to ₱18.5 million for the year ended December 31, 2017. No dividends were declared and received for the year ended December 31, 2018 and for the three-month period ended December 31, 2016.

As of December 31, 2018 and 2017, there were no agreements entered into by the joint ventures that may restrict dividends and other capital distributions to be paid, or loans and advances to be made or repaid to or from the Group. In addition, the Group has no share on commitments and contingencies of its joint ventures.

Investments in Subsidiaries

The summarized financial information (before inter-company eliminations) of NURC, a subsidiary with material non-controlling interest follows (in thousands):

	2018	2017
Current assets	₱1,388,075	₱1,712,589
Noncurrent assets	1,193,411	973,148
Current liabilities	1,769,632	1,789,532
Noncurrent liabilities	20,512	14,488
Revenue	5,755,858	5,102,875
Costs and expenses	4,935,042	4,334,291
Net income	601,600	559,264

The equity interest held by non-controlling interest in NURC, a subsidiary with material non-controlling interest is 49.0% as of December 31, 2018 and 2017.

The accumulated non-controlling interest as of December 31, 2018 and 2017 amounted to ₱202.3 million and ₱282.8 million, respectively.

The profit allocated to non-controlling interest for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016 amounted to ₱258.5 million, ₱264.8 million and ₱47.5 million, respectively.

17. Other Noncurrent Assets

This account consists of:

	2018	2017
Deposits	₱766,539,097	₱576,377,057
Input VAT	634,328,645	666,011,121
Financial assets at FVOCI	50,300,000	-
AFS financial assets	-	45,980,000
Investment properties	36,384,879	45,288,139
Pension asset (Note 31)	15,589,696	-
Others	65,176,266	60,846,060
	₱1,568,318,583	₱1,394,502,377

Deposits

Deposits pertain to the Group's deposits made in connection with the installation of power water meters, deposits on returnable containers and security deposits for operating leases of plants, warehouses and office buildings.

Input VAT

Input tax pertains to VAT from purchases and/or importations of various parts, supplies, equipment, machineries and or capital goods, which will be claimed as credit against output tax liabilities in a manner prescribed by pertinent revenue regulations.

Financial Assets at FVOCI/AFS Financial Assets

As of December 31, 2018 and 2017, financial assets at FVOCI/AFS financial assets consists of equity securities with the following movement:

	2018	2017
Balance at beginning of period	₱45,980,000	₱43,030,000
Changes in fair value during the period	4,320,000	2,950,000
Balance at end of period	₱50,300,000	₱45,980,000

Fair value changes of financial assets at FVOCI/AFS financial assets are presented as components of 'Other comprehensive income' in Equity (see Note 23).

Investment Properties

The rollforward analysis of investment properties follows:

	2018	2017
Cost		
Balance at beginning of period	₱107,947,364	₱107,947,364
Reclassification to property, plant and equipment	(13,392,698)	-
Balance at end of period	94,554,666	107,947,364
Accumulated depreciation		
Balance at beginning of period	62,659,225	59,001,439
Depreciation (Notes 26 and 27)	3,286,562	3,657,786
Reclassification to property, plant and equipment	(7,776,000)	-
Balance at end of period	58,169,787	62,659,225
Net book value at end of period	₱36,384,879	₱45,288,139

The investment properties consist of buildings and building improvements which are leased out to related and third parties (see Notes 34 and 36).

Total rental income earned from investment properties (included under 'Other income (loss) - net' in the consolidated statements of income) amounted to ₱61.2 million, ₱57.9 million and ₱19.2 million for years ended December 31, 2018 and 2017 and the three-month period ended December 31, 2016, respectively.

Direct operating expenses (included under 'General and administrative expenses' in the consolidated statements of income) arising from investment properties amounted to ₱0.8 million for the years ended December 31, 2018 and 2017, and nil for the three-month period ended December 31, 2016.

Collateral

As of December 31, 2018 and 2017, the Group has no investment properties that are pledged as collateral.

18. Short-term Debts

This account consists of:

	2018	2017
Thai Baht denominated loans - unsecured with interest ranging from 2.16% to 2.40% and from 2.10% to 2.25% for the years ended December 31, 2018 and 2017, respectively	₱1,467,098,720	₱1,629,389,107
Peso-denominated loan - unsecured with interest of 5.55%	600,000,000	-
Malaysian Ringgit denominated loan - unsecured with interest at 4.62% and 4.43% for the years ended December 31, 2018 and 2017, respectively	394,286,386	379,928,804
	₱2,461,385,106	₱2,009,317,911

Accrued interest payable on the Group's short-term debts (included under 'Accounts payable and other accrued liabilities' in the consolidated statements of financial position) amounted to ₱5.7 million and ₱2.4 million as of December 31, 2018 and 2017, respectively. Interest expense from the short-term debts amounted to ₱134.9 million, ₱66.6 million and ₱14.0 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively (see Note 30).

19. Accounts Payable and Other Accrued Liabilities

This account consists of:

	2018	2017
Trade payables (Note 34)	₱13,531,720,134	₱12,344,609,082
Accrued expenses	7,159,227,021	7,532,671,219
VAT payable	758,822,733	680,883,835
Customers' deposits	496,197,812	398,004,745
Advances from stockholders (Note 34)	247,216,898	243,600,509
Withholding taxes payable	236,709,093	186,762,222
Due to related parties (Note 34)	164,624,582	106,452,798
Others	172,241,254	78,134,146
	₱22,766,759,527	₱21,571,118,556

Trade payables are noninterest-bearing and are normally settled on 30-60 day terms. Trade payables arise from purchases of inventories which include raw materials and indirect materials (i.e., packaging materials) and supplies, for use in manufacturing and other operations.

Customers' deposits represent downpayments for the sale of goods or performance of services which will be applied against accounts receivables upon delivery of goods or rendering of services.

The accrued expenses account consists of:

	2018	2017
Advertising and promotions	₹3,988,888,494	₹4,656,850,277
Personnel costs	958,392,371	1,006,743,561
Freight and handling costs	341,656,474	251,248,221
Utilities	335,649,820	296,217,865
Contracted services	278,581,376	384,401,569
Rent	252,144,351	366,344,003
Professional and legal fees	121,959,369	9,056,533
Others	881,954,766	561,809,190
	₹7,159,227,021	₹7,532,671,219

Customers' deposits represent downpayments for the sale of goods or performance of services which will be applied against accounts receivables upon delivery of goods or rendering of services.

Accrued professional and legal fees include fees or services rendered by third party consultants for the review of the Group's brand portfolio in 2018. The related expense recognized under 'Other income (expense) - net' in the 2018 consolidated statement of income amounted to ₹341.5 million.

Others include accruals for taxes and licenses, interest expense and other benefits.

20. Long-term Debts

This account consists of:

	2018			2017		
	Principal	Unamortized debt issuance cost	Net	Principal	Unamortized debt issuance cost	Net
URC AU FinCo Loan	₹17,922,355,336	₹179,697,514	₹17,742,657,822	₹18,772,656,535	₹250,622,686	₹18,522,033,849
URC NZ FinCo Loan	13,924,974,927	210,508,867	13,714,466,060	14,808,699,804	104,771,265	14,703,928,539
	₹31,847,330,263	₹390,206,381	₹31,457,123,882	₹33,581,356,339	₹355,393,951	₹33,225,962,388

URC AU FinCo Loan due 2021

On September 30, 2016, URC AU FinCo entered into a syndicated term loan facility agreement guaranteed by the Parent Company payable in five years, amounting to AU\$484.2 million (₹17.9 billion), with various banks for payment of acquisition costs and to refinance certain indebtedness of an acquired company, CSPL. The loan obtained bears a market interest rate plus a certain spread, payable quarterly, maturing on September 30, 2021.

URC NZ FinCo NZ\$395 Million Term Loan due 2023

On October 22, 2018, URC NZ FinCo entered into a term loan facility agreement guaranteed by the Parent Company payable in five years, amounting to NZ\$395.0 million (₹14.4 billion), with various banks for payment of the NZ\$420 million term loan due in 2019. The loan obtained bears a market interest rate plus a certain spread, payable quarterly, and maturing on October 22, 2023.

URC NZ FinCo NZ\$420 Million Term Loan due 2019

On November 13, 2014, URC NZ FinCo entered into a term loan facility agreement guaranteed by the Parent Company payable in five years, amounting to NZ\$420.0 million (₹12.6 billion), with various banks for payment of acquisition costs and to refinance certain indebtedness of an acquired

company, NZSFHL. The loan obtained bears a market interest rate plus a certain spread, payable quarterly, and maturing on November 13, 2019.

In October 2018, URC NZ FinCo prepaid its 5-year term loan under Clause 7.1 of the underlying Facility Agreement at face value plus accrued interest. Total payment amounted to NZ\$423.8 million (approximately ₪15.5 billion), which includes accrued interest. The prepayment resulted in the recognition of the unamortized debt issue costs of US\$1.7 million (approximately ₪61.6 million) as expense presented under 'Finance costs' which represents the difference between the settlement amount and the carrying value of the loan at the time of settlement (see Note 30).

These long-term loans have no collateral but are all guaranteed by the Parent Company.

For the URC NZ FinCo and URC AU FinCo loans, the Group is required to maintain consolidated debt to equity ratio of not greater than 2.5 to 1.0. The Group has complied with all of its debt covenants as of December 31, 2018 and 2017.

21. Other Noncurrent Liabilities

This account consists of:

	2018	2017
Net pension liability (Note 31)	₪21,967,651	₪170,807,825
Miscellaneous (Note 16)	265,889,830	296,938,666
	₪287,857,481	₪467,746,491

Miscellaneous includes asset retirement obligation and other noncurrent liabilities.

Asset retirement obligation arises from obligations to restore the leased manufacturing sites, warehouses and offices of CSPL at the end of the respective lease terms. These provisions are calculated as the present value of the estimated expenditures required to remove any leasehold improvements. These costs are currently capitalized as part of the cost of the plant and equipment and are amortized over the shorter of the lease term and the useful life of assets.

As of December 31, 2018 and 2017, the carrying value of asset retirement obligation amounted to ₪91.3 million and ₪94.7 million, respectively. The amortization of this asset retirement obligation (included under 'Finance costs' in the consolidated statement of income) amounted to ₪3.5 million, ₪3.4 million and ₪0.5 million for the years ended December 31, 2018 and 2017, and the three months period ended December 31, 2016, respectively (see Note 30).

22. Equity

The details of the Parent Company's common stock as of December 31, 2018 and 2017 follows:

	2018	2017
Authorized shares	2,998,000,000	2,998,000,000
Par value per share	₱1.00	₱1.00
Issued shares:		
Balance at beginning of year	2,227,638,933	2,227,638,933
Issuance during the year	2,521,257	-
Balance at end of year	2,230,160,190	2,227,638,933
Outstanding shares	2,204,161,868	2,204,161,868

The paid-up capital of the Parent Company consists of the following:

	2018	2017
Common stock	₱2,230,160,190	₱2,227,638,933
Additional paid-in capital	21,191,974,542	20,856,143,110
Total paid-up capital	₱23,422,134,732	₱23,083,782,043

Capital Management

The primary objective of the Group's capital management is to ensure that it maintains healthy capital ratios in order to support its business and maximize shareholder value. The Group manages its capital structure and makes adjustments to these ratios in light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividend payment to shareholders, return capital structure or issue capital securities. No changes have been made in the objective, policies and processes as they have been applied in previous years.

The Group monitors its use of capital structure using a debt-to-capital ratio which is gross debt divided by total capital. The Group includes within gross debt all interest-bearing loans and borrowings, while capital represents total equity.

Following is a computation of the Group's debt-to-capital ratio:

	December 31, 2018	December 31, 2017	December 31, 2016
(a) Short-term debts (Note 18)	₱2,461,385,106	₱2,009,317,911	₱1,431,890,655
Trust receipts payable (Note 11)	6,019,613,469	3,155,187,680	4,554,101,456
Long-term debts (Note 20)	31,457,123,882	33,225,962,388	31,366,592,785
	₱39,938,122,457	₱38,390,467,979	₱78,352,584,896
(b) Capital	₱83,993,479,270	₱81,686,012,597	₱78,849,254,753
(c) Debt-to-capital ratio (a/b)	0.48:1	0.47:1	0.47:1

The Group's policy is to not exceed a debt-to-capital ratio of 2:1. The Group considers its total equity as capital.

Cumulative Redeemable Preferred Shares

The Group's authorized preferred shares of stock are 12.00% cumulative, nonparticipating, and nonvoting. In case of dissolution and liquidation of the Parent Company, the holders of the preferred shares shall be entitled to be paid an amount equal to the par value of the shares or ratably insofar as the assets of the Parent Company may warrant, plus accrued and unpaid dividends thereon, if any, before the holders of the common shares of stock can be paid their liquidating dividends. The authorized preferred stock is 2,000,000 shares at par value of ₱1.00 per share. There have been no issuances of preferred stock as of December 31, 2018 and 2017.

Retained Earnings

Accumulated equity in net earnings of the subsidiaries

A portion of the Group's retained earnings corresponding to the undistributed net earnings of the subsidiaries and joint ventures amounting to ₱53.2 billion and ₱49.9 billion as of December 31, 2018 and 2017, respectively, is not available for dividend declaration. This becomes available for dividend declaration upon dividend distribution by the investees.

Dividends

Details of the Group's dividend declarations follow:

Parent Company

Year	Date of declaration	Dividend per share	Total dividends	Date of record	Date of payment
2018	February 5, 2018	₱3.15	₱6.9 billion	February 26, 2018	March 22, 2018
2017	February 15, 2017	₱3.15	₱6.9 billion	March 1, 2017	March 27, 2017
2016	February 9, 2016	₱3.15	₱6.9 billion	February 29, 2016	March 28, 2016

On February 28, 2019, the Parent Company's BOD declared regular cash dividends amounting to ₱1.50 per share to stockholders of record as of March 14, 2019. On the same date, the Parent Company's BOD declared special cash dividends amounting to ₱1.65 per share to stockholders of record as of July 1, 2019. Total dividends declared amounted to ₱6.9 billion. On March 28, 2019, the regular cash dividend was paid amounting to ₱3.3 billion.

NURC

On March 23, 2018, NURC's BOD approved the declaration of cash dividends amounting to ₱690.00 million (₱3.65 per share) to stockholders of record as of December 31, 2017 payable on or before September 30, 2018.

There were no dividend declarations and dividend payments to stockholders of NURC for the year ended December 31, 2017. For the year ended December 31, 2016:

Year	Date of declaration	Dividend per share	Total dividends	Date of record	Date of payment
2016	December 22, 2016	₱1.06	₱200.0 million	September 30, 2016	March 30, 2017
2016	December 22, 2016	₱1.40	₱265.0 million	September 30, 2016	September 30, 2017

The Group intends to maintain an annual cash dividend payment ratio of 50.0% of the Group's consolidated net income from the preceding fiscal year, subject to the requirements of the applicable laws and regulations and the absence of circumstances which may restrict the payment of such dividends. The BOD may, at any time, modify such dividend payment ratio.

Appropriation of retained earnings

On December 18, 2018, the BOD approved the reversal of the appropriation of retained earnings in the aggregate amount of ₱2.5 billion, which was approved by the BOD in its resolutions adopted on September 27, 2016 and December 15, 2017.

On December 15, 2017, the BOD approved the additional appropriation of retained earnings amounting to ₱1.5 billion for capital expenditure commitments to expand capacities in the snack foods and beverage businesses across branded consumer food operations, which are expected to be completed within the next two years.

On September 27, 2016, the BOD approved the reversal of appropriated retained earnings amounting to ₱1.0 billion, which was used to fund the completion of various snack foods and beverage business projects across branded foods group. On the same date, the BOD approved the additional appropriation of retained earnings amounting to ₱2.0 billion for capital expenditure commitments to expand capacities across branded consumer and commodity foods businesses, which are expected to be completed within the next two years.

Treasury Shares

Under the Articles and Plan of Merger of CCPI with and into the Parent Company which was approved by the SEC on April 24, 2018, the Parent Company has issued 2,521,257 common shares to the stockholders of CCPI. Since CCPI is a wholly-owned subsidiary of URC, these issued shares were consequently classified as treasury shares amounting to ₱338.4 million.

On September 27, 2016, the Parent Company's BOD approved the sale of 22.7 million common shares previously held as treasury shares by way of block sale at a selling price of ₱193.45 per share, with a total gross selling proceeds amounting to ₱4.4 billion. The net cash proceeds amounting to ₱4.4 billion is net of transaction costs incurred amounting to ₱27.2 million. The proceeds of the said sale was used in relation to the acquisition of CSPL. The excess of the total consideration received over the cost amounting to ₱4.1 billion was treated as additional paid-in capital.

The Parent Company has outstanding treasury shares of 26.0 million shares (₱679.5 million) and 23.5 million shares (₱341.1 million) as of December 31, 2018 and 2017, respectively, restricting the Parent Company from declaring an equivalent amount from unappropriated retained earnings as dividends.

Equity Reserve

In December 2014, URC entered into a share purchase agreement with Nissin Foods (Asia) Pte. Ltd. to sell 14.0% of its equity interest in NURC for a total consideration of ₱506.7 million. As a result of the sale, the equity interest of URC changed from 65.0% to 51.0%. The excess of the consideration received over the carrying amount of the equity transferred to NCI amounting to ₱481.1 million is presented under "Equity reserve" in the consolidated statements of financial position.

In August 2012, the Parent Company acquired 23.0 million common shares of URCICL from International Horizons Investment Ltd for ₱7.2 billion. The acquisition of shares represented the remaining 23.00% interest in URCICL. As a result of the acquisition, the Parent Company now holds 100.00% interest in URCICL. The Group charged equity reserve from the acquisition amounting to about ₱5.6 billion presented under "Equity reserve" in the consolidated statements of financial position.

Record of Registration of Securities with SEC

Summarized below is the Parent Company's track record of registration of securities under the Securities Registration Code:

Date of offering	Type of offering	No. of shares offered	Par value	Offer price	Authorized number of shares	Issued and Outstanding Shares
February 17, 1994	Registration of authorized capital stock	–	₱1.00	₱–	1,998,000,000 common shares 2,000,000 preferred shares	–
February 23, 1994	Initial public offering					
	Subscribed and fully paid common shares	929,890,908	1.00	1.00	–	929,890,908
	New common shares	309,963,636	1.00	21.06	–	309,963,636
July 21, 1995	20.00% stock dividend	247,970,907	–	–	–	247,970,907
October 15, 2001	10.00% stock dividend	148,782,542	–	–	–	148,782,542
June 20, 2003	Property-for-share swap [the Parent Company shares in exchange for property of Robinsons Supermarket Corporation (RSC)]	49,871,556	–	–	–	49,871,556
December 16, 2005	Increase in authorized capital stock (payment by way of 15.00% stock dividend)	–	–	–	1,000,000,000 common shares	252,971,932

Balance at end of period	(256,522,672)	(558,125,366)	(594,056,733)
Income tax effect	76,956,802	167,437,610	178,217,020
Balance at end of period	(179,565,870)	(390,687,756)	(415,839,713)
	(150,985,870)	(390,687,756)	(415,839,713)
	₱2,334,566,528	₱492,151,622	₱1,867,734,216

The Group does not recognize income tax on cumulative translation adjustments.

The breakdown and movement of other comprehensive income attributable to non-controlling interests follows:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
<i>Item not to be reclassified to profit or loss in subsequent periods:</i>			
Remeasurement losses on defined benefit			
Plans, gross of tax:			
Balance at beginning of period	(P953,725)	(P4,566,566)	(P4,566,566)
Remeasurement gain on defined benefit plans during the period (Note 31)	(1,383,227)	3,612,841	-
Balance at end of period	(2,336,952)	(953,725)	(4,566,566)
Income tax effect	701,086	286,118	1,369,970
	(P1,635,866)	(P667,607)	(P3,196,596)

24. Sale of Goods and Services/Cost of Sales

Sale of goods and services include revenue from tolling services amounting to P241.8 million, P179.8 million and P35.6 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

Cost of sales account consists of:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Raw materials used	P61,935,144,153	P58,991,536,243	P14,179,507,687
Direct labor	6,229,393,398	5,788,350,160	1,298,162,777
Overhead costs	23,292,309,420	20,862,774,466	5,495,527,685
Total manufacturing costs	91,456,846,971	85,642,660,869	20,973,198,149
Goods in-process	(218,195,227)	3,638,910	25,170,993
Cost of goods manufactured	91,238,651,744	85,646,299,779	20,998,369,142
Finished goods	(906,082,403)	47,055,455	145,011,251
	P90,332,569,341	P85,693,355,234	P21,143,380,393

The Group's raw materials used include raw materials and container and packaging materials inventory.

Overhead costs are broken down as follows:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Utilities	P7,898,234,689	P7,576,345,534	P2,143,711,872
Depreciation and amortization (Note 27)	5,548,177,852	5,377,003,923	1,333,371,293
Personnel expenses (Note 28)	3,344,085,895	3,112,919,756	693,833,436
Repairs and maintenance	2,943,488,316	2,548,246,214	767,279,515
Security and other contracted services	722,503,684	649,866,606	152,542,298
Rental expense	523,104,472	513,373,944	123,876,139
Insurance	192,985,628	198,832,730	53,887,701
Handling and delivery charges	176,880,414	185,825,028	43,430,837
Research and development	86,766,264	82,323,639	23,745,975
Others	1,856,082,206	618,037,092	159,848,619
	P23,292,309,420	P20,862,774,466	P5,495,527,685

Others include excise taxes amounting to P1.2 billion for the year ended December 31, 2018 and nil for the year ended December 31, 2017 and three-month period ended December 31, 2016.

25. Selling and Distribution Costs

This account consists of:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Freight and other selling expenses	₱8,640,063,341	₱8,836,677,237	₱2,030,121,733

Security and contractual services	285,204,116	263,010,037	30,137,131
Taxes, licenses and fees	256,080,911	245,171,407	30,797,104
Repairs and maintenance	243,392,263	142,522,762	51,275,075
Rental expense (Note 36)	236,787,812	214,483,196	68,745,299
Professional and legal fees	217,085,528	201,415,585	93,634,485
Travel and transportation	150,412,629	160,850,872	35,127,969
Communication	122,195,855	140,911,147	25,701,864
Utilities	60,836,183	57,251,993	17,512,494
Stationery and office supplies	30,784,674	29,591,597	8,955,946
Donations and contributions	29,603,765	7,233,729	2,009,503
Others	219,812,560	215,888,303	61,290,863
	₱5,337,208,345	₱5,111,425,807	₱1,169,103,846

Others expenses include insurance, memberships, and representation and entertainment related to general and administrative functions.

27. Depreciation and Amortization

The breakdown of consolidated depreciation and amortization follows:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Cost of sales (Notes 13 and 24)	₱5,548,177,852	₱5,377,003,923	₱1,333,371,293
Selling and distribution costs (Notes 13 and 25)	219,016,116	239,982,836	56,195,739
General and administrative expenses (Notes 13, 15, 17 and 26)	602,581,876	487,076,600	117,351,532
	₱6,369,775,844	₱6,104,063,359	₱1,506,918,564

28. Personnel Expenses

This account consists of:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Salaries and wages	₱6,278,052,294	₱5,902,127,792	₱1,391,539,768
Other employee benefits	2,247,665,666	2,322,941,873	476,834,683
Pension expense (Note 31)	176,584,785	167,071,593	45,213,341
	₱8,702,302,745	₱8,392,141,258	₱1,913,587,792

The breakdown of personnel expenses follows:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Cost of sales (Note 24)	₱3,344,085,895	₱3,112,919,756	₱693,833,436
Selling and distribution costs (Note 25)	2,475,786,677	2,333,202,923	593,189,775
General and administrative expenses (Note 26)	2,882,430,173	2,946,018,579	626,564,581
	₱8,702,302,745	₱8,392,141,258	₱1,913,587,792

29. Finance Revenue

This account consists of:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Bank interest income (Note 7)	₱326,978,321	₱212,661,705	₱49,947,558
Dividend income (Note 8)	32,302,870	12,921,148	-
	₱359,281,191	₱225,582,853	₱49,947,558

30. Finance Costs

This account consists of finance costs arising from:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Long-term debts (Note 20)	₱1,354,936,980	₱1,239,928,198	₱274,309,463
Short-term debts (Note 18)	134,922,658	66,560,687	13,967,106
Net interest on net pension liability (Note 31)	8,751,555	9,068,871	3,285,987
Others (Notes 20 and 21)	163,089,200	111,772,070	47,028,764
	₱1,661,700,393	₱1,427,329,826	₱338,591,320

Others include unamortized debt issue costs recognized as expense on pretermination of NZD loan, interests incurred on liabilities under trust receipts, amortization of asset retirement obligation and other financing charges.

31. Pension Costs

The Group has a funded, noncontributory defined benefit retirement plan covering all its employees. The pension funds are being administered and managed through JG Summit Multi-Employer Retirement Plan, with Robinsons Bank Corporation (RBC) as Trustee. The plan provides for retirement, separation, disability and death benefits to its members. The Group, however, reserves the right to discontinue, suspend or change the rates and amounts of its contributions at any time on account of business necessity or adverse economic conditions. The retirement plan has an Executive Retirement Committee that is mandated to approve the plan, trust agreement, investment plan, including any amendments or modifications thereto, and other activities of the Plan. Certain members of the BOD of the Ultimate Parent Company are represented in the Executive Retirement Committee. RBC manages the funds based on the mandate as defined in the trust agreement.

Under the existing regulatory framework, Republic Act (RA) 7641, *the Philippine Retirement Pay Law*, requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity, provided however that the employee's retirement benefits under any collective bargaining and other agreements shall not be less than those provided under law. The law does not require minimum funding of the plan. The Parent Company and all of its subsidiaries meet the minimum retirement benefit under RA 7641.

Net pension asset (liability) included in the consolidated statements of financial position follow:

	2018	2017
Pension asset (Note 17)	₱15,589,696	₱-
Pension liability (Note 21)	(21,967,651)	(170,807,825)
	(₱6,377,955)	(₱170,807,825)

Changes in net defined benefit liability of funded funds of the Group are as follows:

2018													
Net benefit cost in consolidated statements of income					Remeasurements in other comprehensive income								
	January 1, 2018	Current service cost (Note 28)	Finance cost (Note 30)	Subtotal	Benefits paid	Return on plan assets (excluding amount included in net interest cost)	Actuarial changes arising from changes in experience adjustments	Actuarial changes arising from demographic assumptions	Actuarial changes arising from changes in financial assumptions	Subtotal	Contributions	Asset and Liabilities Acquired	December 31, 2018

2017													
Net benefit cost in consolidated statements of income					Remeasurements in other comprehensive income								
	January 1, 2017	Current service cost (Note 28)	Finance cost (Note 30)	Subtotal	Benefits paid	Return on plan assets (excluding amount included in net interest cost)	Actuarial changes arising from changes in experience adjustments	Actuarial changes arising from demographic assumptions	Actuarial changes arising from changes in financial assumptions	Subtotal	Contributions	Asset and Liabilities Acquired	December 31, 2017
Present value of defined benefit obligation	₱2,268,007,023	₱167,071,593	₱114,314,355	₱281,385,948	(₱269,870,853)	₱-	₱30,095,758	₱29,621,518	(₱89,206,635)	(₱29,489,359)	₱-	₱-	₱2,250,032,759
Fair value of plan assets	(2,100,343,966)	-	(105,245,484)	(105,245,484)	269,870,853	(10,054,849)	-	-	-	(10,054,849)	(133,451,488)	-	(2,079,224,934)
	₱167,663,057	₱167,071,593	₱9,068,871	₱176,140,464	₱-	(₱10,054,849)	₱30,095,758	₱29,621,518	(₱89,206,635)	(₱39,544,208)	(₱133,451,488)	₱-	₱170,807,825

The fair value of net plan assets of the Group by each classes as at the end of the reporting period are as follows:

	2018	2017
Assets		
Cash and cash equivalents (Note 34)	₱445,167,836	₱661,849,930
Loans receivable	240,570,000	-
Financial assets at FVOCI	872,101,658	-
AFS investments	-	379,861,432
Investments at amortized cost	336,285,640	-
HTM investments	-	887,146,600
Interest receivable	16,307,541	7,135,297
Prepaid taxes	759,980	197,391
Land	143,201,000	143,201,000
	2,054,393,655	2,079,391,650
Liabilities		
Accrued trust and management fees	164,603	166,716
	₱2,054,229,052	₱2,079,224,934

The costs of defined benefit pension plan as well as the present value of the pension obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. The principal assumptions used in determining pension for defined benefit plans are as follows:

	Parent Company		NURC		HURC		CCPI	
	2018	2017	2018	2017	2018	2017	2018	2017
Discount rate	7.33%	5.71%	7.31%	5.76%	7.40%	-	-	5.23%
Salary increase	5.70%	5.70%	5.70%	5.70%	5.70%	-	-	5.70%

The overall expected rate of return on assets is determined based on the market expectation prevailing on that date, applicable to the period over which the obligation is to be settled.

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation as of the reporting period, assuming all other assumptions were held constant:

	Increase (Decrease)	Parent Company		NURC		HURC		CCPI	
		2018	2017	2018	2017	2018	2017	2018	2017
Discount rate	1.00%	(₱143,013,836)	(₱167,993,526)	(₱2,452,824)	(₱2,635,011)	(₱328,428)	₱-	₱-	(₱2,836,472)
	(1.00%)	163,812,150	194,071,843	2,798,885	3,078,561	390,430	-	-	3,446,967
Salary increase	1.00%	177,988,158	206,528,263	3,022,258	3,246,644	419,502	-	-	3,564,423
	(1.00%)	(157,768,850)	(181,862,773)	(2,688,918)	(2,824,060)	(357,295)	-	-	(2,982,661)

The Group expects to contribute ₱170.5 million in the pension fund in 2019.

Shown below is the maturity analysis of the Group's expected (undiscounted) benefit payments:

	2018	2017
Less than one year	₱172,255,639	₱200,075,413
More than one year to five years	947,528,189	815,130,976
More than five years to 10 years	1,409,906,313	1,452,708,067
More than 10 years to 15 years	1,711,149,123	1,523,945,706
More than 15 years to 20 years	1,814,430,836	1,662,775,069
More than 20 years	5,100,579,845	4,718,097,211

Shown below is the average duration of the defined benefit obligation at the end of the reporting period:

	2018	2017

Parent Company	18	18
NURC	17	17
HURC	21	–
CCPI	–	23

32. Income Taxes

Provision for income tax consists of:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Current	₱2,004,462,439	₱2,584,562,832	₱533,905,331
Deferred	77,631,388	212,923,469	233,589,768
	₱2,082,093,827	₱2,797,486,301	₱767,495,099

Components of the Group's net deferred tax assets and liabilities follow:

	Net deferred tax assets		Net deferred tax liabilities	
	2018	2017	2018	2017
Deferred tax assets on:				
Net unrealized foreign exchange loss	₱–	₱21,534,393	₱–	₱–
Pension liabilities	79,085,718	67,546,081	144,652,177	128,290,055
Nondeductible accruals	–	–	214,771,891	219,029,961
Leases	147,408	–	11,525,815	13,857,605
Impairment losses on trade receivables and property and equipment	100,852,134	100,852,134	–	–
Past service cost	–	75,505,520	–	–
Inventory write-downs	27,377,429	27,377,429	5,961,639	4,634,232
Foreign subsidiaries	100,068,558	33,866,361	–	15,900,394
Unearned revenue	–	–	22,726,694	22,726,694
NOLCO	36,499,802	41,745,235	–	–
MCIT	34,312	–	–	–
Others	–	4,242,256	–	12,083,956
	344,065,361	372,669,409	399,638,216	416,522,897
Deferred tax liabilities on:				
Gain arising from changes in fair value less estimated point-of-sale costs of swine stocks	10,973,879	151,215,472	–	–
Borrowing costs	1,977,244	4,537,603	–	–
Accelerated depreciation	–	–	506,773,573	543,986,501
Intangibles	–	–	2,965,938,522	2,987,529,285
Undistributed income of foreign subsidiaries	–	–	708,771,887	651,315,255
Foreign subsidiaries	468,328	–	446,906,513	495,207,481
Net unrealized foreign exchange gain	135,159,925	–	–	–
	148,579,376	155,753,075	4,628,390,495	4,678,038,522
Net deferred tax assets (liabilities)	₱195,485,985	₱216,916,334	(₱4,228,752,279)	(₱4,261,515,625)

As of December 31, 2018 and 2017, the Group's subsidiaries did not recognize deferred tax assets amounting to ₱231.6 million and ₱434.6 million, respectively, since management believes that future taxable income will not be available to allow all or part of the deferred tax assets to be utilized.

Reconciliation between the Group's statutory income tax rate and the effective income tax rate follows:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Statutory income tax rate	30.00%	30.00%	30.00%
Increase (decrease) in tax rate resulting from			
Income exempt from tax	(2.64)	(1.42)	(1.96)
Interest income subjected to final tax	(0.31)	(0.23)	(0.30)
Nondeductible interest expense	0.13	0.09	0.12
Equity in net income of a joint venture	(0.34)	(0.60)	(0.46)
Net income of subsidiaries with different tax rate	(8.26)	(8.95)	(5.57)
Change in value of financial assets at FVPL	0.09	(0.15)	0.04
Others	(0.64)	1.31	1.99
Effective income tax rate	18.03%	20.05%	23.86%

Under Philippine tax laws, the Group is subject to income taxes, as well as other taxes (presented as 'Taxes and licenses' in the consolidated statements of income). Other taxes paid consist principally of documentary stamp taxes, real estate taxes and municipal taxes.

Income taxes include the minimum corporate income tax (MCIT), regular corporate income tax (RCIT), final tax paid at the rate of 20.0% for peso deposits and 7.5% for foreign currency deposits on gross interest income from bank deposits and short-term investments.

Current tax regulations provide that the RCIT rate shall be 30.0% and interest allowed as a deductible expense is reduced by 33.0% of interest income subjected to final tax beginning January 1, 2009.

Current tax regulations also provide for rules on the imposition of a 2.0% MCIT on the gross income as of the end of the taxable year beginning on the fourth taxable year immediately following the taxable year in which the Group commenced its business operations. Any excess MCIT over the RCIT can be carried forward on an annual basis and credited against the RCIT for the three immediately succeeding taxable years. In addition, NOLCO is allowed as a deduction from taxable income in the next three years from the date of inception.

Current tax regulations further provides that an OSD equivalent to 40.0% of gross income may be claimed as an alternative deduction in computing for the RCIT. For the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, the Group did not claim the OSD in lieu of the itemized deductions.

Entertainment, Amusement and Recreation (EAR) Expenses

Current tax regulations define expenses to be classified as EAR expenses and set a limit for the amount that is deductible for tax purposes. EAR expenses are limited to 0.5% of net sales for sellers of goods or properties or 1.0% of net revenue for sellers of services. For sellers of both goods or properties and services, an apportionment formula is used in determining the ceiling on such expenses. The Group recognized EAR expenses (included under 'General and administrative expenses' in the consolidated statements of income) amounting to ₱57.5 million, ₱61.9 million and ₱15.0 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

MCIT

An MCIT of 2.0% on modified gross income is computed and compared with the RCIT. Any excess of the MCIT over RCIT is deferred and can be used as a tax credit against future income tax liability for the next three years.

33. Earnings Per Share

The following reflects the income and share data used in the basic/dilutive EPS computations:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Net income attributable to equity holders of the parent	₱9,204,306,540	₱10,888,080,693	₱2,402,116,084
Weighted average number of common shares	2,204,161,868	2,204,161,868	2,204,161,868
Basic/dilutive EPS	₱4.18	₱4.94	₱1.09

The weighted average number of common shares excludes the treasury shares acquired during the year. There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of completion of these consolidated financial statements.

There were no potential dilutive shares for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016.

34. Related Party Transactions

The Group, in the regular conduct of its business, has entered into transactions with JGSHI, its ultimate parent, and other related parties principally consisting of sales, purchases, advances and reimbursement of expenses, regular banking transactions, leases and, management and administrative service agreements. Transactions with related parties are generally settled in cash.

Intercompany transactions with subsidiaries are eliminated in the accompanying consolidated financial statements. Details of related party transactions are as follows:

December 31, 2018							
Related Party	Category/Transaction	Amount/ Volume	Cash and Cash Equivalents (Note 7)	Trade Receivable (Payable) - net (Notes 10 and 19)	Non-trade Receivable (Payable) - net (Notes 10 and 19)	Terms	Conditions

The Group maintains savings and current accounts and time deposits with an entity under common control which is a local commercial bank. Cash and cash equivalents earns interest at the prevailing bank deposit rates.

As of December 31, 2018 and 2017, the Group has advances from stockholders amounting to ₱247.2 million and ₱243.6 million, respectively (see Note 19). These advances are non-interest bearing and payable on demand.

Transactions with the retirement plan

The Parent Company entered into an agreement to lease the land of the retirement plan for a period of one (1) year, renewable annually. Rentals incurred amounted to ₱25.3 million and ₱25.3 million for the years ended December 31, 2018 and 2017, respectively. Terms are unsecured, noninterest-bearing and payable on demand.

Included in the Parent Company's retirement plan assets are special savings deposits with RBC. In December 31, 2018 and 2017, special savings deposit with RBC amounting to ₱445.2 million and ₱657.5 million bears annual interest rates ranging from 1.5% to 5.8% and 10.0% to 3.5%, respectively.

Compensation of Key Management Personnel

The compensation of the Group's key management personnel by benefit type follows:

	December 31, 2018	December 31, 2017	December 31, 2016
	(One Year)	(One Year)	(Three Months)
Short-term employee benefits	₱291,597,774	₱256,914,335	₱55,934,152
Post-employment benefits	81,989,490	70,445,960	17,611,490
	₱373,587,264	₱327,360,295	₱73,545,642

There are no agreements between the Group and any of its directors and key officers providing for benefits upon termination of employment, except for such benefits to which they may be entitled under the Group's pension plans.

35. Registration with the BOI

Certain operations of the Parent Company are registered with the BOI as preferred pioneer and nonpioneer activities. As registered enterprises, these entities are subject to some requirements and are entitled to certain tax and non-tax incentives which are considered in the computation of the provision for income tax.

Sugar Millsite - Tolong

On January 14, 2015, Sugar Millsite Tolong was registered with the BOI as an expanding producer of raw sugar.

Under the terms of the registration and subject to certain requirements, Parent Company is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of three (3) years from February 2015 (as an expanding producer raw sugar) or actual start of commercial operations, whichever is earlier but in case earlier than the date of registration; (b) importation of capital equipment, spare parts and accessories at zero (0) duty from the date of effectivity of Executive Order (EO) No. 70 and its implementing rules and regulations for a period of five (5) years reckoned from the date its registration or until the expiration of EO No. 70 whichever is earlier; (c) additional deduction from taxable income of fifty percent (50%) of the wages corresponding to the increment in number of

direct labor for skilled and unskilled workers in the year of availment as against the previous year, if the project meets the prescribed ratio of capital equipment to the number of workers set by the Board. This may be availed of for the first five (5) year from date of registration but not simultaneously with ITH; (d) importation of consigned equipment for a period of ten (10) years from the date of registration, subject to posting of re-export bond; (e) tax credit equivalent to national internal revenue taxes and duties paid on raw materials and supplies and semi-manufactured products used in producing its export product and forming part thereof for a period of ten (10) years from start of commercial operations; (f) exemption from wharfage dues, and any export tax, duty, impost and fee for period of ten (10) years from the date of registration; (g) employment of foreign nationals; (h) simplifications of customs procedures for the importation of equipment, spare parts, raw materials and supplies.

The ITH entitlement has ended last February 14, 2018.

Sugar Millsite - Sonedco

On June 29, 2018, Sugar Millsite Sonedco was registered with the BOI as an expanding producer of refined sugar and its by-product (molasses).

Under the terms of the registration and subject to certain requirements, Parent Company is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of three (3) years from September 2018 (as an expanding producer of refined sugar and its by-product) or actual start of commercial operation, whichever is earlier but availment shall in no case be earlier than the date of registration; (b) importation of capital equipment, spare parts and accessories at zero (0) duty under EO No. 22 and its implementing rules; (c) exemption from taxes and duties on imported spare parts and consumable supplies for export producers with Customs Bonded Manufacturing Warehouse (CBMW) exporting at least seventy percent (70%) of production; (d) additional deduction for labor expense for a period of five (5) years from registration an amount equivalent to fifty percent (50%) of the wages corresponding to the increment in number of direct labor for skilled and unskilled workers in the year of availment as against the previous year, if the project meets the prescribed ratio of capital equipment to the number of workers set by the Board. This may be availed of for the first five (5) years from the date of registration but not simultaneously with ITH; (e) importation of consigned equipment for a period of ten (10) years from date of registration, subject to posting of re-export bond; (f) employment of foreign nationals; (g) simplification of customs procedures for the importation of equipment, spare parts, raw materials and supplies; (h) exemption from wharfage dues, and export tax duty, impost and fee for a period of ten (10) years from the date of registration; (i) access to CBMW subject to the BOC rules and regulations, and additional deduction from taxable income equivalent to 100% of expenses incurred in the development of necessary and major infrastructure facilities.

The said expansion started commercial operation on November 27, 2018.

Sugar Millsite - Balayan

On September 8, 2017, Sugar Millsite Balayan was registered with the BOI as an expanding producer of raw sugar and its by-product (molasses).

Under the terms of the registration and subject to certain requirements, Parent Company is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of three (3) years from November 2018 (as an expanding producer of raw sugar and its by-product) or actual start of commercial operation, whichever is earlier but in no case be earlier than the date of registration; (b) importation of capital equipment, spare parts and accessories at zero (0) duty under EO No. 22 and its implementing rules. Only equipment directly needed and exclusively use in its operation shall be entitled to capital equipment incentives; (c) additional deduction from taxable income of fifty percent (50%) of the

wages corresponding to the increment in number of direct labor for skilled and unskilled workers in the year of availment as against the previous year, if the project meets the prescribed ratio of capital equipment to the number of workers set by the Board. This may be availed of for the first five (5) years from the date of registration but not simultaneously with ITH; (d) importation of consigned equipment for a period of ten (10) years from date of registration, subject to posting of re-export bond; (e) employment of foreign nationals; and (f) simplification of customs procedures for the importation of equipment, spare parts, raw materials and supplies. The said expansion will start commercial operation early of 2019.

Cogeneration

On September 26, 2014, Cogeneration was registered with the BOI as a Renewable Energy (RE) developer of Bagasse-fired power plant.

Under the terms of the registration and subject to certain requirements, the Parent Company is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of seven (7) years at which the RE plant generated the first kilowatt-hour energy after commissioning or testing, or two months from date of commissioning, whichever is earlier; (b) duty-free importation of RE machinery, equipment, and materials including control and communication equipment; (c) tax exemption of carbon credits; (d) special realty tax rates on equipment and machinery, (e) NOLCO during the first three years from the start of commercial operation shall be carried over as a deduction from the gross income as defined in the National Internal Revenue Code (NIRC) for the next seven (7) years immediately following the year of such loss; (f) after availment of the ITH, the enterprise shall pay a corporate tax of 10% on its taxable income as defined in the NIRC, provided that it shall pass on the savings to the end users in the form of lower power rates; (g) the plant, machinery, and equipment that are reasonably needed and actually used for the exploration, development, and utilization of RE resources may be depreciated using a rate not exceeding twice the rate which would have been used had the annual allowance been computed in accordance with the rules and regulations prescribed by the Department of Finance and the provisions of the NIRC; (h) the sale of fuel or power generated by the enterprise from renewable sources of energy such as biomass as well as its purchases of local supply of goods, properties, and services needed for the development, construction, and installation of its plant facilities, and the whole process of exploration and development of RE sources up to its conversion into power shall be subject to zero percent VAT pursuant to NIRC; (i) tax credit equivalent to 100% of the value of VAT and custom duties that would have been paid on the purchase of RE machinery, equipment, materials and parts had these items been imported shall be given to the enterprise that purchases machinery, equipment, materials and parts from a domestic manufacturer.

Distillery

On August 28, 2013, Distillery was registered with the BOI as a manufacturer of bio-ethanol (fuel grade ethanol).

Under the terms of the registration and subject to certain requirements, the Parent Company is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of seven (7) years from March 2014 or date of commissioning, whichever is earlier; (b) duty-free importation of RE machinery, equipment, and materials including control and communication equipment; (c) tax exemption of carbon credits; (d) special realty tax rates on equipment and machinery (e) NOLCO during the first three years from the start of commercial operation shall be carried over as a deduction from the gross income as defined in the NIRC for the next seven (7) years immediately following the year of such loss; (f) after availment of the ITH, the enterprise shall pay a corporate tax of 10.0% on its taxable income as defined in the NIRC, provided that it shall pass on the savings to the end users in the form of lower power rates; (g) the plant, machinery, and equipment that are reasonably needed and actually used for the exploration, development, and utilization of RE resources may be depreciated using a rate not exceeding twice the rate which would have been used had the annual

allowance been computed in accordance with the rules and regulations prescribed by the Department of Finance and the provisions of the NIRC. The enterprise that applies for accelerated depreciation shall no longer be eligible to avail of the ITH; (h) the sale of fuel or power generated by the enterprise from renewable sources of energy such as biomass as well as its purchases of local supply of goods, properties, and services needed for the development, construction, and installation of its plant facilities, and the whole process of exploration and development of RE sources up to its conversion into power shall be subject to zero percent VAT pursuant to NIRC; (i) tax credit equivalent to 100.0% of the value of VAT and custom duties that would have been paid on the purchase of RE machinery, equipment, materials and parts had these items been imported shall be given to the enterprise that purchases machinery, equipment, materials and parts from a domestic manufacturer.

Robina Farms (RF) - Poultry

On July 23, 2018, RF - Poultry was registered as an expanding producer of table eggs for the new commercial layer houses, with a non-pioneer status.

RF- Poultry is eligible to the grant of the following incentives: (a) ITH for three (3) years from July 2018 or actual start of commercial operations, whichever is earlier but shall not be earlier than the date of registration. Income qualified for ITH shall be limited to the income directly attributable to the eligible revenue generated from registered project; (b) exemption from taxes and duties on imported spare parts and consumable supplies with Customs Bonded Manufacturing Warehouse (CBMW) exporting at least seventy percent (70%) of production; (c) additional deduction for a period of five (5) years from registration an amount equivalent to fifty percent (50%) of wages corresponding to the increment in number of direct labor for skilled and unskilled workers in the year of avilment as against the previous year; (d) importation of consigned equipment for a period of ten (10) years from date of registration subject to posting of re-export bond; (e) employment of foreign nationals; (f) simplification of customs procedures for the importation of equipment, spare parts, raw materials and supplies; (g) exemption from wharfage dues, and any export tax, duty, impost and fee for a period of ten years from date of registration; (h) access to CBMW subject to customs rules and regulations; and (i) additional deduction from taxable income equivalent to 100% of expenses incurred in the development of necessary and major infrastructure facilities.

On January 30, 2008, RF - Poultry was registered with the BOI as an expanding producer of parent stock day-old chicks. On June 4 of the same year, it was registered as a new producer of table eggs and its by-products. Both activities are on a nonpioneer status.

Under the terms of the registration and subject to certain requirements, RF - Poultry is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of three (3) years from October 2008 (as an expanding producer of parent stock day-old chicks) and for a period of four (4) years from October 2009 (as a new producer of table eggs and its by-products); (b) additional deduction from taxable income on wages subject to certain terms and conditions; (c) employment of foreign nationals; (d) tax credit equivalent to the national internal revenue taxes and duties paid on raw materials and supplies and semi-manufactured products used in producing its export product and forming part thereof for a period of ten (10) years from start of commercial operations; (e) simplification of customs procedures for the importation of equipment, spare parts, raw materials and supplies; (f) access to CBMW subject to Custom rules and regulations, provided firm exports at least 70.0% of production output; (g) exemption from wharfage dues, any export tax, duty, impost and fees for a period of ten (10) years from date of registration; (h) importation of consigned equipment for a period of ten (10) years from the date of registration, subject to the posting of re-export bond; (i) exemption from taxes and duties on imported spare parts and consumable supplies for export producers with CBMW exporting at least 70.0% of production; (j) tax and duty exemption on the imported breeding stocks and genetic materials within ten (10) years from the date of

registration; and (k) tax credit on tax and duty portion of domestic breeding stocks and genetic materials within ten (10) years from the date of registration.

Robina Farms (RF) - Hogs

On January 30, 2008, RF - Hogs was registered with the BOI as an expanding producer of finisher hogs in RF 11, Antipolo City and RF 12, Bulacan on a nonpioneer status. Under the terms of the registration and subject to certain requirements, RF - Hogs is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of three (3) years from October 2009 but only from the sales generated from the registered projects; (b) additional deduction from taxable income on wages subject to certain terms and conditions; (c) employment of foreign nationals; (d) tax credit equivalent to the national internal revenue taxes and duties paid on raw materials and supplies and semi-manufactured products used in producing its export product and forming part thereof for a period of ten (10) years from start of commercial operations; (e) simplification of customs procedures for the importation of equipment, spare parts, raw materials and supplies; (f) access to Customs Bonded Manufacturing Warehouse (CBMW) subject to Custom rules and regulations, provided firm exports at least 70% of production output; (g) exemption from wharfage dues, any export tax, duty, impost and fees for a period of ten (10) years from date of registration; (h) importation of consigned equipment for a period of ten (10) years from the date of registration, subject to the posting of re-export bond; (i) exemption from taxes and duties on imported spare parts and consumable supplies for export producers with CBMW exporting at least 70% of production; (j) tax and duty exemption on the imported breeding stocks and genetic materials within ten (10) years from the date of registration; and (k) tax credit on tax and duty portion of domestic breeding stocks and genetic materials within ten (10) years from the date of registration.

36. Commitments and Contingencies

Milling Contracts

Milling contracts with various planters provide for a 60%-70% share to the planters (including related parties) and 30%-40% share to the Group of sugar and molasses produced from sugar canes milled. The Sugar Industry Development Act of 2015 provides that, to ensure the immediate payment of farmers and secure their income from sugarcane, farmers may enter into any payment method with the sugar mill.

Sugar under Custody but not owned

As of December 31, 2018 and 2017, the Group has in its custody sugar owned by several quedan holders with volume of 502,051 Lkg and 460,835 Lkg, respectively. The said volume of sugar is not reflected in the statement of financial position since this is not owned by the Group. The Group is accountable to both quedan holders and sugar traders for the value of these trusted sugar or their sales proceeds.

Operating Lease Commitments - Group as a Lessor

The Group has entered into (1) one-year renewable, noncancellable leases with various related parties covering certain land and buildings where office spaces are located. Future minimum rentals receivable under noncancellable operating leases amounted to ₱73.3 million, ₱63.7 million and ₱76.7 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

Operating Lease Commitments - Group as a Lessee

The Group leases land where certain of its facilities are located. The operating lease agreements are for periods ranging from one to five years from the date of the contracts and are renewable under certain terms and conditions. The Group's rentals incurred on these leases (included under 'Selling and distribution costs' and 'General and administrative expenses' in the consolidated statements of income) amounted to ₱937.6 million, ₱976.1 million and ₱228.5 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

Future minimum rentals payable under noncancellable operating leases follow:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Within one year	₱752,048,217	₱792,639,232	₱283,789,390
After one year but not more than five years	1,362,757,872	1,708,022,477	1,010,214,435
Five (5) years or more	464,770,770	506,731,716	436,059,899
	₱2,579,576,859	₱3,007,393,425	₱1,730,063,724

Finance Lease Commitments - Group as a Lessee

Some of the Group's subsidiaries were granted land usage rights from private entities. The land usage right represents the prepaid amount of land lease payments. The right is currently being amortized by the Group on a straight-line basis over the term of the right ranging from 30 to 50 years. The amortization on these leases (included under 'General and administrative expenses' in the consolidated statements of income) amounted to ₱2.5 million, ₱2.4 million and ₱0.6 million for the years ended December 31, 2018 and 2017, and the three-month period ended December 31, 2016, respectively.

Others

The Group has various contingent liabilities arising in the ordinary conduct of business which are either pending decision by the courts, under arbitration or being contested, the outcome of which are not presently determinable. In the opinion of management and its legal counsel, the eventual liability under these lawsuits or claims, if any, will not have a material or adverse effect on the Group's financial position and results of operations. The information usually required by PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, is not disclosed on the grounds that it can be expected to prejudice the outcome of these lawsuits, claims, arbitration and assessments.

37. Supplemental Disclosure to Cash Flow Statements

The Group's noncash activities are as follows:

	December 31, 2018 (One Year)	December 31, 2017 (One Year)	December 31, 2016 (Three Months)
Cumulative translation adjustment (Note 23)	₱1,630,309,574	(₱1,392,324,892)	₱1,200,565,078
Accrued earn-out of PSFL (Note 16)	-	(51,516,704)	-

Reclassifications between accounts considered in the preparation of cash flow statement for the year ended December 31, 2018 include: (a) from investment properties to property, plant and equipment with book value of ₱5.6 million (see Note 17); and (b) from investment in joint ventures to investment in subsidiaries amounting to ₱222.8 million (see Note 16).

The table below provides for the changes in liabilities arising from financing activities:

	Short-term debt	Long-term debt	Total liabilities from financing activities
January 1, 2018	₱2,009,317,911	₱33,225,962,388	₱35,235,280,299
Cash flows from availment	4,650,000,000	14,226,028,915	20,476,028,915
Cash flows from settlement	(4,050,000,000)	(15,356,761,921)	(21,006,761,921)
Foreign exchange movement/CTA	(147,932,805)	(462,062,230)	(609,995,035)
Others	–	(176,043,270)	(176,043,270)
December 31, 2018	₱2,461,385,106	₱31,457,123,882	₱33,918,508,988

38. Approval for the Release of the Financial Statements

The accompanying consolidated financial statements of the Group were authorized for issue by the AC and the BOD on April 5, 2019.

INDEPENDENT AUDITORS' REPORT ON SUPPLEMENTARY SCHEDULE

The Stockholders and the Board of Directors
Universal Robina Corporation
8th Floor, Tera Tower, Bridgetowne
E. Rodriguez, Jr. Avenue (C5 Road)
Ugong Norte, Quezon City, Metro Manila

We have audited, in accordance with Philippine Standards on Auditing, the consolidated financial statements of Universal Robina Corporation and Subsidiaries (the Group) as at December 31, 2018 and 2017, for the years ended December 31, 2018 and 2017 and for the period October 1, 2016 to December 31, 2016, included in this Form 17-A and have issued our report thereon dated April 5, 2019. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The schedules listed in the Index to Consolidated Financial Statements and Supplementary Schedules are the responsibility of the Group's management. These schedules are presented for purposes of complying with Securities Regulation Code Rule 68, As Amended (2011) and are not part of the basic consolidated financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the information required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

UNIVERSAL ROBINA CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information

Universal Robina Corporation (hereinafter referred to as “the Parent Company” or “URC”) was incorporated on September 28, 1954 and domiciled in the Republic of the Philippines, and is listed in the Philippine Stock Exchange. On October 28, 2002, the Parent Company’s corporate life was extended for another 50 years or until September 28, 2054. The registered office address of the Parent Company is at 8th Floor Tera Tower, Bridgetowne, E. Rodriguez, Jr. Avenue (C5 Road), Ugong Norte, Quezon City, Metro Manila.

The Parent Company is a majority owned subsidiary of JG Summit Holdings, Inc. (“the Ultimate Parent Company” or “JGSHI”).

The Parent Company and its subsidiaries (hereinafter referred to as “the Group”) is one of the largest branded food products companies in the Philippines and has a strong presence in ASEAN markets. The Group is involved in a wide range of food-related businesses which are organized into three (3) business segments: (a) the branded consumer food segment which manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, packed cakes, beverages, noodles and tomato-based products; (b) the agro-industrial segment which engages in hog and poultry farming, production and distribution of animal health products and manufacture and distribution of animal feeds, glucose and soya bean products; and (c) the commodity food segment which engages in sugar milling and refining, flour milling and pasta manufacturing and renewable energy development. The Parent Company also engages in the manufacture of bi-axially oriented polypropylene (BOPP) films for packaging companies and flexible packaging materials to cater various URC branded products. The Parent Company’s packaging business is included in the branded consumer food segment.

The operations of certain subsidiaries are registered with the Board of Investments (BOI) as preferred pioneer and nonpioneer activities. Under the terms of the registrations and subject to certain requirements, the Parent Company and certain subsidiaries are entitled to certain fiscal and non-fiscal incentives, including among others, an income tax holiday (ITH) for a period of three (3) years to seven (7) years from respective start dates of commercial operations. The Group is also subject to certain regulations with respect to, among others, product composition, packaging, labeling, advertising and safety.

The principal activities of the Group are further described in Note 6 to the consolidated financial statements.

2. Summary of Significant Accounting Policies

Basis of Preparation

The accompanying consolidated financial statements of the Group have been prepared on a historical cost basis, except for financial assets at fair value through profit or loss (FVTPL), available-for-sale (AFS) financial assets/financial assets at fair value through other comprehensive income (FVOCI) and derivative financial instruments that have been measured at fair value, inventories that have been measured at lower of cost and net realizable value (NRV) and biological assets and agricultural produce that have been measured at fair value less estimated costs to sell.

The consolidated financial statements of the Group are presented in Philippine Peso. The functional and presentation currency of the Parent Company and its Philippine subsidiaries is the Philippine Peso. All values are rounded to the nearest peso except when otherwise stated.

The functional currencies of the Group's consolidated foreign subsidiaries follow:

Statement of Compliance

The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

Basis of Consolidation

The consolidated financial statements include the financial statements of the Parent Company and the following wholly and majority owned subsidiaries:

Subsidiaries	Place of Incorporation	Effective Percentages of Ownership	
		March 31, 2019	December 31, 2018
CFC Corporation	Philippines	100.00	100.00
Bio-Resource Power Generation Corporation and a Subsidiary	- do -	100.00	100.00
Calbee – URC, Inc. (CURCI)	- do -	100.00	100.00
Hunt – URC (HURC)	- do -	100.00	100.00

URCICL and Subsidiaries*	- do -	100.00	100.00
URCL	Cayman Islands	100.00	100.00
URCCCL	China	100.00	100.00

* Subsidiaries are located in Thailand, Singapore, Malaysia, Vietnam, Indonesia, China, Hong Kong, Myanmar, New Zealand and Australia

Acquisition of CURCI

In September 2018, the Parent Company entered into a share purchase agreement with its joint venture partner, Calbee, Inc., to purchase the latter’s 50% equity interest in CURCI. As a result of the sale, CURCI became a wholly-owned subsidiary of URC (see Note 14).

Acquisition of HURC

In September 2018, the Parent Company entered into a share purchase agreement with its joint venture partner, ConAgra Grocery Products Company, LLC., to purchase the latter’s 50% equity interest in HURC. As a result of the sale, HURC became a wholly-owned subsidiary of URC (see Note 14).

Merger of CCPI

On March 10, 2015 and May 27, 2015, the BOD and stockholders of the Parent Company, respectively, approved the plan to merge CCPI with the Parent Company. On April 25, 2017 and June 28, 2017, the BOD and stockholders of the Parent Company, approved the revised Plan of Merger and Articles of Merger between the Company and the Parent Company. On April 24, 2018, the SEC approved the merger (see Note 14).

Control

Control is achieved when the Group is exposed, or has rights; to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and

- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Parent Company gains control until the date it ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent of the Group and to the non-controlling interests, even if this results in the noncontrolling interest having deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Group.

All intragroup transactions, balances, income and expenses are eliminated in the consolidation. Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Group's equity therein. The interest of non-controlling shareholders may be initially measured at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis. Subsequent to acquisition, non-controlling interests consist of the amount attributed to such interests at initial recognition and the non-controlling interest's share of changes in equity since the date of the combination.

Changes in the Group's interest in subsidiary that do not result in a loss of control are accounted for as equity transactions. Any difference between the amount by which the NCIs are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the Group.

If the Group loses control over a subsidiary, it:

- derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- derecognizes the carrying amount of any non-controlling interest;
- derecognizes the related other comprehensive income recorded in equity and recycles the same to profit or loss or retained earnings;
- recognizes the fair value of the consideration received;
- recognizes the fair value of any investment retained;
- recognizes any surplus or deficit in profit or loss in the consolidated statement of comprehensive income; and
- reclassifies the Parent Company's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Company, using consistent accounting policies. Some of the Group's subsidiaries have a local statutory accounting reference date of September 30. These are consolidated using management prepared information on a basis coterminous with the Group's accounting reference date.

Below are the subsidiaries with a different accounting reference date from that of the Parent Company:

<u>Subsidiaries*</u>	<u>Year-end</u>
Bio-resource Power Generation Corporation	September 30
Southern Negros Development Corporation	-do-

**Dormant/non-operating subsidiaries*

Business Combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. This policy also covers purchase of assets that constitutes acquisition of a business. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are recognized in profit or loss in the consolidated statement of comprehensive income as incurred.

Where appropriate, the cost of acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition-date fair value. Subsequent changes in such fair values are adjusted against the cost of acquisition where they qualify as measurement period adjustments. All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with relevant PFRSs. Changes in the fair value of contingent consideration classified as equity are not recognized.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that if known, would have effected the amounts recognized as of that date. The measurement period is the period from the date of acquisition to the date the Group receives complete information about facts and circumstances that existed as of the acquisition date and is subject to a maximum period of one year.

If the business combination is achieved in stages, the Group's previously-held interests in the acquired entity are remeasured to fair value at the acquisition date (the date the Group attains control) and the resulting gain or loss, if any, is recognized in profit or loss in the consolidated statement of comprehensive income. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss in the consolidated statement of comprehensive income, where such treatment would be appropriate if that interest were disposed of.

Combinations of Entities under Common Control

Where there are business combinations involving entities that are ultimately controlled by the same ultimate parent (i.e., Controlling Shareholders) before and after the business combination and that the control is not transitory ("business combinations under common control"), the Group accounts for such business combinations in accordance with the guidance provided by the Philippine Interpretations Committee Q&A No. 2011-02, PFRS 3.2 - *Common Control Business Combinations*. The purchase method of accounting is used, if the transaction was deemed to have substance from the perspective of the reporting entity. In determining whether the business combination has substance, factors such as the underlying purpose of the business combination and the involvement of parties other than the combining entities such as the non-controlling

interest, shall be considered. In cases where the transaction has no commercial substance, the business combination is accounted for using the pooling of interest method.

In applying the pooling-of-interests method, the Group follows the Philippine Interpretations Committee Q&A No. 2012-01, PFRS 3.2 - *Application of the Pooling of Interest Method for Business Combinations of Entities under Common Control in Consolidated Financial Statements*, which provides the following guidance:

- The assets and liabilities of the combining entities are reflected in the consolidated financial statements at their carrying amounts. No adjustments are made to reflect fair values, or recognize any new assets or liabilities, at the date of the combination. The only adjustments that are made are those adjustments to harmonize accounting policies.
- No new goodwill is recognized as a result of the combination. The only goodwill that is recognized is any existing goodwill relating to either of the combining entities. Any difference between the consideration paid or transferred and the equity acquired is reflected within equity as other equity reserve, i.e., either contribution or distribution of equity.
- The consolidated statement of income reflects the results of the combining entities for the full year, irrespective of when the combination took place.

Goodwill

Goodwill arising on the acquisition of a subsidiary is recognized as an asset at the date the control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously-held interest, if any, in the entity over the net fair value of the identifiable net assets recognized.

If after reassessment, the Group's interest in the net fair value of the acquiree's identifiable net assets exceeds the sum of consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously-held equity interest, if any, the excess is recognized immediately in the consolidated statement of income as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is not amortized, but is reviewed for impairment at least annually. Any impairment loss is recognized immediately in profit or loss and is not subsequently reversed.

On disposal of a subsidiary, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial years, except that the Group has adopted the following PFRSs and Philippine Accounting Standards (PAS) and Philippine Interpretations beginning January 1, 2019. The adoption of the new and amended standards and interpretations did not have any impact on the consolidated financial statements of the Group unless otherwise indicated.

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*
Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of

which party pays or receives reasonable compensation for the early termination of the contract.

- PFRS 16, *Leases*

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event.
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*

The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the ECL model in PFRS 9 applies to such long-term interests.

The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*
The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

Annual Improvements to PFRSs 2015-2017 Cycle

- Amendments to PFRS 3, *Business Combinations*, and PFRS 11, *Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

- Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*
The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.
- Amendments to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*
The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

Significant Accounting Policies

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated statement of financial position based on current or noncurrent classification.

An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalents, unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as noncurrent.

Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

Fair Value Measurement

The Group measures certain financial instruments and nonfinancial assets at fair value at each reporting date. Fair values of financial instruments measured at amortized cost and investment properties carried at cost are disclosed in Note 5.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting date.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of placement, and that are subject to insignificant risk of changes in value.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) Financial assets

Initial recognition and measurement

Financial assets are classified at fair value at initial recognition and subsequently measured at amortized cost, FVOCI, and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under PFRS 15.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at FVTPL

The financial assets of the Group as of March 31, 2019 consist of financial assets at amortized cost, financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments), derivative assets at FVOCI and financial assets at FVTPL (equity instruments).

Financial assets at amortized cost (debt instruments)

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents and receivables.

Financial assets designated at FVOCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at FVOCI when they meet the definition of equity under PAS 32, *Financial Instruments: Presentation*, and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the consolidated statements of income when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at FVOCI are not subject to impairment assessment.

The Group elected to classify irrevocably its investments in club shares under this category.

Financial assets at FVTPL (equity instruments)

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVOCI, as described above, debt instruments may be designated at FVTPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at FVTPL are carried in the consolidated statements of financial position at fair value with net changes in fair value recognized in the consolidated statements of income.

This category includes equity instruments held for trading and currency options.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group recognizes an allowance for ECLs for all debt instruments not held at FVTPL. ECL represents credit losses that reflect an unbiased and probability-weighted amount which is determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime ECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12-month ECL. The 12-month ECL is the portion of lifetime ECL that results from default events on a financial instrument that are possible within the 12 months after the reporting date. Lifetime ECL are credit losses that results from all possible default events over the expected life of a financial instrument.

For trade receivables, installment contracts receivable and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For other financial assets such nontrade receivable, loans receivable, due from related parties and other receivables, ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk (SICR) since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For cash and cash equivalents and short-term investments, the Group applies the low credit risk simplification. The probability of default and loss given defaults are publicly available and are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from reputable credit rating agencies to determine whether the debt instrument has SICR and to estimate ECLs.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

The key inputs in the model include the Group's definition of default and historical data of three years for the origination, maturity date and default date. The Group considers trade receivables and contract assets in default when contractual payment are 90 days past due, except for certain circumstances when the reason for being past due is due to reconciliation with customers of payment records which are administrative in nature which may extend the definition of default. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

Determining the stage for impairment

At each reporting date, the Group assesses whether there has been a SICR for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Group considers reasonable and

supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed SICR since origination, then the loss allowance measurement reverts from lifetime ECL to 12-months ECL.

b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by PFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the consolidated statements of income.

Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria in PFRS 9 are satisfied.

The Group does not have financial liabilities at FVTPL as of March 31, 2019.

Other financial liabilities

This category pertains to financial liabilities that are not held for trading or not designated as at FVTPL upon the inception of the liability. These include liabilities arising from operations and borrowings.

After initial measurement, other financial liabilities are measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on the acquisition and fees or costs that are an integral part of the EIR. Gains and losses are recognized in profit or loss when other financial liabilities are derecognized, as well as through the EIR amortization process.

This category applies to the Group's accounts payable and accrued expenses (excluding advances from customers, advances from third parties, statutory and taxes payables), short-term debt and trust receipts payable and long-term debt.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in profit or loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

Debt Issuance Costs

Debt issuance costs are amortized using EIR method and unamortized debt issuance costs are included in the measurement of the related carrying value of the loan in the consolidated statement of financial position. When the loan is repaid, the related unamortized debt issuance costs at the date of repayment are charged to the consolidated statement of income.

Inventories

Inventories, including goods-in-process, are valued at the lower of cost or net realizable value (NRV). NRV is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. NRV for materials, spare parts and other supplies represents the related replacement costs.

When the inventories are sold, the carrying amounts of those inventories are recognized under 'Cost of Sales' in the consolidated statement of income in the period when the related revenue is recognized.

Costs incurred in bringing each product to its present location and conditions are accounted for as follows:

Finished goods, goods-in-process, raw materials, containers and packaging materials

Cost is determined using the weighted average method. Finished goods and goods-in-process include direct materials and labor, and a proportion of manufacturing overhead costs based on actual goods processed and produced, but excluding borrowing costs.

Materials in-transit

Cost is determined using the specific identification basis.

Spare parts and supplies

Cost is determined using the weighted average method.

Biological Assets

The biological assets of the Group are divided into two major categories with sub-categories as follows:

- Swine livestock
 - Breeders (livestock bearer)
 - Sucklings (breeders' offspring)
 - Weanlings (comes from sucklings intended to be breeders or to be sold as fatteners)
 - Fatteners/finishers (comes from weanlings unfit to become breeders;

intended for the production of meat)

- Poultry livestock - Breeders (livestock bearer)
- Chicks (breeders' offspring intended to be sold as breeders)

Biological assets are measured on initial recognition and at each reporting date at its fair value less estimated costs to sell, except for a biological asset where fair value is not clearly determinable. The fair values are determined based on current market prices of livestock of similar age, breed and genetic merit. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market.

Agricultural produce is the harvested product of the Group's biological assets. A harvest occurs when agricultural produce is either detached from the bearer biological asset or when a biological asset's life processes cease. A gain or loss arising on initial recognition of agricultural produce at fair value less estimated costs to sell is recognized in the consolidated statement of income in the period in which it arises. The agricultural produce in swine livestock is the suckling that transforms into weanling then into fatteners/finishers and meats, while the agricultural produce in poultry livestock is the hatched chick and table eggs.

A gain or loss on initial recognition of a biological asset at fair value less estimated costs to sell and from a change in fair value less estimated costs to sell of a biological asset are included in the consolidated statement of income in the period in which it arises.

Property, Plant and Equipment

Property, plant and equipment, except land, are carried at cost less accumulated depreciation and amortization and impairment losses, if any.

The initial cost of an item of property, plant and equipment comprises its purchase price and any cost attributable in bringing the asset to its intended location and working condition. Cost also includes:

- (a) interest and other financing charges on borrowed funds used to finance the acquisition of property, plant and equipment to the extent incurred during the period of installation and construction; and
- (b) asset retirement obligation relating to property, plant and equipment installed/constructed on leased properties, if any.

Land is stated at cost less any impairment in value.

Subsequent costs are capitalized as part of the 'Property, plant and equipment', only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Cost of repairs and maintenance are expensed when incurred.

Foreign exchange differentials arising from foreign currency borrowings used for the acquisition of property, plant and equipment are capitalized to the extent that these are regarded as adjustments to interest costs.

Depreciation and amortization of property, plant and equipment commence, once the property, plant and equipment are available for use and are computed using the straight-line method over the EUL of the assets regardless of utilization.

The EUL of property, plant and equipment of the Group follow:

	<u>Years</u>
Land improvements	5 to 10
Buildings and improvements	10 to 30
Machinery and equipment	10
Transportation equipment	5
Furniture, fixtures and equipment	5

Leasehold improvements are amortized over the shorter of their EUL or the corresponding lease terms. The residual values, useful lives and methods of depreciation and amortization of property, plant and equipment are reviewed periodically and adjusted, if appropriate, at each financial year-end to ensure that the method and period of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment. Any change in the expected residual values, useful lives and methods of depreciation are adjusted prospectively from the time the change was determined necessary.

Construction-in-progress and equipment in transit are stated at cost. This includes the cost of construction and other direct costs. Borrowing costs that are directly attributable to the construction of property, plant and equipment are capitalized during the construction period. Construction in-progress and equipment-in-transit are not depreciated until such time as the relevant assets are completed and put into operational use.

Construction in-progress and equipment-in-transit are transferred to the related 'Property, plant and equipment' in the consolidated statement of financial position when the construction or installation and related activities necessary to prepare the property, plant and equipment for their intended use are completed, and the property, plant and equipment are ready for service.

Major spare parts and stand-by equipment items that the Group expects to use over more than one period and can be used only in connection with an item of property, plant and equipment are accounted for as property, plant and equipment. Depreciation and amortization on these major spare parts and stand-by equipment commence once these have become available for use (i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by the Group).

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of income, in the year the item is derecognized.

Fully depreciated property, plant and equipment are retained in the accounts until these are no longer in use.

Investment Properties

Investment properties consist of properties that are held to earn rentals or for capital appreciation or both, and those which are not occupied by entities in the Group. Investment properties, except for land, are carried at cost less accumulated depreciation and any impairment in value. Land is carried at cost less any impairment in value. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met, and excludes the cost of day-to-day servicing of an investment property.

Investment properties are measured initially at cost, including transaction costs. Transaction costs represent nonrefundable taxes such as capital gains tax and documentary stamp tax that are for the account of the Group. An investment property acquired through an exchange transaction is measured at fair value of the asset acquired unless the fair value of such an asset cannot be measured in, which case, the investment property acquired is measured at the carrying amount of asset given up.

The Group's investment properties consist solely of buildings and building improvements and are depreciated using the straight-line method over their EUL ranging from 10 to 30 years.

The depreciation and amortization method and useful life are reviewed periodically to ensure that the method and period of depreciation and amortization are consistent with the expected pattern of economic useful benefits from items of investment properties.

Investment properties are derecognized when either they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in the consolidated statement of income in the year of retirement or disposal.

Transfers are made to investment property when, and only when, there is a change in use, evidenced by the end of owner occupation, commencement of an operating lease to another party or by the end of construction or development. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner occupation or commencement of development with a view to sale.

For a transfer from investment property to owner-occupied property to inventories, the deemed cost of property for subsequent accounting is its fair value at the date of change in use. If the property occupied by the Group as an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under Property, plant and equipment account up to the date of change in use.

Goodwill

Goodwill represents the excess of the cost of the acquisition over the fair value of identifiable net assets of the investee at the date of acquisition which is not identifiable to specific assets.

Goodwill acquired in a business combination from the acquisition date is allocated to each of the Group's cash-generating units, or groups of cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Each unit or group of units to which the goodwill is allocated:

- represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and
- is not larger than a segment based on the Group's operating segments as determined in accordance with PFRS 8, *Operating Segments*.

Following initial recognition, goodwill is measured at cost, less any accumulated impairment losses. Goodwill is reviewed for impairment annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired (see further discussion under Impairment of Nonfinancial Assets).

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is

disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Intangible Assets

Intangible assets (other than goodwill) acquired separately are measured on initial recognition at cost. The cost of intangible asset acquired in a business combination is its fair value as at the acquisition date. Following initial recognition, intangible assets are measured at cost less any accumulated amortization and impairment losses, if any. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The EUL of intangible assets are assessed to be either finite or indefinite.

The useful lives of intangible assets with a finite life are assessed at the individual asset level. Intangible assets with finite lives are amortized on a straight-line basis over the asset's EUL and assessed for impairment, whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each reporting date.

Changes in the EUL or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite useful lives is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level (see further discussion under Impairment of Nonfinancial Assets). Such intangibles are not amortized. The useful life of an intangible asset with an indefinite useful life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

A gain or loss arising from derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognized in the consolidated statement of income when the asset is derecognized.

A summary of the policies applied to the Group's intangible assets follows:

	EUL	Amortization method used	Internally generated or acquired
Product Formulation	Indefinite	No amortization	Acquired
Trademarks/Brands	Indefinite	No amortization	Acquired
Trademarks	Finite (4 years)	Straight line amortization	Acquired
Software Costs	Finite (10 years)	Straight line amortization	Acquired
Customer Relationship	Finite (35 years)	Straight line amortization	Acquired

Investment in Joint Ventures

The Group has interests in joint ventures. A joint venture is a contractual arrangement whereby two or more parties who have joint control over the arrangement have rights to the net assets of the arrangements.

The Group's investment in joint venture is accounted for using the equity method of accounting. Under the equity method, the investment in a joint venture is carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share in the net assets of the joint venture. The consolidated statement of income reflects the Group's share in the results of operations of the joint venture. Where there has been a change recognized directly in the investees' equity, the Group recognizes its share of any changes and discloses this, when applicable, in the other comprehensive income in the consolidated statement of changes in equity. Profits and losses arising from transactions between the Group and the joint ventures are eliminated to the extent of the interest in the joint ventures.

The Group discontinues applying the equity method when its investments in investee companies are reduced to zero. Accordingly, additional losses are not recognized unless the Group has guaranteed certain obligations of the associates or joint venture. When the investees subsequently report net income, the Group will resume applying the equity method but only after its equity in the net income equals the equity in net losses of associates and joint venture not recognized during the period the equity method was suspended.

The investee company's accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

Impairment of Nonfinancial Assets

This accounting policy applies primarily to the Group's property, plant and equipment (see Note 12), investment properties (see Note 15), investment in joint ventures (see Note 14), goodwill (see Note 13) and intangible assets (see Note 13).

Except for goodwill and intangible assets with indefinite useful lives which are tested for impairment annually, the Group assesses at each statement of financial position date whether there is an indication that its nonfinancial assets may be impaired. When an indicator of impairment exists or when an annual impairment testing for an asset is required, the Group makes a formal estimate of recoverable amount. Recoverable amount is the higher of an asset's (or cash-generating unit's) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed as part of the cash-generating unit to which it belongs. Where the carrying amount of an asset (or cash generating unit) exceeds its recoverable amount, the asset (or cash-generating unit) is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash-generating unit).

Impairment losses are recognized under 'Impairment Losses' in the consolidated statement of income.

The following criteria are also applied in assessing impairment of specific assets:

Property, plant and equipment, investment properties, intangible assets with definite useful lives

For property, plant and equipment, investment properties, intangible assets with definite useful lives, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable

amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income. After such a reversal, the depreciation and amortization expense is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining life.

Goodwill

Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount to which goodwill has been allocated, an impairment loss is recognized. Where goodwill forms part of a cash-generating unit (or group of cash-generating units) and part of the operations within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured on the basis of the relative fair values of the operation disposed of and the portion of the cash-generating unit retained.

Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives

Intangible assets with indefinite useful lives are tested for impairment annually as of year-end either individually or at the cash-generating unit level, as appropriate.

Investments in joint ventures

After application of the equity method, the Group determines whether it is necessary to recognize additional impairment losses on the Group's investments in joint ventures. If this is the case, the Group calculates the amount of impairment as being the difference between the fair value of the joint ventures and the acquisition cost and recognizes the amount under 'Provision for credit and impairment losses' in the consolidated statement of income.

Revenue Recognition (Upon adoption of PFRS 15 beginning January 1, 2018)

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has concluded that it is the principal in its revenue arrangements because it controls the goods or services before transferring them to the customer.

Sale of goods and services

Revenue from sale of goods and services is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods and services. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods and services, the Group considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer, if any.

Sale of sugar

Sale of raw sugar is recognized upon (a) endorsement and transfer of quedans for quedan-based sales and (b) shipment or delivery and acceptance by the customers for physical sugar sales. Sale of refined sugar and alcohol is recognized upon shipment of delivery and acceptance by the customers. Sale of molasses warehouse receipts, which represents ownership title over the molasses inventories.

Rendering of tolling services

Revenue derived from tolling activities is recognized as revenue at the point in time when the related services have been rendered.

Revenue Recognition (Prior to adoption of PFRS 15)

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and other sales taxes or duties. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Group has concluded that it is acting as principal in all of its revenue arrangements.

Sale of goods

Revenue from sale of goods is recognized upon delivery, when the significant risks and rewards of ownership of the goods have passed to the buyer and the amount of revenue can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable, net of any trade discounts, prompt payment discounts and volume rebates.

Rendering of tolling services

Revenue derived from tolling activities is recognized as revenue when the related services have been rendered.

Revenue outside the scope of PFRS 15:

Dividend income

Dividend income is recognized when the shareholder's right to receive the payment is established.

Rent income

Rent income arising on investment properties is accounted for on a straight-line basis over the lease term on ongoing leases.

Interest income

Interest income is recognized as it accrues using the effective interest rate (EIR) method under which interest income is recognized at the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a result of a past event; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each statement of financial position date and adjusted to reflect the current best estimate. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense under 'Finance Cost' in the

consolidated statement of income. Where the Group expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is probable.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements but disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Pension Costs

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Current service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset.

Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds

from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Termination benefit

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment as a result of either an entity's decision to terminate an employee's employment before the normal retirement date or an employee's decision to accept an offer of benefits in exchange for the termination of employment.

A liability and expense for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of those benefits and when the entity recognizes related restructuring costs. Initial recognition and subsequent changes to termination benefits are measured in accordance with the nature of the employee benefit, as either post-employment benefits, short-term employee benefits, or other long-term employee benefits.

Employee leave entitlement

Employee entitlements to annual leave are recognized as a liability when they are accrued to the employees. The undiscounted liability for leave expected to be settled wholly before twelve months after the end of the annual reporting period is recognized for services rendered by employees up to the end of the reporting period.

Income Taxes

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Deferred tax

Deferred tax is provided using the balance sheet liability method on all temporary differences, with certain exceptions, at the statement of financial position date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from unused minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, and the carryforward benefits of unused tax credits from excess MCIT and unused NOLCO can be utilized, except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the

initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor future taxable profit or loss; and

- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and future taxable profit will be available against which the temporary differences can be utilized.

The carrying amounts of deferred tax assets are reviewed at each statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each statement of financial position date, and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recognized.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss in the consolidated statement of comprehensive income. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the statement of financial position date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sale of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sale of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement financial position to the extent of the recoverable amount.

The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of “Other current assets” or “Accounts payable and other accrued liabilities” in the consolidated statement of financial position.

Borrowing Costs

Interest and other finance costs incurred during the construction period on borrowings used to finance property development are capitalized to the appropriate asset accounts. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress, and expenditures and borrowing costs are being incurred. The capitalization of these borrowing costs ceases when substantially all the activities necessary to prepare the asset for sale or its intended use are complete. If the carrying amount of the asset exceeds its recoverable amount, an impairment loss is recorded. Capitalized borrowing cost is based on the applicable weighted

average borrowing rate. Borrowing costs which do not qualify for capitalization are expensed as incurred.

Interest expense on loans is recognized using the EIR method over the term of the loans.

Leases

The determination of whether an arrangement is, or contains a lease, is based on the substance of the arrangement at inception date, and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

A reassessment is made after inception of the lease only if one of the following applies:

- a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- b) a renewal option is exercised or an extension granted, unless that term of the renewal or extension was initially included in the lease term;
- c) there is a change in the determination of whether fulfillment is dependent on a specified asset;
or
- d) there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios a, c or d above, and at the date of renewal or extension period for scenario b.

Group as a lessee

A lease is classified at the inception date as finance lease or an operating lease.

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in 'Finance costs' in the consolidated statement of income.

A leased asset is depreciated over the EUL of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the EUL of the asset and the lease term.

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated statement of income on a straight-line basis over the lease term.

Group as a lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the assets are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as the rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Cost and Expenses

Cost and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Cost and expenses are recognized when incurred.

Foreign Currency Translation/Transactions

The functional and presentation currency of the Parent Company and its Philippine subsidiaries is the Philippine Peso. Each entity in the Group determines its own functional currency and items included in the consolidated financial statements of each entity are measured using that functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded in the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the statement of financial position date. All differences are taken to the consolidated statement of income. Tax charges and credits attributable to exchange differences on those borrowings are also dealt with in statement of income. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of initial transaction. Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Group companies

As of reporting date, the assets and liabilities of these subsidiaries are translated into the presentation currency of the Group at the rate of exchange ruling at the statement of financial position date and their respective statements of income are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation are taken directly to a separate component of equity as 'Cumulative translation adjustment' under 'Other comprehensive income'. On disposal of a foreign entity, the deferred cumulative amount recognized in equity relating to that particular foreign operation shall be recognized in the consolidated statement of income.

Common Stock

Common stocks are classified as equity and are recorded at par. Proceeds in excess of par value are recorded as 'Additional paid-in capital' in the consolidated statement of changes in equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Retained Earnings

Retained earnings represent the cumulative balance of periodic net income (loss), dividend distributions, prior period adjustments and effect of changes in accounting policy and capital adjustments.

Other Comprehensive Income

Other comprehensive income comprises items of income and expenses (including items previously presented under the consolidated statements of changes in equity) that are not recognized in the consolidated statement of income for the year in accordance with PFRSs.

Treasury Shares

Treasury shares are recorded at cost and are presented as a deduction from equity. Any consideration paid or received in connection with treasury shares are recognized directly in equity.

When the shares are retired, the capital stock account is reduced by its par value. The excess of cost over par value upon retirement is debited to the following accounts in the order given: (a) additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued, and (b) retained earnings. When shares are sold, the treasury share account is credited and reduced by the weighted average cost of the shares sold. The excess of any consideration over the cost is credited to additional paid-in capital.

Transaction costs incurred such as registration and other regulatory fees, amounts paid to legal, accounting and other professional advisers, printing costs and stamp duties (net of any related income tax benefit) in relation to issuing or acquiring the treasury shares are accounted for as reduction from equity, which is disclosed separately.

No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Dividends on Common Stocks

Dividends on common shares are recognized as a liability and deducted from equity when approved by BOD of the Parent Company in the case of cash dividends, and the BOD and shareholders of the Parent Company in the case of stock dividends.

Earnings Per Share (EPS)

Basic EPS is computed by dividing consolidated net income attributable to equity holders of the Parent Company (consolidated net income less dividends on preferred shares) by the weighted average number of common stocks issued and outstanding during the year, adjusted for any subsequent stock dividends declared.

Diluted EPS amounts are calculated by dividing the consolidated net income attributable to equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

Segment Reporting

The Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on business segments is presented in Note 6 to the consolidated financial statements.

Events after the Reporting Period

Any post year-end event up to the date of approval of the BOD of the consolidated financial statements that provides additional information about the Group's position at the statement of financial position date (adjusting event) is reflected in the consolidated financial statements. Any post year-end event that is not an adjusting event is disclosed in the notes to the consolidated financial statements, when material.

Standards issued but not yet effective

The Group will adopt the following standards and interpretations when these become effective. Except as otherwise indicated, the Group does not expect the adoption of these new and amended PFRSs, PAS and Philippine Interpretations to have a significant impact on its consolidated financial statements.

Effective beginning on or after January 1, 2020

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements* and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

3. Significant Accounting Judgments and Estimates

The preparation of the consolidated financial statements in compliance with PFRSs requires the management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

a. Revenue recognition on sale of goods and services

Revenue recognition under PFRS 15 involves the application of significant judgment and estimation in the: (a) identification of the contract for sale of goods that would meet the requirements of PFRS 15; (b) assessment of performance obligation and the probability that the entity will collect the consideration from the buyer; (c) determining method to estimate variable consideration and assessing the constraint; and (d) recognition of revenue as the Group satisfies the performance obligation.

i. Existence of a contract

The Group enters into a contract with customer through an approved purchase order which constitutes a valid contract as specific details such as the quantity, price, contract terms and their respective obligations are clearly identified. In the case of sales to key accounts and distributors, the combined approved purchase order and trading terms agreement/exclusive distributorship agreement constitute a valid contract. In addition, part of the assessment process of the Group before revenue recognition is to assess the probability that the Group will collect the consideration to which it will be entitled in exchange for the goods sold that will be transferred to the customer.

ii. Identifying performance obligation

The Group identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct

when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

Based on management assessment, other than the sale of goods and services, no other performance obligations were identified except in the case of milling revenue.

iii. Recognition of revenue as the Group satisfies the performance obligation

The Group recognizes its revenue for all revenue streams at a point in time, when the goods are sold and delivered and when services are already rendered.

With the effectivity of PFRS 15 on January 1, 2018, as approved by the Financial Reporting Standards Council (FRSC), the Philippine Interpretations Committee (PIC) issued PIC Q&A 2019-3, *Revenue Recognition Guidance for Sugar Millers*, to assist the companies operating in the sugar industry in the adoption of PFRS 15. The interpretation states that a miller should recognize revenue arising from its sugar milling operation under either an output sharing agreement or cane purchase agreement, and that providing free storage constitutes a separate performance obligation in the case of an output sharing agreement.

In response to concerns raised by the sugar industry on the implementation and adoption of the PIC Q&A, the SEC issued MC No. 06 on April 4, 2019, deferring the application of the provisions of the above-mentioned PIC Q&A for a period of one (1) year.

Effective January 1, 2019, the Philippine sugar millers will adopt PIC Q&A No. 2019-3 and any subsequent amendments thereto retrospectively or as the SEC will later prescribe.

In 2018, the Group availed of the deferral of adoption of the above specific provisions. Consequently, the Group has not restated the comparative information related to sugar milling, which continues to be reported under PAS 18, *Revenue*.

b. Contingencies

The Group is currently involved in various legal proceedings. The estimate of the probable costs for the resolution of these claims has been developed in consultation with outside counsel handling the defense in these matters and is based upon an analysis of potential results. The Group currently does not believe these proceedings will have a material effect on the Group's financial position. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

Estimates

The key assumptions concerning the future and other sources of estimation uncertainty at the financial position date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

a. Assessment for ECL on trade receivables

The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade receivables. The provision matrix specifies provision rates depending on the number of days that a trade receivable is past due. The Group also uses appropriate groupings if its historical credit loss experience show significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current

observable data affecting each customer segment to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rate by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience.

The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate. Accordingly, the provision for ECL on trade receivables is sensitive to changes in assumptions about forecasted economic conditions.

The Group has assessed that the ECL on trade receivables is not material because substantial amount of receivables are normally collected within one year.

b. Assessment for ECL on Other Financial Assets at Amortized Cost

The Group determines the allowance for ECL using general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12-months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and,
- Actual or expected significant adverse changes in the operating results of the borrower.

The Group also considers financial assets that are more than 90 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the borrower.

The Group has assessed that the ECL on other financial assets at amortized cost is not material because the transactions with respect to these financial assets were entered into by the Group only with reputable banks and companies with good credit standing and relatively low risk of defaults.

c. Determination of fair values less estimated costs to sell of biological assets

The fair values of swine are determined based on current market prices of livestock of similar age, breed and genetic merit. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market. The fair values are reviewed and updated if expectations differ from previous estimates due to changes brought by both physical change and price changes in the market. It is possible that future results of operations could be materially affected by changes in these estimates brought about by the changes in factors mentioned.

d. Impairment of goodwill and intangible assets with indefinite useful lives

The Group performed its annual impairment test on its goodwill and other intangible assets with indefinite useful lives as of reporting date. The recoverable amounts of the intangible assets were determined based on value in use calculations using cash flow projections from financial budgets approved by management covering a five-year period.

Growth rate estimates - growth rates include long-term and terminal growth rates that are based on experiences and strategies developed for the various subsidiaries. The prospect for the industry was also considered in estimating the growth rates.

Discount rates - discount rates were estimated based on the industry weighted average cost of capital, which includes the cost of equity and debt after considering the gearing ratio.

Value-in-use is most sensitive to changes in discount rate and growth rate.

e. Assessment of impairment of nonfinancial assets

The Group assesses the impairment of its nonfinancial assets (i.e., property, plant and equipment, investment properties, investment in joint ventures and intangible assets with finite useful lives) whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The factors that the Group considers important which could trigger an impairment review include the following:

- market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating the asset's value in use and decrease the asset's recoverable amount materially;
- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- significant negative industry or economic trends.

The Group determines an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount has been determined based on value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset base of the cash-generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes.

f. Determination of the fair value of intangible assets and property, plant and equipment acquired in a business combination

The Group measures the identifiable assets and liabilities acquired in a business combination at fair value at the date of acquisition.

The fair value of the intangible assets acquired in a business combination is determined based on the net sales forecast attributable to the intangible assets, growth rate estimates and royalty rates using comparable license agreements. Royalty rates are based on the estimated arm's length royalty rate that would be paid for the use of the intangible assets. Growth rate

estimate includes long-term growth rate and terminal growth rate applied to future cash flows beyond the projection period.

The fair value of property, plant and equipment acquired in a business combination is determined based on comparable properties after adjustments for various factors such as location, size and shape of the property. Cost information and current prices of comparable equipment are also utilized to determine the fair value of equipment.

g. Estimation of pension and other benefits costs

The cost of defined benefit pension plans and other post-employment benefits as well as the present value of the pension obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each statement of financial position date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

h. Recognition of deferred tax assets

The Group reviews the carrying amounts of its deferred income taxes at each statement of financial position date and reduces the deferred tax assets to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. However, there is no assurance that the Group will generate sufficient taxable income to allow all or part of the deferred tax assets to be utilized.

4. Financial Risk Management Objectives and Policies

The Group's principal financial instruments, other than derivative financial instruments, comprise cash and cash equivalents, financial assets at FVTPL, financial assets at FVOCI, and interest-bearing loans and other borrowings. The main purpose of these financial instruments is to finance the Group's operations and related capital expenditures. The Group has various other financial assets and financial liabilities, such as trade receivables and payables which arise directly from its operations. One of the Group's subsidiary is a counterparty to derivative contracts. These derivatives are entered into as a means of reducing or managing their respective foreign exchange and interest rate exposures.

The BOD of the Parent Company and its subsidiaries review and approve policies for managing each of these risks and they are summarized below, together with the related risk management structure.

Risk Management Structure

The Group's risk management structure is closely aligned with that of the ultimate parent company. The BOD of the Parent Company and the respective BOD of each subsidiary are

ultimately responsible for the oversight of the Group's risk management processes that involve identifying, measuring, analyzing, monitoring and controlling risks.

The risk management framework encompasses environmental scanning, the identification and assessment of business risks, development of risk management strategies, design and implementation of risk management capabilities and appropriate responses, monitoring risks and risk management performance, and identification of areas and opportunities for improvement in the risk management process.

Each BOD has created the board-level Audit Committee (AC) to spearhead the managing and monitoring of risks.

AC

The AC shall assist the Group's BOD in its fiduciary responsibility for the over-all effectiveness of risk management systems, and both the internal and external audit functions of the Group. Furthermore, it is also the AC's purpose to lead in the general evaluation and to provide assistance in the continuous improvements of risk management, control and governance processes.

The AC also aims to ensure that:

- a. financial reports comply with established internal policies and procedures, pertinent accounting and auditing standards and other regulatory requirements;
- b. risks are properly identified, evaluated and managed, specifically in the areas of managing credit, market, liquidity, operational, legal and other risks, and crisis management;
- c. audit activities of internal and external auditors are done based on plan, and deviations are explained through the performance of direct interface functions with the internal and external auditors; and
- d. the Group's BOD is properly assisted in the development of policies that would enhance the risk management and control systems.

Enterprise Risk Management Group (ERMG)

The ERMG was created to be primarily responsible for the execution of the enterprise risk management framework. The ERMG's main concerns include:

- a. recommending risk policies, strategies, principles, framework and limits;
- b. managing fundamental risk issues and monitoring of relevant risk decisions;
- c. providing support to management in implementing the risk policies and strategies; and
- d. developing a risk awareness program.

Corporate Governance Compliance Officer

Compliance with the principles of good corporate governance is also one (1) of the primary objectives of the BOD. To assist the BOD in achieving this purpose, the BOD has designated a Compliance Officer who shall be responsible for monitoring the actual compliance with the provisions and requirements of the Corporate Governance Manual and other requirements on good corporate governance, identifying and monitoring control compliance risks, determining violations, and recommending penalties on such infringements for further review and approval of the BOD, among others.

Day-to-day risk management functions

At the business unit or company level, the day-to-day risk management functions are handled by four (4) different groups, namely:

- a. Risk-taking personnel. This group includes line personnel who initiate and are directly

- accountable for all risks taken.
- b. Risk control and compliance. This group includes middle management personnel who perform the day-to-day compliance check to approved risk policies and risk mitigation decisions.
 - c. Support. This group includes back office personnel who support the line personnel. Risk management. This group pertains to the business unit's Management Committee which makes risk mitigating decisions within the enterprise-wide risk management framework.

Enterprise Resource Management (ERM) Framework

The Parent Company's BOD is also responsible for establishing and maintaining a sound risk management framework and is accountable for risks taken by the Parent Company. The Parent Company's BOD also shares the responsibility with the ERMG in promoting the risk awareness program enterprise-wide.

The ERM framework revolves around the following eight interrelated risk management approaches:

- a. Internal Environmental Scanning. It involves the review of the overall prevailing risk profile of the business unit to determine how risks are viewed and addressed by management. This is presented during the strategic planning, annual budgeting and mid-year performance reviews of the Group.
- b. Objective Setting. The Group's BOD mandates the business unit's management to set the overall annual targets through strategic planning activities, in order to ensure that management has a process in place to set objectives which are aligned with the Group's goals.
- c. Event Identification. It identifies both internal and external events affecting the Group's set targets, distinguishing between risks and opportunities.
- d. Risk Assessment. The identified risks are analyzed relative to the probability and severity of potential loss which serves as a basis for determining how the risks should be managed. The risks are further assessed as to which risks are controllable and uncontrollable, risks that require management's attention, and risks which may materially weaken the Group's earnings and capital.
- e. Risk Response. The Group's BOD, through the oversight role of the ERMG, approves the business unit's responses to mitigate risks, either to avoid, self-insure, reduce, transfer or share risk.
- f. Control Activities. Policies and procedures are established and approved by the Group's BOD and implemented to ensure that the risk responses are effectively carried out enterprise-wide.
- g. Information and Communication. Relevant risk management information are identified, captured and communicated in form and substance that enable all personnel to perform their risk management roles.
- h. Monitoring. The ERMG, Internal Audit Group, Compliance Office and Business Assessment Team constantly monitor the management of risks through risk limits, audit reviews, compliance checks, revalidation of risk strategies and performance reviews.

Risk Management Policies

The main risks arising from the use of financial instruments are credit risk, liquidity risk and market risks such as foreign currency risk, equity price risk and interest rate risk. The Group's policies for managing the aforementioned risks are summarized below.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Group trades only with recognized and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit

terms are subject to credit verification procedures. The Credit Management Division of the Group continuously provides credit notification and implements various credit actions, depending on assessed risks, to minimize credit exposure. Receivable balances of trade customers are being monitored on a regular basis and appropriate credit treatments are executed for overdue accounts. Likewise, other receivable balances are also being monitored and subjected to appropriate actions to manage credit risk.

With respect to credit risk arising from the other financial assets of the Group, which comprise cash and cash equivalents, financial assets at FVTPL, AFS financial assets and certain derivative investments, the Group's exposure to credit risk arises from default of the counterparty with a maximum exposure equal to the carrying amount of these instruments.

Liquidity risk

Liquidity risk is the risk of not being able to meet funding obligation such as the repayment of liabilities or payment of asset purchases as they fall due. The Group's liquidity management involves maintaining funding capacity to finance capital expenditures and service maturing debts, and to accommodate any fluctuations in asset and liability levels due to changes in the Group's business operations or unanticipated events created by customer behavior or capital market conditions. The Group maintains a level of cash and cash equivalents deemed sufficient to finance its operations. It also maintains a portfolio of highly marketable and diverse financial assets that assumed to be easily liquidated in the event of an unforeseen interruption of cash flow. The Group also has committed lines of credit that it can access to meet liquidity needs. As part of its liquidity risk management, the Group regularly evaluates its projected and actual cash flows. It also continuously assesses conditions in the financial markets for opportunities to pursue fund raising activities. Fund raising activities may include obtaining bank loans and capital market issues both onshore and offshore.

Market risk

Market risk is the risk of loss to future earnings, to fair value or future cash flows of a financial instrument as a result of changes in its price, in turn caused by changes in interest rates, foreign currency exchange rates, equity prices and other market factors.

Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency other than the functional currency in which they are measured.

The Group has transactional currency exposures. Such exposures arise from sales and purchases in currencies other than the entities' functional currency.

Equity price risk

Equity price risk is the risk that the fair values of equities decrease as a result of changes in the levels of equity indices and the value of individual stocks.

Interest rate risk

The Group's exposure to interest rates relates primarily to the Group's short-term and long-term debt obligations. The Group's policy is to manage its interest cost using a mix of fixed and variable rate debt.

5. Fair Value Measurement

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate such value:

Cash and cash equivalents, receivables (except amounts due from and due to related parties), accounts payable and other accrued liabilities, short-term debt, and trust receipts payable
Carrying amounts approximate their fair values due to the relatively short-term maturities of these instruments.

Amounts due from and due to related parties
Carrying amounts of due from and due to related parties which are payable and due on demand approximate their fair values.

Financial assets at FVTPL, derivatives and financial assets at FVOCI
Fair values of quoted equity securities are based on quoted prices published in markets.

Biological assets
Biological assets are measured at their fair values less costs to sell. The fair values of Level 2 biological assets are determined based on current market prices of livestock of similar age, breed and genetic merit while Level 3 are determined based on adjusted commercial farmgate prices. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market.

The Group has determined that the highest and best use of the sucklings and weanlings is finishers while for other biological assets is their current use.

Investment properties
Fair value of investment properties is based on market data (or direct sales comparison) approach. This approach relies on the comparison of recent sale transactions or offerings of similar properties which have occurred and/or offered with close proximity to the subject property.

The fair values of the Group's investment properties have been determined by appraisers in 2017, including independent external appraisers, on the basis of the recent sales of similar properties in the same areas as the investment properties and taking into account the economic conditions prevailing at the time of the valuations are made.

The Group has determined that the highest and best use of the property used for the land and building is its current use.

Long-term debts
The fair value of long-term debts are based on the discounted value of future cash flows (interests and principal) using market rates plus a certain spread.

Fair Value Measurement Hierarchy

The Group uses the following hierarchy in determining and disclosing the fair value of financial instruments by valuation technique:

- Quoted prices in active markets for identical assets or liabilities (Level 1);
- Those involving inputs other than quoted prices included in Level 1 that are observable for the

- Those with inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

6. Business Segment Information

The Group's operating segments are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The Group has four reportable operating segments as follows:

- The branded consumer food products segment manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, bakery products, beverages, instant noodles and pasta. This segment also includes the packaging division, which manufactures BOPP films primarily used in packaging; and its subsidiary, which manufactures flexible packaging materials for the packaging requirements of various branded food products. Its revenues are in their peak during the opening of classes in June and Christmas season.
- The agro-industrial products segment engages in hog and poultry farming, manufacturing and distribution of animal feeds, glucose and soya products, and production and distribution of animal health products. Its peak season is during summer and before Christmas season.
- The commodity food products segment engages in sugar milling and refining, flour milling and pasta manufacturing, and in renewable energy through distillery and cogeneration businesses. The peak season for sugar is during its crop season, which normally starts in November and ends in April while flour and pasta's peak season is before and during the Christmas season.
- The corporate business segment engages in bonds and securities investment and fund sourcing activities.

No operating segments have been aggregated to form the above reportable operating business segments.

Management monitors the operating results of business segments separately for the purpose of making decisions about resource allocation and performance assessment. The measure presented to manage segment performance is the segment operating income (loss). Segment operating income (loss) is based on the same accounting policies as consolidated operating income (loss) except that intersegment revenues are eliminated only at the consolidation level. Group financing (including finance costs and revenues), market valuation gain and loss, foreign exchange gains or losses, other revenues and expenses and income taxes are managed on a group basis and are not allocated to operating segments. Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

The Group's business segment information follows:

	Sale of Goods and Services		Segment Result	
	For the quarter ended March 31			
	2019	2018 (As restated)	2019	2018 (As restated)
Branded Consumer Foods Group	₱26,156,557	₱24,989,403	₱3,125,527	₱2,866,028
Agro-Industrial Group	3,112,277	2,576,505	298,371	177,961
Commodity Foods Group	4,048,216	3,092,403	1,084,658	867,358
Corporate Businesses	–	–	(558,127)	(454,989)
	₱33,317,050	₱30,658,311	₱3,950,429	₱3,456,358

	Total Assets		Total Liabilities	
	As of March 31			
	2019	2018	2019	2018
Branded Consumer Foods Group	₱116,865,866	₱117,785,647	₱57,683,008	₱62,406,728
Agro-Industrial Group	7,935,393	6,859,455	4,994,961	2,980,019
Commodity Foods Group	23,989,924	20,517,668	6,747,665	4,804,086
Corporate Businesses	5,650,572	6,797,823	4,989,961	5,420,503
	₱154,441,755	₱151,960,593	₱74,415,595	₱75,611,336

Inter-segment Revenues

Inter-segment revenues are eliminated at the consolidation level.

Segment Results

Segment results pertain to the net income (loss) of each of the operating segments excluding the amounts of market valuation gains and losses on financial assets at FVTPL, foreign exchange gains or losses and other revenues and expenses which are not allocated to operating segments.

Segment Assets

Segment assets are resources owned by each of the operating segments excluding significant inter-segment transactions.

Segment Liabilities

Segment liabilities are obligations incurred by each of the operating segments excluding significant inter-segment transactions. The Group also reports to the chief operating decision maker the breakdown of the short-term and long-term debt of each of the operating segments.

7. Cash and Cash Equivalents

	March 31, 2019	December 31, 2018
Cash on hand	P66,798	P75,715
Cash in banks	3,179,632	3,895,391
Short-term investments	6,844,523	9,051,996
	P10,090,953	P13,023,102

Cash in banks earns interest at the prevailing bank deposit rates. Short-term investments represent money market placements that are made for varying periods depending on the immediate cash requirements of the Group, and earn interest ranging from 0.05% to 6.80% at March 31, 2019 and December 31, 2018, respectively, for foreign currency-denominated money market placements. Peso-denominated money market placements on the other hand, earn interest ranging from 2.4% to 6.0% and 1.50% to 5.50% as at March 31, 2019 and December 31, 2018, respectively.

8. Financial Assets at Fair Value Through Profit or Loss

This account consists of investment held-for-trading amounting to P420.1 million and P420.2 million as of March 31, 2019 and December 31, 2018, respectively. Investments held-for-trading consists of quoted equity securities issued by certain domestic entities.

The Group reported market valuation loss on investment financial assets of P44.0 thousand and P26.5 million for the first quarter ended March 31, 2019 and 2018, respectively.

9. Receivables

	March 31, 2019	December 31, 2018
Trade receivables	P13,820,132	P12,230,563
Due from related parties	1,178,423	845,802
Non-trade receivables	843,179	980,754
Advances to officers and employees	146,599	164,792
Interest receivable	10,046	9,690
Others	549,335	528,868
	16,547,714	14,760,469
Less allowance for impairment losses	358,620	355,144
	P16,189,094	P14,405,325

The aging analysis of the Group's receivables follows:

	Neither past due nor impaired	Past due but not impaired		Past due and impaired	March 31, 2019
		Less than 90 days	Over 90 days		
Trade receivables	P10,761,613	P2,224,543	P684,326	P149,650	P13,820,132
Due from related parties	1,178,423	-	-	-	1,178,423
Advances to officers and employees	51,749	3,225	71,978	19,647	146,599
Interest receivable	10,046	-	-	-	10,046

URC AU FinCo Loan due 2021

On September 30, 2016, URC AU FinCo entered into a syndicated term loan facility agreement payable in five (5) years, amounting to AU\$484.2 million (₱17.9 billion), with various banks for payment of acquisition costs and to refinance certain indebtedness of an acquired company, CSPL. The loan obtained bears a market rate plus a certain spread, payable quarterly, maturing on September 30, 2021.

URC NZ FinCo NZ\$395 Million Term Loan due 2023

On October 22, 2018, URC NZ FinCo entered into a term loan facility agreement guaranteed by the Parent Company payable in five years, amounting to NZ\$395.0 million (₱14.4 billion), with various banks for payment of the NZ\$420 million term loan due in 2019. The loan bears a market interest rate plus a certain spread, payable quarterly, and maturing on October 22, 2023.

URC NZ FinCo NZ\$420 Million Term Loan due 2019

On November 13, 2014, URC NZ FinCo entered into a term loan facility agreement payable in five (5) years, amounting to NZ\$420.0 million (₱12.6 billion), with various banks for payment of acquisition costs and to refinance certain indebtedness of an acquired company, NZSFHL. The loan obtained bears a market rate plus a certain spread, payable quarterly, maturing on November 13, 2019.

In October 2018, URC NZ FinCo prepaid its 5-year term loan under Clause 7.1 of the underlying Facility Agreement at face value plus accrued interest.

These loans contain negative covenants which include, among others, maintenance of consolidated debt to equity ratio of not greater than 2.5 to 1.0.

The exchange rate used to restate the foreign currency borrowings were ₱52.50 to US\$1.00 and ₱52.58 to US\$1.00 as of March 31, 2019 and December 31, 2018, respectively.

20. Equity

The details of the Parent Company's common stock follow:

	March 31, 2019	December 31, 2018
Authorized shares	2,998,000,000	2,998,000,000
Par value per share	₱1.00	₱1.00
Issued shares:		
Balance at beginning of period	2,230,160,190	2,227,638,933
Issuance during the period	-	2,521,257
Balance at end of period	2,230,160,190	2,230,160,190
Outstanding shares	2,204,161,868	2,204,161,868

Cumulative Redeemable Preferred Shares

The Group's authorized preferred shares of stock are 12% cumulative, nonparticipating, and nonvoting. In case of dissolution and liquidation of the Parent Company, the holders of the preferred shares shall be entitled to be paid an amount equal to the par value of the shares or ratably insofar as the assets of the Parent Company may warrant, plus accrued and unpaid dividends thereon, if any, before the holders of the common shares of stock can be paid their liquidating dividends. The authorized preferred stock is 2,000,000 shares at par value of ₱1.0 per share. There have been no issuances of preferred stock as of March 31, 2019 and December 31, 2018.

Retained Earnings

A portion of the unappropriated retained earnings representing the undistributed earnings of the investee companies is not available for dividend declaration until received in the form of dividends and is restricted to the extent of the cost of treasury shares.

On February 28, 2019, the Parent Company's BOD declared regular cash dividends amounting to ₱1.50 per share to stockholders of record as of March 14, 2019. On the same date, the Parent Company's BOD declared special cash dividends amounting to ₱1.65 per share to stockholders of record as of July 1, 2019. Total dividends declared amounted to ₱6.9 billion. On March 28, 2019, the regular cash dividend was paid amounting to ₱3.3 billion.

On December 18, 2018, the BOD approved the reversal of the appropriation of retained earnings in the aggregate amount of ₱2.5 billion, which was approved by the BOD in its resolutions adopted on September 27, 2016 and December 15, 2017.

On December 15, 2017, the BOD approved the additional appropriation of retained earnings amounting to ₱1.5 billion for capital expenditure commitments to expand capacities in the snack foods and beverage businesses across branded consumer food operations, which are expected to be completed within the next two years.

Treasury Shares

The Parent Company has outstanding treasury shares of 26.0 million shares (₱679.5 million) as of March 31, 2019 and December 31, 2018, restricting the Parent Company from declaring an equivalent amount from the unappropriated retained earnings as dividends.

Equity Reserve

In December 2014, the Parent Company entered into a share purchase agreement with Nissin to sell 14% of its equity interest in NURC. As a result of the sale, the equity interest of Parent Company changed from 65% to 51%. The gain from the sale amounting to ₱429.5 million is included under “Equity Reserve” in the 2015 consolidated statements of changes in equity.

In August 2012, the Parent Company has acquired 23.0 million common shares of URCICL from International Horizons Investment Ltd for ₱7.2 billion. The acquisition of shares represents the remaining 23.00% interest in URCICL. As a result of the acquisition, the Parent Company now holds 100.00% interest in URCICL. The Group recognized equity reserve from the acquisition amounting to about ₱5.6 billion included in “Equity Reserve” in the 2012 consolidated statements of changes in equity.

The equity reserve from the acquisition and sale will only be recycled in the consolidated statement of income in the event that the Group will lose its control over these subsidiaries.

21. Earnings Per Share

The following reflects the income and share data used in the basic/dilutive EPS computations:

	First quarter ended March 31	
	2019	2018 (As restated)
Net income attributable to equity holders of the parent	₱3,037,911	₱2,951,572
Weighted average number of common shares	2,204,162	2,204,162
Basic/dilutive EPS	₱1.38	₱1.34

There were no potential dilutive shares for the first quarter of 2019 and 2018.

22. Commitments and Contingencies

The Group has various contingent liabilities arising in the ordinary conduct of business which are either pending decision by the courts, under arbitration or being contested, the outcome of which are not presently determinable. In the opinion of management and its legal counsel, the eventual liability under these lawsuits or claims, if any, will not have a material or adverse effect on the Group’s financial position and results of operations. The information usually required by PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, is not disclosed on the grounds that it can be expected to prejudice the outcome of these lawsuits, claims, arbitration and assessments.
